Complaint Memorandum

390 Cobain
Jackson, NJ

Complaint #: 2877
Assigned: 02/20/26

If there are any questions, please contact our office at 732-341-9700 extension 7416.

Description

Numerous rats noticed coming from the neighboring property due to the excessive amounts of animals and debris

Narrative

Date: 03/25/26 **Time:** 02:00 pm - 02:45 pm **Entered By:** Chris Andrews

I arrived at the complaint location and I met with the resident at 400 Cobain. She explained that she had been working with the municipality in addressing the neighboring home that has numerous animals on site. She explained that her pets are bringing rodents back to her home and that this was the reason she began filing complaints.

I walked with her through the back yard of her property and I observed her property as being clean and free of any adverse conditions. At the back of her property the neighboring property has a pen of animals up against the fence line. I asked the resident if she has any rodents affecting her home or on her property. It was described that she does not have any issues with rodent activity but that her pets continue to bring back rodents from this area.

I explained to her the limits of what the health department could provide and that currently I would not be helpful in this instance as the issue is contained to the property and does not directly affect her. I explained that this is a scenario that can change and I left her with contact information should that occur.

At this time I cannot verify the complaint. No further action will be required.
NO CAUSE FOR FURTHER ACTION AT THIS TIME BY THIS AGENCY
