New Incident:			
NARRATIVE On 12/22/2021, Ms Baira Chernov responded to police headquarters and was adamant that complaints be signed against Mr. Holliday for violating LO 112-3D on November 17th. It should be noted that on November 18th I had asked Ms. Chernov to extend a courtesy to her neighbors until the noise ordinance could be explained to them. It should also be noted that I could hear the drums being played during a phone message that Ms. Chernov left for me on November 17th. She has changed her mind and insisted that Mr. Holliday be charged with a violation of the Noise Ordinance. She stated, "ignorance is no excuse," just because he was unaware it was a violation, it was still a violation. Based on her statements, both verbal and a written statement she provided, which is attached to this report, Mr. Holliday was charged with a violation of LO 112-3D on SC 005521, with a court date of January 5, 2022. Based on the tensions that have been ongoing between the two families, I contacted Mr. Holliday's mother, Shanell West, to notify her of the complaint being signed, so she was not blindsided by it arriving in the mail. During our phone call Ms. West was furious that the complaint was being backdated to charge him for a violation they were unaware of. She also would not let me explain the circumstances that led me to sign the complaint. She made the allegation that the Logan Township Police Department, and me specifically, were racially profiling her family. At that time the call was terminated.
