Hello John, just wanted to check in and say a few things about the NJDEP plan on road closures. I was very confused on the first survey where if you included more than 5000 acres you weren't counted in the survey. Everyone I know included more than 5000 acres.

I still believe more volunteerism and much needed repairs to the road infrastructure that has been ignored for many years is the answer.

As a person who spends 150 days a year in the state forest I realize that we need more quality restoration of the infrastructure and not more road closures

Thanks for your time and please feel free to contact me this decision has major implications to me

Jim Hamlin [REDACTED]
