INITIAL APPLICATION REVIEW

The Freehold Soil Conservation District has conducted our initial review of the plans submitted for the above referenced application and finds them to be incomplete. The following deficiency must be addressed in order for the application to be complete.

1. Sediment barrier Maintenance Notes (3) are not denoted on the detail. Refer to page 23-2 of the Standard.

Please incorporate the above item in the revised soil erosion and sediment control plan and forward three (3) sets, along with supporting calculations, to our office for further review. These plans must be signed and sealed by a professional architect or engineer. Upon review and determination that this item has been correctly and completely addressed in accordance with the State Standards for Soil Erosion and Sediment Control, the application will be considered complete and recommended for certification. If you should have any questions, please contact our office.

Respectfully,

Paul Califano
Resource Conservationist

cc: Applicant's Engineer
Planning Board
