RE: Request for Waiver of 10-Day Notification

Dear Mr. Voorhees:

A leak occurred on December 10, 2011 at the Health and Agriculture Building located at John Fitch Way. The water leaked into the elevator pit causing it to fill with water and hydraulic oil. This mixture impacted approximately 75 percent of the lower level of the facility, impacting carpeted office areas and production space. The carpet in the impacted offices overlay asbestos containing floor tile and mastic. In order to provide a safe work environment and restore printing operations, the carpet, floor tiles and mastic must be removed.

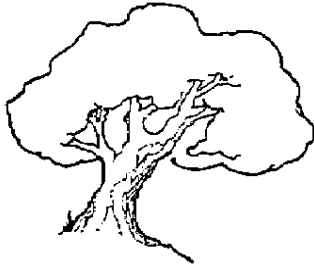

By way of this letter, the New Jersey Department of the Treasury, Division of Property Management and Construction (Treasury) is requesting a waiver of the 10 day notification to allow us to begin the asbestos removal on Friday, December 16, 2011. This waiver will allow Treasury to remove all impacted materials in a safe manner, restore operations to Health and Agriculture and provide a work environment free of recognized hazards.

Thank you for your assistance in this matter, please do not hesitate to call me at (609)-633-2127 if you have any questions.

Sincerely,

Georgette E.
