Subject: Re: FW: Revisions to Second Hand Good Ordinance

My comment meant that this ordinance had critics after the fact which leads me to believe we need a more thorough review process so we can get more feedback from the community before we pass them. I think referring them to the appropriate committees is a good step and will hopefully make the committees do more substantial policy work than they are currently

On Jun 26, 2017 4:52 PM, "Kevin Nerwinski" <knerwinski@lawrencetwp.com> wrote:

Cathleen:

I am attaching a copy of a follow up police investigation (compliance check) which was done to get a better understanding of how various electronics and cell phone stores were handling a potential sale of a used cell phone by a walk-in customer. This was done in response to the letter we received from the association (CTIA....for wireless communication providers) requesting that our ordinance not include cell phone stores because they do not buy phones for cash.

Also, please let me know what you mean by *"it is clear that not all businesses in town were addressed nor their concerns."* Your response would be helpful to me to understand what may be deficient in the process to date. This is an ordinance with the stated purpose to regulate how second hand dealers conduct business to protect victims of theft.

Based upon your request to send this ordinance for review and comment by the Growth and Redevelopment Committee, I will ask Dave Roskos, Esq., to not do any further work on it until we receive the response from the committee.

Rachel,

I am a council member in Lawrence township, and I was just wondering what crime you were highlighting in the episode you are filming in town.

Since it seemed you were only doing a short shoot here is it just a stop along the way or did the crime occur in Lawrence.

Thanks for your assistance

Cathleen

Subject: Police in council meeting

Having a regular police presence (uniformed or not) in the audience silences residents and creates a disconnect with the community .

The preservation of an open meeting has time and time again been why council has refused a police presence in the council chambers on a weekly basis

We have spent a lot of money to make the dias safer and I continue to think a random drop by from police is a better deterrent then one plain clothes officer, who most residents would recognize anyway

Subject: Updates

A few things for the next time something like this happens:

Updates are your friend. Had you sent a text the moment the site went down we would have known you were on top of it and would already be able to say we are working on it

Anticipate problems: did we call to ensure the server could handle the anticipated traffic? Have someone in stand by monitoring it?

Don't bury the lead: the new info is the important stuff. "Here's some informational resources if you are concerned about last month's lead update" vs "click on our website to learn about lead in the water"

Updates are your friend a text update "the website is back" a minute after u know is expected, we shouldn't have to ask

A more personal note - I ask specific questions I don't want the background or to rehash I want that specific piece of info so I can answer the public's questions. I too don't want to get into the how or the why in the middle of a crisis I want to deal with it, make sure the public knows what's going on and then work through the issues afterwards so it doesn't happen again.

There's more to talk about but I wanted to make sure to send you at least this piece now.

thanks

Kevin,

I am very familiar with this project. A water leak at this location resulted in damage to a County owned culvert under the roadway. It was a very old structure and it took a long time for the County and TWW to agree on a solution. The contractor for TWW mobilized in mid-August to complete the work; however, once they excavated the area, additional damage was discovered. I believe they have modified the work scope and will begin again shortly. I am waiting to hear back from the County on the schedule to begin work. I'll let you know as soon as I hear back on the schedule.

Subject: FW: Problem statement 206 intersection
Attachments: NJDOT correspondence and problem statement.pdf

Hey Cathleen:

I just wanted to follow up with you regarding the issue of the Twp's efforts in trying to get the State to address concerns about the intersection of Franklin Corner Road and Lawrence Road. I am fairly certain township resident, Bob Kuser, will be attending the council meeting on Tuesday to state his opinion that the intersection is dangerous and the Township needs to do more to address it with the State. As a result, I just wanted you and the other council members to be aware of the attached (should a discussion take place) which, in summary, is that we presented a problem statement to the NJDOT in 2014, and the State replied in 2015 that it's evaluation resulted in the conclusion that it did not have the funding to address this type of congestion reduction problem.

Additionally and more recently, our Engineer and Lt. Drew have studied the intersection as well at my request (after meeting with Mr. Kuser and Mr. Radice) several times. Mr. Parvesse is of the opinion that adding a Left turn signal southbound on Lawrence Road (to turn onto Franklin Corner Road) (which is what Mr. Kuser and Mr. Radice want) will not alleviate traffic congestion, and most likely will increase it northbound on Lawrence Rd at the intersection (since the time added to accommodate the left turn signal will need to be added onto the northbound red light sequence creating more of a back-jam than there already is). They further believe that although data will support that the intersection presents significant traffic congestion issues, it does not show significant safety issues (i.e., issues that would compel the State and the County to move it up the list for major reconfiguration).

Lt. Drew has been working with the NJ DOT on this issue (he even drove with Mr. Radice and attended a meeting with a NJ DOT official) and, as a result, we have included a resolution in the agenda book requesting further studies of the intersection (using recommended language that may be more receptive to the State officials).

I hope you find this helpful and let me know if you need anything else on this issue. Have a great weekend.

Kevin,

I am aware you have other duties and I didn't ask for the report out I asked to be advised that the meeting is occurring, that requires a 10 second text or email. I said we both look unprofessional because I was blind sided when asked why I wasn't in attendance. I didn't need to be there but I do expect to know that meetings have been scheduled so we look like we are on the same page.

The meeting happened yesterday. It was a complete recycle of an event Lawrence Township sponsored several years ago at Mercer County Community College and spent time and effort getting to the conclusion that it was not appropriate to follow through with. I asked Jim Parvesse to go through his notes and provide me with a summary of what was done the last time so that when I informed you and the other members of council, it would have some substance behind it. I will provide you all with a summary shortly, and will get the answers to the other questions as soon as possible. I am sure you can understand that I did have other obligations yesterday and immediately reporting the results of a meeting that just occurred is not...unprofessional.

9D why was the change needed and why wasn't it in the specs?

H4 would these all be e-cycled at this weeks event?

Also in the future please provide me with an update when you schedule meetings with folks I forward to you. It prevents us both from looking uninformed and unprofessional.

Thanks

Cathleen

9D – (from Jim P.) The contract amendment for Top Line Construction is for supplemental items and final quantity adjustment. Project plans and specifications provide estimated quantities for a variety of bid items; however, the contractors are paid for the actual quantity installed. For this specific project the area of milling and asphalt tonnage were increased due to deteriorated roadway conditions. This roadway improvement was a NJDOT State Aid project so the plans were developed and approved back in 2016. In addition, after the roadway was milled, we discovered several inlets that were damaged and needed reconstruction prior to re-installing the pavement.

18 H4 – Broken items will be discarded on the 12th while other items will be considered for auction if they have value.

Subject: Pool Heat Exchanger

Morning All,

The temporary heat exchanger for the pool has been installed; all air bled out of the lines, and any perceived adjustment have been made. We'll know how well this temporary fix works within a day or so; as it begins to raise the temps in the pool, we will monitor the loop and operation for issues. If all goes well, we should be back to 100% by Monday 10/9/17.

I will keep you posted with any developments,

Kevin Nerwinski

Subject: Facebook

Someone has created a fake Lawrence Township Facebook page. can you please look into how to disable it.

While I would hope that most people would clearly identify it as a fake since it is established as a person's account and not as an entity or a municipality account, in order for people to not get fake information from an unreliable source I think we need to find a way to shut this down as quickly as possible and also to establish our own official presence so that we can direct people to the correct account.

I don't know why it's not working it's working on both my phones, iPad and computer
It has our logo but it's a personal page that has friends not an entity page that a business or government entity would have which gets likes and has different algorithmss that govern when it appears in a feed.
I would be equally concerned if this is a page started internally as it clearly shows a lack of understanding of social media.
Either way the page should be taken down and a proper page should be created

Facebook requires entities to have different pages. They periodically scrub pages that are using the wrong format and delete them and the entities loss all their friends
Also personal pages are not Google optimized and so won't be found on searches

Hi Kevin,

On a quick break, so will be brief, but wanted to bring you up to speed if we are to act on this unexpected opportunity.

This is the property I mentioned to you this morning. Could be a key (and unexpected) cog in a historical park to honor and interpret Colonel Hand and the delaying actions on January 2, 1777. Also, the Lincoln Highway and the Washington-Rochambeau Revolutionary Route National Historic Trail.
