Activity Number Reference: CDN220001
Case Activity Number: LSR220001

Dear Marc Selover,

This letter serves to advise that a Confirmed Discharge Notification form has been received by the New Jersey Department of Environmental Protection (NJDEP) for 17 NORTH MAIN STREET.

On May 7, 2009, the Site Remediation Reform Act (SRRA) was enacted. SRRA establishes criteria for the licensing of site remediation professionals who will assure that contaminated sites are remediated in accordance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E. SRRA authorizes the NJDEP to establish mandatory timeframes for the completion of each phase of remediation. These timeframes, as well as other requirements of the act, have been codified in regulations that became effective on November 4, 2009. The complete rule can be found at www.state.nj.us/dep/srp/regs/arrcs/arrcs_rule.pdf. N.J.A.C. 7:26C-2.4 identifies the requirements with which you must comply.

The person responsible for the remediation must retain a licensed site remediation professional (LSRP) within 45 days of the reported discharge. The retention of an LSRP can be completed using the NJDEP's online service found at www.njdeponline.com.

The August 2018 Amendments to the Administrative Requirements for the Remediation of Contaminated Sites (ARRCs – N.J.A.C. 7:26C-1.7) requires notification letters to be sent and/or a notification sign to be posted as applicable within 14 days prior to commencing initial field activities associated with the Remedial Investigation (RI). In addition, the municipal clerk of each municipality in which the site is located, the county health department, and the local health agency are required to be copied. Additional guidance regarding public notification can be found at www.nj.gov/dep/srp/guidance/public_notification/.

Sincerely,

A handwritten signature in black ink, appearing to read "Kirstin Hahn".
