October 31, 2018

Dear SDL Client:

Spatial Data Logic is delighted to have your municipality as a client. SDL takes a great deal of pride in maintaining an easy-to-use and enhanced product line. We continue to add new features to our modules and provide the highest level of support for our products.

This is our annual notice of our rates and services for 2019.

For our Enterprise License customers, this is an annual price subscription that can be locked in for multiple years with prepayment in advance. The subscription includes the licensing costs for the desktop, SDL Portal, SDL Mobile, SDL Citizen as well as support. Pricing is based on the number of computers where the desktop software is installed. Per User Licensing will be introduced with the launch of our new SDL Online service. There is an annual charge under 5 seats and for each additional towns you host on SDL Portal, SDL Mobile and SDL Citizen.

For the end of 2018, we will be introducing a new platform called SDL Sites. SDL will provide your towns website hosting for free with your paid enterprise license. There is a charge for the initial setup and conversion and additional optional services such as content management.

Technical Customer Support allows the users of the software to request telephone and online support between the hours of 9:00-5:00 weekdays, excluding holidays, and gain access to upgrades to all modules that they have procured. Customer Support is only available to users that have been trained on the software by an authorized SDL Trainer.

Our Training Center classes have been favorably accepted by the users who attended. As of July 2017, each of these paid training credits are good for up to 5 years and cannot be converted to onsite classes unless specifically noted. These classes are optional but highly recommended. New for 2019, we are offering a free training credit for each licensed user you have purchased good for the period of your subscription period. These will also give you access to our new Online Learning System (LMS) that we plan to launch in the late 2018 which will include online training classes, online webinars and a customer success center that will allow our end users to vote on ideas and features you are looking for in the software.

www.SpatialDataLogic.com

We continue to offer our SDL Hosting Services, where we can host your servers in our cloud based services and eliminate the need for local servers or upgrades to some of your networking or desktop clients. Please contact Sales about these services. Please be aware that the cost of the hosting services is in addition to your current licensing.

We have several new products in the works that will be offered as a part or an additional cost in 2019, such as our SDL Online Plan Review and SDL Online Workflows.

We will invoice you the month before the renewal date and payment needs to be made within 30 days. It is your responsibility to coordinate a quote from SHI and the PO needs to be in place prior to the renewal date.

We request that all purchasing agents send us your Pay to Play documents as well as any other purchasing documents at the beginning of the year or at least 3 months prior to the renewal date.

This will provide support from the date of renewal for each seat of software for a full calendar year of that date. We will not prorate or change the amount billed unless we are notified 90 days in advance of the renewal date, per our software license agreement.

Any services or requests outside of these services shall be deemed additional services and billed according to our standard rate schedules.

Should you have any questions or require additional information, please feel free to contact us via telephone at (732) 357-1280 or email at sales@SpatialDataLogic.com.

Very truly yours,
SPATIAL DATA LOGIC
