Notice of Violations and Order to Correct

March 12, 2021

Property Name: CAMDEN IRON & METAL- EMR
Address: 1521 S 2ND ST
Camden, NJ 08104

Registration No: CAMD15
Municipality: City of Camden
County: Camden
Inspector: Caraballo, Edwin
Inspected: 11/20/2020
State Registration: 0408-55664-001-01

Phone: _____ Type of Life Hazard Use: _____

YOU ARE HEREBY NOTIFIED that an inspection by the Office of the above office disclosed violations of the Uniform Fire Code (N.J.A.C. 5:70-1 et.seq.), promulgated pursuant to the New Jersey Uniform Fire Safety Act (N.J.S.A. 52:27D-192 et. seq.). The violations are specified on the accompanying "Violations Report" page(s).

YOU ARE HEREBY ORDERED by the FIRE OFFICIAL to correct the violations listed on the accompanying "Violation Report" page(s) within the time or by the date specified.

If a reinspection discloses that violations have not been corrected and an extension has not been requested and granted, you will be subject to penalties of up to \$5,000 per violation per day or as otherwise authorized by the Act and Bureau Regulations.

In ADDITION, the Act imposes liability on the owner for the actual costs of fire suppression where a violation directly or indirectly results in fire.

ADMINISTRATIVE APPEAL RIGHTS

YOU MAY CONTEST THERE ORDERS BY FILING AN APPEAL. The request for a hearing must be made in writing within 15 DAYS after receipt of this order and addresses to:

Camden County Construction Board of Appeals
c/o County Counsel (JAF/DB)
14th Floor City Hall
520 Market Street
Camden, NJ 08102

Copy to: City of Camden
Fire Marshal's Office
4 North 3rd Street
Camden, New Jersey 08102

In accordance with the rules promulgated under the Administrative Procedure Act (NJSA 52:148-1 et. seq. ar 52:14F-1 et. seq) an appeal request must sufficiently identify the decision or action you wish to appeal and the specific reasons forming the basis for your dispute, in order that a decision may be made as to whether your appeal constitutes a contested case.

You are advised that only matters deemed to be CONTESTED CASES, as defined by the Administrative Procedures Act, will be scheduled for a Hearing. If a hearing is scheduled, you will be notified in advance of the time and place.

You are also advised that the appeal to the Construction Board of Appeals must be accompanied by the fee of \$50.00 payable to County of Camden.

At a hearing, a corporation may be represented only by a licensed attorney, unless prior approval is given by the Office of Administrative Law.

EXTENSIONS

If a specified time has been given to abate a violation, YOU MAY REQUEST AN EXTENSION OF TIME by submitting a written request to the Fire Official. To be considered, the request must be made before the compliance date specified and must set forth the work accomplished, the work remaining, the reason why an extension of time is necessary and the date by which all work will be completed.

TAKE NOTICE THAT, pursuant to N.J.A.C. 5:70-2.10(d)2 an application for an extension constitutes an admission that the violation notice is factually and procedurally correct and that the violations do or did exist. In addition, the request for an extension constitutes a waiver of the right to a hearing as to those violations for which an extension is applied.

PENALTIES

Pursuant to N.J.A.C. 5:70-2.12, a violation of the Code is punishable by monetary penalties of not more than \$5,000 per day for each violation. Each day a violation continues is an additional, separate violation except while an appeal is pending.

ALSO TAKE NOTICE THAT, pursuant to N.J.A.C. 5:70-2.12A, When an owner has been given notice of the existence of a violation and has not abated the violation, that owner shall, in addition to being liable to the penalty provided for by N.J.A.C. 5:70-2.12, the owner shall also be liable for a dedicated penalty in the like amount.

A violation that is recurring justifies imposition of an immediate penalty without the necessity for an interval in which corrections can be made. A violation shall be deemed to be a recurring violation if a notice has been served within two years from date that a previous notice was served and the violation, premises and responsible party are substantially the same.

Claims arising out of penalty assessments can be compromised or settled if it shall be likely to result in compliance. Moreover, no such disposition can be finalized while the violation continues to exist.

Any penalties assessed are in addition to others previously assessed. Penalties must be paid in full within 30 days after an order to pay. If full payment is not made within 30 days, the matter will be referred to the ??????? Attorney for summary collection pursuant to the Penalty Enforcement Law (N.J.S.A. 2A:58-10 et seq.).

NOTICE

If you require guidance or advice concerning your legal rights, obligations or the course of action you should follow, consult your own advisor.

Number	Description	Abate by	U/A	U/A	U/A
1	Nature: Carbon monoxide alarms Code Section: N.J.A.C. 5:70-3 901.6.3 Description and Location: For all other use groups: Protection at the source - Carbon monoxide detection is required to be installed in the immediate vicinity of all sources of carbon monoxide. Sources of carbon monoxide are not defined in the UFC. Sources would include any process equipment that burns fuel, generators, any fuel-burning appliances as well as any portion of the HVAC system which could deliver carbon monoxide from the appliance to other spaces within the building. There are specific cases where the UFC exempts the installation of carbon monoxide detectors. These include: -Repair garages and similar spaces where carbon monoxide can be expected as part of the normal function of the space. If there are spaces adjacent to the repair garage portion of the occupancy, they need to be provided with detection. -In the immediate area of large drop battery charging. (These are areas where industrial powered trucks or equipment leave large batteries for charging) When there are occupied areas adjacent to the battery charging operation they need to be provided with detection. -In unconditioned spaces where the temperature is outside of the listing of the device or spaces that contain contaminants that might adversely affect the operation of the detection. In these cases, alternate protection should be considered, such as locating detectors/alarms in the conditioned spaces adjacent to the location of the source of CO. In addition to providing detection at the	04/06/2018

	source, the following additional areas need to be protected by 5:70 - 4.9(d)3i(4): -Spaces adjacent to the source of carbon monoxide. Carbon Monoxide Detection Installation All Use Groups Page 4 of 4 -Detection is needed in the immediate vicinity of any shaft, including but not limited to, stair towers, elevator shafts and ventilation shafts at the level of the potential source of carbon monoxide. -Detection is needed in the room at the first register or grill off the main duct trunk(s) from the HVAC equipment that is a potential source of carbon monoxide. -Detection is required in any story that is within two stories of a source of carbon monoxide. As stated in the rule, a CO detector or alarm must be provided near each source of carbon monoxide and the alarm must provide sound at a level that is 15dB above ambient sound. Building owners have a choice of simply locating an alarm near each source of CO, provided that the alarm provides at least 15dB above ambient sound in these areas. Placement of the alarms should be considered in order to meet the sound threshold requirement. Certain industrial and storage areas require special consideration. In warehouses, where internal combustion engine forklifts are used continuously, the source of CO is expected as a normal use of the space. Those uses should be treated similar to repair garages, and detection is required in occupied spaces that are adjacent to the area where the forklifts

	operate. In manufacturing facilities or other uses where ambient noise levels are high, alternatives to the requirement for alarms that are 15dB above ambient may be necessary. When ambient noise is at or greater than 105 dB, alternatives such as visual alarms should be considered. Detectors and Alarms: Carbon monoxide detectors must be listed in accordance with UL 2075. Carbon monoxide systems must comply with these rules and NFPA 720. Carbon monoxide detection systems must provide auditory and visual notification at the detector, control panel and remote annunciator. Combination fire and carbon monoxide detection systems are permitted. Carbon monoxide alarms must comply with UL 2034. Carbon monoxide alarms may be battery-operated, plug-in, or hard-wired. There is no requirement for fire department notification or building evacuation. These items should be part of the building owner's emergency preparedness plan. The UFC Bulletin 2003-3, Alternative #2 clearly provides guidance for detector locations that does provide appropriate CO protection not supported by the newly adopted rules that should be considered by the fire official through the variance request process. The installation of a new hard-wired CO detection system, or modification to an existing system would require a UCC permit.
