FORECAST FOR THE NEW JERSEY DEPARTMENT OF TRANSPORTATION

DISCUSSION: A few flurries remain possible for the northwest corner of the state through 1600 today. But with pavements above freezing, no impacts are expected to pavements. If flurries linger later, wetting of pavements may freeze tonight, but chances for this are very, very low. Dry weather is likely for Thursday. A few rain showers will move through Friday afternoon and evening. We may need to watch temperatures after the system leaves for chances of refreeze, otherwise no issues are expected. Better chances for rain come with the next system Saturday into Sunday.

WEATHER FORECAST: Partly to mostly cloudy and breezy today and tonight. Partly cloudy tomorrow and tomorrow night.

PRECIPITATION FORECAST:

NORTH REGION:

N1, N2: A few flurries possible through 1600 today. No accumulations on pavements. No precipitation expected tonight. No precipitation expected tomorrow and tomorrow night.

N3, N4: No precipitation expected today and tonight. No precipitation expected tomorrow and tomorrow night.

CENTRAL REGION:

C1: A few flurries possible through 1600 today. No accumulations on pavements. No precipitation expected tonight. No precipitation expected tomorrow and tomorrow night.

C2, C3, C4: No precipitation expected today and tonight. No precipitation expected tomorrow and tomorrow night.

SOUTH REGION: No precipitation expected today and tonight. No precipitation expected tomorrow and tomorrow night.

FORECAST FOR THE NEW JERSEY DEPARTMENT OF TRANSPORTATION

DISCUSSION: Dry weather will continue for the rest of today and tonight. The next chance for rain will come Saturday afternoon and evening, with chances continuing overnight before ending. Dry weather is expected for Sunday. Another round of rain will develop on Monday and end by Monday night, possibly ending as a little snow over the some northern parts of the state. Dry weather will return for Tuesday and likely continue through the rest of next week.

WEATHER FORECAST: Mostly clear today; increasing clouds tonight. Mostly cloudy tomorrow; cloudy tomorrow night.

PRECIPITATION FORECAST:

NORTH REGION: No precipitation today and tonight. Rain developing between 1500-1700 tomorrow, ending between 2200-0000 tomorrow night. Rainfall: .50"-1".

CENTRAL REGION: No precipitation today and tonight. Rain developing between 1400-1600 tomorrow, ending between 2300-0100 tomorrow night. Rainfall: .50"-1".

SOUTH REGION: No precipitation today and tonight. Rain developing between 1300-1500 tomorrow, ending between 0100-0300 tomorrow night. Rainfall: .50"-1".

SPECIAL STATEMENT FOR REGION(S): NORTH: N1/N2; CENTRAL: C1; SOUTH: NONE.

FORECASTER COMMENTS: ALL CLEAR - Some very occasional flurries may make it into the northwest corner of the state today. However, pavements are all above freezing and no impact to pavements is expected. Therefore an all clear is being issued. If however snow showers linger longer than 1600 today, there is a chance for wetting and freezing of pavements this evening/tonight. A new Special Statement would be issued if that scenario comes to fruition but is not expected.
