Re.: NJEDA Building Demolition Project – 10 Days Notifications Amendment No. 1 of the Green House Building

Dear Mr. Voorhees,

We, Tricon Enterprises, Inc. is currently on working on site at the above referenced project which comprises with environmental abatement, structures demolitions and site work.

One of the building structures that need to be demolished is Green House which we want to inform you that the structure of the green house was built entirely with glass panels and steel framing. Based on our field investigation and as built drawings that we received, we believe that the Green House building is more than 30 years old and it has been abandoned for a long period of time. Additionally, the Green House structure has been losing its integrity. Meanwhile, the glass panels are loosening and fall down from the roof. There are broken glass panels everywhere. This is an unsafe working condition that we encountered at this present time.

With that being the case, we determined that Wet Demolition must be taken place.

Enclosed you will find the 10 days notification of the Green House that we submitted back in October, 2020 and the amendment 1 of the Green House 10 days notification for your review and reference.

Once you reviewed, kindly let us know if it acceptable and approved. Then we will proceed accordingly.

If you have any question or require more information, kindly let us know as well.

Respectfully,

A handwritten signature in blue ink, appearing to read "Saifon Bips", is written over a horizontal line.

Saifon Bips
Tricon Enterprises, Inc.
