145 Crash Description/Narrative

V1 was traveling east on SR 33 East at Oxford Way, in the right hand lane. V2 was traveling west on SR 33 West, in the left hand lane. D2 was attempting to make a left hand turn into the parking lot of 2040 Corlies Ave. D2 advised he did not see V1 coming before beginning his left hand turn, and advised the traffic light at SR 33/Oxford Way was yellow at the time. D2 began to turn left, directly in the path of V1. V1 was unable to stop in time, and struck V2.

D1 advised he had just gone through a yellow light when V2 began to turn left directly in his path.

Several witnesses on scene (who wished to remain anonymous) advised V2 appeared to accelerate through the intersection, presumably in an attempt to make it through the yellow light.

The front of V1 collided with the front passenger fender of V2. There was disabling damage to both vehicles, as well as airbag deployments in both. NCOEM responded to the scene for fluid leaks from both vehicles.

Both vehicles were removed by Atlantic Coast Towing.

There was one reported injury; the front seat passenger in V1 had a complaint of pain in his abdomen. He was transported to JSUMC by NCFAS.
