Areas of Expertise

Our platform includes cybersecurity awareness training lessons, phishing simulations, dark-web credentials monitoring, policy/plan/procedure development, ongoing memos and awareness posters with relevant and time-sensitive security content. executive management, TeliApp can function as your virtual Chief Information Security Officer.

Additionally, if your organization has a subscription to a paid threat intelligence platform, our team will administer it on your behalf.

Government Microsoft Legacy to Cloud Infrastructure - includes developing requirements, site surveys, research, planning, implementation, management and administration. For government entities that wish to migrate to the cloud from legacy systems, network architecture and infrastructure. TeliApp has significant experience migrating to both Microsoft 365 and Google Workspace for Government.

Digital Succession Planning - includes detailed and guided tutorials for certain departments, which could, in part, avoid work loss resulting from a loss of key-human capital for whose knowledge and experience has not yet been completely transferred to a successor.

File Digitization - includes digitizing documents and storing them in the cloud with a conventional hierarchical folder structure, which protects irreplaceable documents and also enables easy file retrieval, using simple search tools. Unforeseen circumstances such as a fire, flood or other catastrophic event could easily result in the physical destruction of key non-digitized paperwork, such as maps in an engineering department.

Cloud Upgrades for Specialized Government Software - includes upgrading non-web-based software used by some departments, such as Edmunds GovTech and Mitchell Humphry's suite of products.

Separating Technology Systems - includes separating without downtime the technology systems used by Township employees from its emergency services counterparts, including Police, Fire, OEM and other emergency services departments so that Government employees have the flexibility to adapt to new, challenging environments and enable productivity for their team members.

Physical to Cloud Data Backup Migration - includes eliminating on-site data backup and replication systems and migrating them to cloud, which includes usage monitoring and developing the necessary security setup and configuration to cater to individual use-case requirements.

Software Training - includes any software in which we are fluent, and generally encompasses most municipal employees.

Needs, Goals & Commitment to Quality Management

Based on your request for proposal, we believe that we have a firm understanding of your needs and goals, and we are committed to your success. We are committed to our performance, our relationships with our clients, and providing our very best, 100% of the time. Working with TeliApp is about our capabilities as a creative and technical team as much as it is the end-to-end experience developed through our collaboration. Helping our clients succeed strengthens our relationship with them. As a business and as a team, we are incredibly competitive and progressive. Our attention to detail, our availability and level of customer service is unprecedented.

Over the last several years we've seen trends in social, mobile and cloud that are changing the way people work. Creative people want to develop solutions that take advantage of these trends. These solutions, which can require designing and developing software, conceiving new content, evolving a brand or marketing strategy, or changing its technology infrastructure can be applied to existing or new entities. Entities want to achieve these goals without losing any productivity output.

We believe that an entity's workflow and lifecycle methodology must be special and unique to their specific needs. Management teams must be able to continuously simplify workflow and spark the creative process so that the services produced and offered are intuitive, fluid and sticky. Any entity that functions on technology should always be aware of the latest communication, design and development methods to achieve this. These are just some of the ideologies that guide us. Balancing ideological convictions with real life practicalities calls for actionable intelligence, based on factual on-the-ground data and its resulting analytics, which we value equally as important.

Cost Proposal

Our rates apply regardless of whether or not multiple people are working on your account simultaneously.

- Normal Business Hours - \$125/hour for all on-site visits, in-person meetings, remote support, remote services and virtual meetings.
- Non Normal Business Hours - \$175/hour for all on-site visits, in-person meetings, remote support, remote services and virtual meetings.
- Expenses for travel include \$0.60/mile, and reimbursement for any modest lodging expenses required in connection with an emergency on-site visit.

Conclusion & Personal Thoughts

On behalf of my team members, thank you for the opportunity to be a part of this process. We believe that entities that depend on technology to function must have superior technological resources and have virtually-100% uptime to do so. With questions, comments, to discuss technology or with feedback, please feel free to email me at josh@teliapp.com, or to call me on my mobile number, which is 201 705 8457.

If given the opportunity, we commit to making ourselves indispensable.

An endorsement shall be provided that the policies shall not be changed or canceled prior to thirty (30) days after written notice has been provided by the insurance carrier directly to the Township.
8. During the term of its Agreement with the Township, the successful contractor shall be obligated to renew each and every insurance policy which may expire. In cases where a required insurance policy is cancelled or terminated during its term, the successful Bidder shall immediately procure insurance to replace such policy (or policies) and shall immediately provide

all insurance information required by the Township as proof that the cancelled or terminated policy has been restored or replaced. In the event the successful Bidder fails or refuses to renew its insurance policies, or the coverage is canceled, terminated, or modified so that the insurance does not meet the requirements of the successful Bidder's Agreement with the Township, such failure shall constitute default of the successful Bidder's Agreement with the Township.
