Re: NJDEP Public Notification Compliance Documentation
Former AT&T Bell Laboratories – Princeton Site
Block 40, Lots 14.01 through 14.05
330 and 350 Carter Road - Hopewell Township, New Jersey
ISRA Case No. E95517; NJDEP Preferred ID No. G000003219

To Whom It May Concern:

Pursuant to N.J.A.C. 7:26C-1.7, Langan Engineering & Environmental Services, Inc. (Langan) recently completed the two-year update of public notification activities for the former AT&T Bell Laboratories Site located at 330 and 350 Carter Road in Hopewell Township, New Jersey (the Site). The attached materials document compliance with the notification and public outreach required by the New Jersey Department of Environmental Protection (NJDEP):

- NJDEP Public Notification and Outreach Form
- Copy of representative notification letter to a property owner
- Copy of the public notification fact sheet
- List of recipients for the public notification letter

If you have any questions, please do not hesitate to contact Richard LoCastro at 215-491-6521 or Erik Person at 215-491-6567.

Sincerely,
Langan Engineering and Environmental Services, Inc.

Erik Person, PG

PUBLIC NOTIFICATION AND OUTREACH

Date Stamp
(For Department use only)

SECTION A. SITE LOCATION

Site Name: Former AT&T Bell Laboratories - Princeton Site

List all AKAs:

Street Address: 330 and 350 Carter Road

Municipality: Hopewell Township (Township, Borough or City)

County: Mercer Zip Code: 08540

Mailing Address if different than street address:

Program Interest (PI) Number(s): G000003219

Case Tracking Number(s) for this submission: E95517

Date Remediation Initiated Pursuant to N.J.A.C. 7:26C-2: 01/31/1996

State Plane Coordinates for a central location at the site: Easting: 428114.37 Northing: 556676.11

Municipal Block(s) and Lot(s):

Block # 40 Lot # 14.01 Block # 40 Lot # 14.02

Block # 40 Lot # 14.03 Block # 40 Lot # 14.04

Block # 40 Lot # 14.05 Block # Lot #

Block # Lot # Block # Lot #

SECTION B. NOTIFICATION INFORMATION

1. Indicate the type of Public Notification:

☐ Initial ☒ Update

2. Public notification was provided via: (Check all that apply)

Sign..... ☐ Yes ☒ No

Letter..... ☒ Yes ☐ No

Fact sheet..... ☒ Yes ☐ No

3. Were materials produced in a language other than English? ☐ Yes ☒ No

If "Yes," in what other language was notification prepared?

4. Were copies provided to municipal clerk, local/county health dept., and local health agency? ☒ Yes ☐ No

5. Did you provide an electronic copy of all required submittals? ☒ Yes ☐ No

6. Was public notification conducted using an alternate plan and is the rationale for this plan included? ☒ Yes ☐ No

See B.6 below

7. Was additional public outreach conducted due to the NJDEP's determination of substantial public interest? ☐ Yes ☒ No

B.6 - The NJDEP approved limiting the public notification letter and fact sheet to eight properties located within 200 feet of the Site that are nearest to the environmental issue in email correspondence dated July 9, 2009. Alcatel-Lucent has also voluntarily distributed the public notification and fact sheet to 30 properties located within 200 feet of the revised groundwater Classification Exception Area (CEA) that was submitted to the NJDEP in June 2017.

SECTION C. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATIONFull Legal Name of the Person Responsible for Conducting the Remediation: Alcatel-Lucent USA Inc.Representative First Name: Gregory Representative Last Name: GalassoTitle: Environmental Engineering ManagerPhone Number: (908) 307-2140 Ext: _____ Fax: _____Mailing Address: 600-700 Mountain AvenueCity/Town: Murray Hill State: NJ Zip Code: 07974Email Address: john.galasso@alcatel-lucent.com

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature:  Date: 6-19-17Name/Title: G. John Galasso/Env. Engineering Manager

SECTION D. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENTLSRP ID Number: 573801First Name: NicholasLast Name: De RosePhone Number: (215) 491-6510

Ext: _____

Fax: (215) 491-6501Mailing Address: P.O. Box 1569City/Town: DoylestownState: PAZip Code: 18901Email Address: nderose@langan.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with N.J.S.A. 58:10C-14, and N.J.S.A. 58:10B-1.3b(1) and (2).

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:☐ *directly oversaw and supervised all of the referenced remediation, and/or*☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

Copy of Representative Notification Letter to a Property Owner

June 20, 2017

John and Patricia Rieszer
1 Cleveland Road West
Princeton, New Jersey 08540

**Re: Fact Sheet and Notification of Ongoing Environmental Activities at the
Former AT&T Bell Laboratories - Princeton Site
330 Carter Road
Hopewell Township, New Jersey**

Dear Mr. and Mrs. Rieszer:

Alcatel-Lucent USA Inc. (Alcatel-Lucent) has prepared this letter and the attached Fact Sheet to provide an update of ongoing environmental activities at the Former AT&T Bell Laboratories - Princeton Site in Hopewell Township, New Jersey (the Site). This notification is required by the New Jersey Department of Environmental Protection (NJDEP) pursuant to New Jersey Administrative Code (N.J.A.C.) 7:26C-1.7.

The attached Fact Sheet provides a description of environmental issues at the Site and Alcatel-Lucent's ongoing remedial actions. The Fact Sheet also includes online resources that provide additional information regarding the constituents that have been detected in groundwater at the Site.

Contacts for Further Information:

Alcatel-Lucent has provided and will continue to provide copies of environmental reports to the Hopewell Township Health Department. If you have any questions about our ongoing remedial activities, please feel free to contact either me or the Licensed Site Remediation Professional (LSRP):

Alcatel-Lucent Contact:

Copy of the Public Notification Fact Sheet

Former AT&T Bell Laboratories – Princeton Site Hopewell Township, New Jersey

Fact Sheet

June 2017

This fact sheet has been developed by Alcatel-Lucent USA Inc. in accordance with the New Jersey Department of Environmental Protection's (NJDEP) Public Notification Requirements to inform the public about ongoing environmental remediation activities at the Former AT&T Bell Laboratories - Princeton Site.

SITE HISTORY

Western Electric Company (Western Electric), a predecessor to AT&T Corp., purchased the 192-acre site in 1957. The original parcel, comprised of undeveloped land or farmland, included a portion of the present day Farmhouse (also referred to as the Film Center). The Farmhouse was owned by the Princeton Film Center from 1948 to 1952 and by Meredith Engineering Company from 1952 to 1957. Western Electric expanded the Farmhouse in 1959, and constructed the main building and Wastewater Treatment Plant in 1961. Additional ancillary buildings were constructed in subsequent years. AT&T Corporation, and its predecessor, Western Electric, used the buildings for Research and Development (R&D) operations for the telecommunications industry. Lucent Technologies Inc. (Lucent) was formed from AT&T in 1996, and continued operations before departing the site in 2003. Lucent assumed responsibility for cleanup of the site pursuant to the requirements of New Jersey's Industrial Site Recovery Act (ISRA), which was triggered when Lucent was divested from AT&T. Alcatel-Lucent USA Inc. (Alcatel-Lucent) is the party presently undertaking cleanup of the site pursuant to ISRA Case No. E95517. The Former AT&T Bell Laboratories – Princeton Site is currently occupied by The Technology Center of Princeton.

SITE INFORMATION

Location: 330 Carter Road
Princeton, NJ 08540

DESCRIPTION OF ENVIRONMENTAL ISSUES

In 1980, AT&T discovered volatile organic compounds (VOCs) in groundwater samples collected from the supply wells at the site. With NJDEP oversight, AT&T conducted a hydrogeologic investigation, which led to the selection of the Film Center Well as a groundwater extraction point to remediate the VOCs in groundwater. The Film Center Well has been pumped continuously at an approximate rate of 10 gallons per minute (gpm) or higher since 1985. Operation of the Film Center Well and natural attenuation has resulted in a significant reduction of VOC concentrations in groundwater since 1985.

As part of the ISRA process, Lucent conducted a comprehensive investigation of environmental conditions at the site, which included an assessment of soil, groundwater, surface water, and sediment quality. Lucent has remediated soil and sediment quality impacts at several localized areas of the site and has obtained NJDEP approval of no further action for soil, sediment, and surface water quality issues. The only remaining environmental issue is groundwater quality impacts (primarily VOCs) that occupy an area of less than five acres (<3% of the site) in the southwestern portion of the site. The VOCs are believed to have originated from former septic facilities (cesspools and leach field) associated with the Farmhouse prior to its connection to the Wastewater Treatment Plant.

Continued ➡

Former AT&T Bell Laboratories – Princeton Site Hopewell Township, New Jersey

Fact Sheet

DESCRIPTION OF ENVIRONMENTAL ISSUES - continued

June 2017

Results from the most recent groundwater monitoring events (2016 and 2017) indicate two VOCs at concentrations exceeding the NJDEP Groundwater Quality Standards (GQS): trichloroethene (TCE) and 1,1-dichloroethene (1,1-DCE). In addition, 1,4-dioxane was detected at concentrations exceeding the NJDEP Interim Groundwater Quality Criterion (IGQC), which was lowered in November 2015 from 10 to 0.4 parts per billion (ppb). Alcatel-Lucent completed further assessment of 1,4-dioxane concentrations in groundwater through the sampling of monitoring wells and residential wells in 2016 and 2017. The highest VOC concentrations detected in groundwater in 2016 and 2017 were: 10 ppb for 1,1-DCE, 8 ppb for TCE, and 1.1 ppb for 1,4-dioxane. In addition to VOCs, sodium has also been detected in several low-yielding monitoring wells.

Applicable Groundwater Criteria (ppb)

Constituent	Federal MCL	NJ MCL	NJDEP GQS
TCE	5	1	1
1,1,1-TCA	200	30	30
1,1-DCE	7	2	1
1,4-Dioxane	NS	NS	0.4 ¹
Sodium	50,000 ²	50,000 ²	50,000

ppb: parts per billion

MCL: Maximum Contaminant Level

GQS: Groundwater Quality Standard

NS: Not specified

¹The listed value is a NJDEP Interim Groundwater Quality Criterion

²The listed Federal MCL and NJ MCL for Sodium is a secondary standard.

Under the ISRA program, Alcatel-Lucent has sampled 44 residential wells located within the vicinity of the site in partnership with the Hopewell Township Health Department. Based on the residential well sampling results, carbon filtration systems were installed at 13 residential wells located southwest of the site. Alcatel-Lucent has conducted semi-annual or annual groundwater monitoring and maintained the carbon filtration systems since 1998. Because the untreated water monitoring results have consistently met the NJ Maximum Contaminant Levels (MCLs) for many years, Alcatel-Lucent discontinued the carbon filtration systems at 4 of the residential wells in 2015. In response to the lowering of the 1,4-dioxane IGQC, Alcatel-Lucent sampled 28 residential wells during monitoring events completed between 2016 and 2017, but 1,4-dioxane was not detected in the untreated water samples at concentrations exceeding the NJDEP IGQC. TCE and 1,1-DCE were detected in 2 untreated water samples at concentrations exceeding the NJDEP NJ MCLs; however, both of these residences are equipped with POET systems. As required by NJDEP, Alcatel-Lucent has defined a Groundwater Classification Exception Area (CEA) to depict the on-site and off-site areas where VOCs have been detected in groundwater at concentrations exceeding the NJDEP GQS. NJDEP approved a Groundwater Remedial Action Permit (GW RAP) for the site on October 23, 2014. The Licensed Site Remediation Professional (LSRP) issued a restricted use site-wide Response Action Outcome (RAO) for the site on April 22, 2015. The CEA was recently revised to include 1,4-dioxane in the list of compounds and to update the lateral extent of the CEA as a result of 1,4-dioxane detections in the former sentinel monitoring well. A new sentinel well was installed in 2016 and the groundwater sampling results were below the NJDEP GQS and IGQC. The revised CEA extends off-site approximately 3,800 feet southwest from the Carter Road property boundary.

FUTURE ACTIONS

Operation of the Film Center Well groundwater extraction system has significantly reduced VOC concentrations in groundwater over time. As approved by NJDEP, Alcatel-Lucent will continue to operate the Film Center Well to address VOC concentrations in groundwater. In addition, Alcatel-Lucent will continue to monitor the groundwater quality in residential and monitoring wells, and will maintain carbon-filtration systems in off-site residential wells, as necessary. The Film Center Well will continue to operate as a groundwater extraction well as indicated in the GW RAP. Groundwater monitoring, residential well monitoring, and maintenance of the carbon-filtration systems will continue until VOC concentrations in the residential wells are consistently below the applicable NJ MCLs, NJDEP GQS, and IGQC.

Copies of all environmental reports are provided to the Hopewell Township Health Department.
