

PROPERTY ROOM CONSULTING, INC

“We rescue law enforcement property rooms”

Chief Michael S. Miller

Company Profile

Property Room Consulting Inc. is a professional corporate entity based in Egg Harbor Township, New Jersey that specializes in matters relating to law enforcement evidence rooms. Our client base is exclusively government agencies and our mission is to promote compliance with industry best practices through training, auditing, and systems/physical design.

Chief Michael S. Miller has long been regarded as an expert in the field and he has trained hundreds of Federal, State, County and local property custodians throughout the Northeast in evidence management since 2008, through a partnership with Benchmark Professional Seminars. In 2015 at the urging of many of his attendees, he founded Property Room Consulting Inc. with the purpose to bring his many years of experience out of the classroom and into the field, working side by side with the custodians as they bring their PE function into compliance. He is also authorized by Porter Lee Corporation to train new clients on their BEAST evidence management software solution.

After over 27 years in law enforcement including roughly 20 years supervising or commanding evidence, in May 2017, he retired to dedicate himself full-time to consulting with police agencies looking to improve or remediate their evidence rooms.
