

21.12-785

"Dear Requestor:

Your request for a list of all residential properties or land parcels with open code violations is hereby denied as there are no records responsive to your request. The New Jersey Open Public Records Act requires disclosure of documents and/or records that are made, kept or maintained on file within the City. The Statute does not require that the City create a new document for the sole purpose of responding to a request for information."
