L: Remarks

Units responded to a fire alarm activation at the above stated address. Upon the arrival of engine-1, its officer established incident command and the PAS-Tag in Point. At this time personnel stretched two preconnect hose lines, established a water supply and went to investigate a heavy smoke condition in the building. Personnel gained entry into the building using the key from the Knox Box, and encountered a working fire, where as the flames were rolling above their heads and across the ceiling. Second alarm was transmitted. Car-8 arrived, the battalion chief took over command and transmitted a 3rd then 4th alarm. Additional personnel went to the roof to ventilate, but while in the process of ventilating, the rear roof of the structure collapsed. All personnel were ordered out of the building, off the roof and via Emergency Radio Traffic and predesignated audible warning devices. A Personnel Accountability Report or (PAR) was requested. At the completion of the (PAR) all personnel were accounted for and personnel switched to a defensive operation using tower ladders. Additional units and personnel were requested from Middlesex County Fire Mutual Aide and two rehabilitation stations were established, one by Edison Fire Personnel and one by the STAR-Team. As additional units arrived, personnel were rotated through rehab and truck companies were set up on the corners of the building. Because of an inadequate water supply, a water relay from US Highway-1 was established by Middlesex County Fire Mutual Aide Coordinators, and 5-inch hose-lines were hand stretched into the fire ground to put additional Blitzer Fire Master Stream Appliances were placed into operation on the C-Charley Side and the D-Delta Side of the Building. PSE&G Gas and Electric were both requested to respond on a rush, because of the heavy fire load conditions that existed and were getting worse. Chief Latham took over command and assigned B/C Hook to Operation, and B/C O'Grady to Safety. Personnel were heavily engaged in fire fighting operations through out the night and early morning hours, until the fire was finally brought under control at approximately 0200 Hrs. A damage assessment of the structure performed by Edison Fire Official Tim Morley and myself placed the building at roughly 95 % to 100% heavy fire, water and smoke damage. The roof of the structure was severely compromised by the heavy fire load and eventually collapsed in multiple locations. All tower ladders were shutdown and switched out with other mutual aid tower ladders accordingly. Personnel from Edison PD, Edison Fire Prevention Bureau, The Middlesex County Fire Marshal Office, and The Middlesex County Prosecutors Office were on scene and started to conduct an origin and cause investigation and photograph the scene. PSE&G Electric and Gas arrived on scene and its personnel secured the electric and gas service to the structure. Furthermore, Middlesex Water Company arrived on scene and its personnel secured the domestic water supply to the structure. Edison Township OEM Coordinator made arrangements for fuel truck to come to the scene and replenish the fuel in all FD vehicles at different intervals. At approximately 0845hrs, personnel were relieved from duty by the oncoming shift, they gathered their equipment, and they were returned to their respective stations. Two portable sanitary toilets were delivered to the scene by Johnny on The Spot to be used by suppression, and investigative personnel. After briefing the relief battalion chief on the continuing suppression activities, ongoing investigation activities, personnel, and resources, Incident command was transferred to Acting Battalion Chief Richard P. Campbell. Two tower ladders and two engine companies were still in operation cooling down hotspots when this was office was relieved and left the scene, and returned to the firehouse. During my duration as incident commander and then operations chief, no one reported any injuries. Added March 26, 2014. Mutual aid companies operating on scene and stationed at Edison Fire Stations during the fire: Metuchen, Avenel, South Plainfield, Jamesburg, East Brunswick, Iselin, Colonia, Hopelawn, North Stelton, Cheesequake, New Brunswick State of New Jersey EMS Task Force Mass Casualty Unit from Middlesex County, North Brunswick, River Road. Additional investigative agencies on scene March 23, 2014. New Jersey State Police Arson and Bomb Unit. Federal Bureau of Alcohol, Tobacco and Firearms (ATF). O'Neil Associates Private Fire Investigators for The Edison Board of Education insurance carrier. Subsequent information provided by investigative agencies at the conclusion of the systematic origin and cause investigation, and released by the Middlesex County Prosecutors Office places the area of origin in the custodians room located on the B-Side of the building. Moreover, the cause of the fire was determined to be accidental and related to a discarded cigarette in a plastic trash receptacle in the room of origin. No further information was added to this report on March 26, 2014, however, if more facts are reported or discovered in the coming days, and weeks the report will be amended accordingly.
