RISK-BASED INSPECTION REPORT

Additional Remarks

2/17/21 Inspection

Establishment offers a full menu with catering (at this time there are 4 food prep rooms); Risk III

A copy of Executive Directives for both Indoor and Outdoor Dining are issued at this time.

Foods on display should be removed and replaced every 4 hours to prevent growth of microorganisms, with the exception of bread-only products.

2nd basement walk-in is currently used for dry storage, not refrigeration.

* After review and discussion with the owner about all violations identified upon this inspection, 60 days is furnished to correct the violations, as described. Tentative Reinspection date is April 16, 2021.

RISK-BASED INSPECTION REPORT

Fail Notes Summary

Fail Code	Fail Text
6. Handwashing facilities provided in toilet rooms and prep areas; convenient, accessible, unobstructed.	
6.7(a)	- There are 2 Kitchen food prep areas (both in use at this time) and a Waitress station with no hand wash sink readily available. The only hand wash sinks are at the front counter and in the bathroom. Recommend adding hand wash sink in convenient location to all food preparation areas, as reviewed with the owner. - In the basement, there are 2 large rooms set up with prep tables, mixers, a sandwich press and refrigeration, but no hand wash sinks in the basement. This is reviewed with the owner for correction. RECOMMEND: Moving all food prep activities to one room and adding a hand wash sink in this location next to the mop sink. The other large room can be turned into a dry storage room. NOTE: Due to this large problem, And after discussion with the owner about all violations, 60 days is furnished to correct these violations as described.
8. Direct bare hand contact with exposed, ready-to-eat foods is avoided.	
3.3(a)2	Observed counter worker plating pizza for customers to eat and packaging RTE food, both with bare hands. This is reviewed with the worker directly and corrective action that must be taken (wear gloves, use deli paper or use utensils to handle Ready To Eat food).
14. Food contact surfaces properly cleaned and sanitized	
4.6(a)	Equipment such as a slicer in the basement food preparation room have excessive soil/ dust/ debris. Food contact equipment must be maintained clean. Recommend: wash/ rinse, sanitizing and air drying all parts before bagging.
17. COLD HOLDING: PHFs maintained at "Refrigeration Temperatures" (41°F)	
3.5(f)2	Pizza station sauce, cheese and toppings are found outside of refrigeration at 52 degrees F with no one actively using them at this time. Promptly return all foods that require refrigeration to refrigerator after use to maintain temperature control. COS
21. HOT HOLDING: PHFs Hot Held at 135°F or above in appropriate equipment.	
3.5(f)1	2 different red sauces are found at 105 degrees f and 109 degrees F in the steam table. Cook improperly placed cold sauce in steam table without cooking or properly reheating it first. COS Both sauces are removed fro proper reheating, then returned to the steam table.
27. Food protected from potential contamination during preparation, storage, display.	
3.3(q)	Both food and beverages are found stored on the floor. All food and beverages must be stored at least 6 inches off the floor.
3.3(r)	white-colored sewerage pipes in the basement are unshielded and are above Food contact supplies such as pizza boxes and food trays. Either move food/ food-contact supplies away from these areas or provide shielding below these pipes to prevent any leaks from impacting food and food contact supplies and equipment.
3.3(z)	Improper staging of clean pots directly on top of grease trap. Poor storage location; store food contact equipment in a clean and cleanable location.
40. Materials, construction, repair, design, capacity, location, installation, maintenance.	
4.2(h)	Improper use of paper and cardboard to line shelves. These materials are absorbent and they are not cleanable. Remove all.
4.5(a)	Basement walk-in door handle is missing.
44. Food and non-food contact surfaces properly constructed, cleanable, used.	
4.6(c)	- Stand up freezer closest to the rear door in the kitchen and stand up freezer in the basement have excessive ice build up and require defrost. - The inside of the ice machine has both dark-colored mold-like growth on the inside and light-colored soil build up or deposits. Requires cleaning.

RISK-BASED INSPECTION REPORT

Fail Code	Fail Text
4.6(j)	Soil and or dust accumulation in walk-in fan covers is heavy. Requires cleaning. This is important because open foods are cooling inside the walk in.
48. Toilet facilities are adequate, properly constructed, properly maintained, supplied and cleaned.	
6.6(f)	Bathroom lacks a functional self-closing door mechanism.
49. Design, construction, installation and maintenance proper-floors/walls/ceilings.	
6.2(a)	- Wall behind the 3 compartment sink has peeling paint and wall is in disrepair; absorbent and not cleanable. Requires repair and sealing to make is smooth, cleanable and non-absorbent. Recommend installing something durable to prevent further damage at the wall above and behind the 3 compartment sink such as FRP. In the basement rooms where food is stored or prepared, floors, walls and ceilings must be smooth, easily cleanable and non-absorbent. The ceiling is unfinished drywall and spackle. The walls are unfinished cinder block and the floor is unfinished cement. Seal all areas.
50. Adequate ventilation; lighting; designated areas used.	
6.2(i)	Some basement lights are unshielded.
6.3(a)	Some basement lights are not fully working or inoperable and the area is dim.
51. Premises maintained free of litter, unnecessary articles, cleaning and maintenance equipment properly stored; and garbage and refuse properly maintained.	
6.5(f)	Mop not hung up to dry properly after use.
