On Tuesday night, October 18, 2016, complainant had dinner at the Rainbow diner. She bought the leftovers home and the next night as she was having them, she found what seems to be the skeleton of a rat or other animal in her mixed vegetables. She has photos.	

Nature of Complaint

Complaint Investigation Narratives

<u>12/22/2016</u> Narrative Date	Original narrative lost. Complainant had what appeared to be a bone fragment (vertebrae) of a small animal. She stated it was found in the mixed vegetables. The vegetable product in question comes in 4lb bags. Very little prep is done by the Diner staff; it is essentially a 'heat and eat' product. It is likely the bone fragment was present in the product as received by the Diner. The facility had a few other issues that this
<u>Larry Newman</u> Narrative Author	Inspector requested be resolved at time of site visit: Bare hand contact with RTE Improper food storage. Unable to verify the suspect bone fragment was the result of improper food handling at this facility. No cause for further action.
NO CAUSE FOR FURTHER ACTION AT THIS TIME.	

☒ Final Entry: NO CAUSE FOR FURTHER ACTION AT THIS TIME.
