Complaint Investigation Narratives

Arrived on site at approximately 1130 hours. No insects were seen at this time on the coffee counter as indicated by the complainant. However, in the garbage can underneath the coffee station an insect was seen but had moved too quickly to determine its type. No other insects could be found about the area or within the store itself. The owner was informed to monitor and contract professional help if ever necessary.

Because this establishment exists within a small strip mall, a visit to the neighboring establishment was also made. The food establishment next door has not had any recent issues concerning insects or pests. Act Fast Pest Control is contracted by this establishment to inspect and remedy any issues found. This company was on site the previous day in which it was determined that no pest issues existed.
