06/11/2016 17:30:26 bwilliams Narrative: complainant stated she parked her car and went inside walmart for about 10 minutes. when she came back to her vehicle, she noticed someone had sideswiped her vehicle. she stated she called the police. after speaking with the complainant, I responded to security office and observed surveillance footage. the footage shows victim vehicle pull into a parking space next to a silver sedan. the driver gets out and goes into the store. she then returns about 10 minutes later and noticed the damage; however based on the footage, the vehicle next to her never moved. I was then able to speak with her and advised her the hit and run did not occur in walmart parking lot in brick. I asked where she was at prior and she advised she was at a car wash neat DMV in Lakewood. She advised it may have occurred there, but she didnt notice it because when she went into her car she came from the rear and walked alongside the drivers side, where the damage was located. because of this, she did not notice the damage. She was advised to respond to Lakewood PD if she needed to file a report, because one could not be done here.
