| All Dell servers now come with a 1/10GBase-T network port. The agency must have a 1Gbps or 1000Base-T switch at a minimum. These servers will not work when plugged into the old 10/100 Base-T switches. These 10/100 Base-T switches will need to be upgraded in order to use the new Dell Servers.                                                                                         |                                           |           |             |             |            |      |          |     |
| Please note that the Server listed on this quote ships on a pallet and a loading dock is required to offload the equipment. If you do not have a loading dock, please let us know prior to placing the order, as we will need to utilize a carrier with the proper equipment to offload the pallet without a loading dock. Orders will not be processed without confirmation from the Agency |                                           |           |             |             |            |      |          |     |
