145. Crash Description/Narrative

On December 11, 2021, at approximately 2115 hours, I (Ptl. T. Berkeley 318) responded to the intersection of Route 70 and Route 88 for a report of a minor motor vehicle crash with no reported injuries. Upon arrival, I met with both subjects in an adjacent parking lot (856 Route 70), safely out of the roadway. Both subjects stated they were not injured.

I spoke with the operator of vehicle 01, she advised me of the following events. She was in the left lane of travel, and the light was red. She "inched up "because the light was about to turn green and struck the rear of vehicle 02.

I also spoke to the operator of vehicle 02, and she advised me of the following events. She was in the far left lane of travel and stopped at the light, and her vehicle was struck from the rear.

I investigated the damage to both vehicles. My investigation revealed the following damage, on vehicle 01, no damage on the vehicle's body was discovered. Light markings and scratching were found on the front license plate bracket mounted on the vehicle's front bumper. On vehicle 02, no significant damage was found to the rear bumper.

Station: — Case No: 2021-00082665

145 Crash Description

There were scratch marks on the rear bumper near the vehicle seniors.

After totaling my observations of both operator's statements and my on-scene investigation of the vehicle damage, I found the operator of vehicle 01 to be at fault. Both subjects were advised on obtaining a copy of the accident report. I then cleared from the scene with no further police action taken. My body-worn camera was activated for the entirety of the incident.
