145 Crash Description/Narrative

Driver #1 stated she was southbound on Hooper Ave in the right travel lane. She stated that ahead of her, two vehicles were stopped and pulled off to the side of the right lane. She then changed lanes to the center travel lane. She stated that moments after changing lanes, Vehicle #2 changed lanes from the left travel lane, into the center lane, striking her vehicle.

Driver #2 stated she was traveling southbound on Hooper Ave in the left travel lane. She stated that she intended to proceed straight through the intersection with Route 37, so she had to change lanes into the center lane. She stated she changed lanes and was established in the lane, when Vehicle #1 changed lanes from the right lane, into her vehicle.

Based on the conflicting statements and no independent witnesses, this Officer was unable to determine if either vehicle had already established themselves in the center lane prior to the crash, or if they both changed lanes simultaneously.

The attached diagram is for conceptual purposes only, and not designed to place greater fault on either driver.

145 Crash Description/Narrative

Vehicle #2 was eastbound on Corporate Circle, stopped at the stop sign at the intersection with Industrial Way North. While stopped, Vehicle #1 attempted to turn onto Corporate circle, and struck Vehicle #2 head-on.

Vehicle #1 is a school bus, owned by the Toms River Regional School district, and was transporting multiple students to after school activities. Driver #1 stated he was northbound on Industrial Way North, and was attempting to make a left onto Corporate Circle. He stated that prior to turning, he never saw Vehicle #2 at the intersection. Driver #1 stated that at the time, there was rain water on his windshield and that the corners of his windows had gathered fog/condensation, thus obstructing his view of Vehicle #2 leading up to the crash.

The location of the accident showed that Vehicle #1 executed a "tight" turn at the intersection, encroaching on Vehicle #2's portion of the roadway. As a result of the investigation, Driver #1 was found to be at fault. No injuries were reported on scene.

****Vehicle #1 is self insured****

145 Crash Description/Narrative

On 10-03-19, at approximately 1650hrs, I responded to the above listed address for a crash between vehicle 1 and vehicle 2. Upon my arrival, I observed both vehicles in the private parking lot of 522 Lakehurst Rd. The driver of V1 stated that he was n/b on Lakehurst Rd. and in the left lane. He observed V2 in the right lane and assumed that V2 had to yield to him, although there were two separate lanes of travel (double lane road). He then turned (right) into the parking lot from the left lane and V2 struck him from behind, causing his vehicle to slide, hit a curb and come to rest in the parking lot.

The Driver of V2 states that he was in the jug handle for Lakehurst Rd. n/b. He yielded at the end of the jug handle and did not see a vehicle next to him, so he began to accelerate into his lane of travel (right lane.) He drove approximately 100 ft in the right lane and V2 turned right in front of his vehicle and he was unable to avoid striking the rear of V1.

I reviewed the in-car video from the dashboard camera of V2 (Toms River Police Dept vehicle 186) and it shows V2 yielding at the end of the jug handle. V2 then accelerates at a normal rate of speed in the right lane of travel. The video then shows V1, which also appeared to be traveling at a normal rate of speed but faster than V2, abruptly turn in front of V2 in an attempt to enter the parking lot from the left lane. V2 then "taps" the rear of V1, which caused it to spin and hit the curb.

The video was attached to the file of this report and has been archived in the TRPD servers at District One. Injuries to the passenger's of V1 were documented above.

145 Crash Description/Narrative

Driver #1 stated that prior to the collision, she had traveled south on Northampton Blvd, and had made a left turn onto Route 37E, into the right travel lane. She stated that as she was turning she lost control of her vehicle, due to the wet roadway. She described her vehicle as hydroplaning. While her vehicle was out of control it spun and the front of her vehicle struck the concrete dividing median. She was then able to gain control and pull off to the shoulder of the roadway. No injuries were reported on scene. No other vehicles were involved.

As a result of the investigation, Driver #1 was found to be at fault.
