135 Crash Description

Driver of vehicle #1 states she pulled into a parking space, placed her foot on the brake pedal, and her vehicle lunged forward. The vehicle jumped the curb, contacted a parked car on the right, and stopped after contacting the building in front of it.

Driver stated the vehicle didn't feel right as she was driving.

I could not determine weather the vehicle had a mechanical/accelerator issue which caused it to lunge forward, or if the driver placed her foot on the accelerator pedal instead of the brake, causing it to lunge forward.

Driver complained of pain to her chest, but refused medical attention.

The tow truck driver entered the vehicle to move it behind the tow truck. The tow truck driver experienced no problems with the brakes or accelerator pedals. The car moved and stopped without any problems.

Brick Township Building Department responded and checked the damage to the building. Inspector determined it was safe.
