145. Crash Description/Narrative

Vehicle 2 was traveling south on Coolidge Dr. and upon entering the intersection with Rt. 88 on a green signal, it was struck by vehicle 1 who was east bound on Rt. 88 and failed to observe the red traffic signal. Driver 1 stated that while traveling east on Rt. 88, he had difficulty determining the color of the traffic signal due to sun glare and just followed the vehicle in front of him. Upon entering the intersection, he collided with vehicle 2. Driver 2 stated that once he observed his traffic signal turn green, he started into the intersection and was stuck by vehicle 1. He further stated that vehicle 1 was nearly struck by a north bound vehicle who was also entering the intersection on a green signal. During the investigation, it was determined that based on the point of impact more than half way thru the intersection, vehicle 1's traffic signal was red for several seconds before the crash. A post crash observation of the intersection's traffic signals showed that the sun glare on the face of the traffic signal was present but it did not degrade it's intensity to the point of being unable to determine it's color. The main contributing factor for the crash was driver 1's failure to properly observe the traffic signal and was issued a summons, #E19000206, for failure to observe a Traffic Control devise 39:4-81.
