Subject: Outdoor water foe Summer

Morning,

I have noticed that the hoses from outside have been removed. During the summer the children play in small pools or use attachable toys, we use them for fire safety when we grill, some people don't have air-conditioning and will just sit outside knowing there's cool water near by. I have a small garden in which I can carry water from inside my home and take care of but for 9 years it has been easier to use the hose. It's cold water! I called the office today and asked why they where removed and the receptionist didn't know why and forwarded me to your voicemail. I did leave a message and am attentively awaiting your call.

Thank you
Weaver Street Resident
