Subject: Turf Field at CMS

Good Morning,

I am writing to express my deep concern about the decision-making process surrounding the Turf field at CMS.

A potential agreement that would result in handing the field over to the town was discussed in a committee meeting of the Board of Education a second time in as many years.

This email is not about the merits of such an agreement - I have many questions but need more information about what this is about, **which is true of almost every resident as it relates to this matter.**

This matter is of significant public interest. I do not recall this matter being discussed in any of the Town Council Meetings this year. This matter was not brought up by the Finance Committee or any member of the BOE at the last meeting during the updates - despite numerous other topics that were minor in comparison, taking up time.

This may very well be an excellent agreement/idea but the process surrounding it will contaminate the discussion surrounding a potential transfer right from the start.

I am asking all of you, The Mayor, Town Council, and Board of Education Representatives, to publicly discuss this and other matters of potential significance **as they occur in committee meetings outside the public eye.**

This approach will only benefit the respective positions surrounding this decision as it would focus on the agreement's merits instead of the secrecy surrounding it.

Board of Education Representatives: I will momentarily accept the argument that having every discussion in the public sphere, as the Town Council, would lead to an apocalypse. So here's a solution: **Video tape all committee meetings of the BOE and publish them on the website.** If this is about efficiency and not making decisions away from public view, then this change should represent no problem. You can also invite the public to sit and observe Committee Meetings. **This allows you to keep the current structure while improving transparency.** The township records and publishes its committee meetings, why can't the BOE?

Town Council Members: You all do a decent job of putting stuff out there (comparatively speaking), but why can we throw out "Happening in the Heights" Videos yet are still waiting on recordings of the last Town Council Meeting?

You are **stewards of the public's resources, not owners.** The public has a right to add their voice on these matters early on. **They are paying for it, and these things exist for their benefit and use.**

A political appointment made by someone in power or membership in some organization should not give anyone more access to Committee Meetings or important decisions than any other tax-paying resident or parent.

I promise that if you change your approach, decisions will take longer, **but they will be better decisions.**

The public will have more confidence in them - as long as you evaluate and respond to their feedback honestly instead of reacting to it defensively.

Please begin to present on this issue and others publicly and transparently during public meetings.
Please tape and/or allow public access to committee meetings.

Respectfully,
John Migueis
