| ZA-20-517    |       | Notes: Zoning Application: ZA-20-517<br>Tree Removal<br>We have a large oak tree that is dead which needs removal asap as it is directly next to our house. I believe it is 50 feet and all the leaves on the tree have shriveled up / browned, but have not fallen off. All 3 companies that I received quotes from (Redwood, Pine Valley and Cascade) confirmed that it must be taken down particularly given the risk of falling on the house as it is already leaning in that direction.<br><br>Cascade will be doing the work and are scheduled to complete the job on October 1st. Please approve asap! I have attached two pictures of the tree. |                                |          |                |           |   |

| ZA-20-542    | Notes: | Zoning Application: ZA-20-542<br>Tree Removal<br>We are proposing to remove all the trees and shrubbery from the back of the building and replacing them with 10 ft. Arborvitae Green Giants instead as the current trees are dead and covered in vines/poison ivy. We also intend to remove 5 trees that are near a retaining wall on the south side of the property as those trees are causing the retaining wall to lose its structural integrity. Most of those trees are actually causing the retaining wall to bulge.<br><br>We need permission to remove and replace the trees/shrubbery mentioned above and a surveyed map shows with big red Xs which trees are to be removed. |                                            |         |                |      |   |

## INSPECTIONS LOG

| ZA-20-700    |       | Notes: Zoning Application: ZA-20-700<br>Tree Removal                                                                                                                                                                   |                                            |           |                |      |   |
|              |       | We have four, perhaps five Ash trees in my backyard I would like to have removed. I have had several Ash trees already die on my property and would like to take these down before they also die and become dangerous. |                                            |           |                |      |   |
|              |       | One tree I thought was an Ash but now that I look at it again, it might be a maple? If this is not an Ash, we will not remove it as we like the tree cover and are already upset to lose all these Ash trees.          |                                            |           |                |      |   |

one massive tree in the front yard is very close to the house and has immediate danger of hitting the house if not being taken care of quickly  
Tree Application

### INSPECTION RESULTS - TREE REMOVAL PERMIT

Spoke to homeowner on-site; one 30" ash tree front yard center and one 32" dead tulip rear yard right. Both trees approved for removal.

Removal fee due for the ash tree, \$10.00. An email with link to pay the fee on-line will be sent prior to the permit being issued.

## INSPECTIONS LOG

| ZA-21-276    |       | Notes: Zoning Application: ZA-21-276<br>Tree Removal<br>There are 2 evergreens that we have been watching and assessing for health. Our arborist recommends removing the 2 evergreens on either side of the driveway. They are in declining health, and we want to have them removed before they come down professionally instead of bringing down wires.<br><br>Are they close enough to the road for their removal to be a town responsibility?<br>Do you need the estimate from the arborist?<br><br>INSPECTION RESULTS - TREE REMOVAL PERMIT<br>Spoke to homeowner on site. Two spruce trees each side of driveway approved for removal. The township does not claim ownership of any evergreen trees located in the road right of way. The two evergreens are approved for removal.<br><br>An email with link to pay permit fee on line will be prior to the permit being issued. |                                |         |                |      |   |

| INSPECTION RESULTS - TREE REMOVAL PERMIT<br>Both trees approved for removal. The front yard maple tree requires a permit fee of \$10.00 The rear yard oak tree has been determined dead and no fee is required to remove.                                                                                                                                                                                                                                                                                                                                                                                   |       |                                                                                                                                       |                                   |         |                |      |   |
| Note:<br>1. The rear yard oak tree is located in a 40' wide drainage easement and very near to the creek. All debris from the tree removal shall be removed from the drainage easement. Upon inspection yesterday, debris (grass clippings, leaves, wood, branches etc.) have been deposited in the easement very near to the base of the dead oak. No debris shall remain after the tree is removed!<br>2. The front yard maple tree is not a street town tree and is located on private property.<br>3. An email with a link to pay the permit fee on-line will be sent prior to the permit being issued. |       |                                                                                                                                       |                                   |         |                |      |   |
