Mr. Hector Olmo
Borough Administrator
Borough of Wallington
24 Union Boulevard
Wallington, NJ 07057

RE: Response to Request for Qualifications: Library Board Architect

Dear Mr. Olmo:

DMR Architects is pleased to provide this proposal response to the Borough of Wallington's request for a Library Board Architect. Attached please find our qualifications which we feel the Borough will find more than adequate to fulfill any projects required under this contract.

DMR is in its 28th year of providing professional architectural services for municipalities throughout the State of New Jersey. With a staff of approximately 40, we specialize in the design and construction of public and private facilities. DMR has extensive experience in the planning, programming, design and construction of a myriad of projects involving renovations, additions and new construction on the municipal and governmental level.

DMR's public work experience throughout the State of New Jersey includes projects of all sizes and scopes. Some of our public experience includes the new Bergen County Public Safety Operations Center; the conversion and renovation of a 340,000 square foot former pharmaceutical building into the administrative headquarters for Hudson County; the renovation of an existing vacant wing of a high school into a Senior Citizen Center for the Township of Willingboro; a new municipal complex, including a library, in the Township of Montgomery; and upgrades to the North Arlington Library.

We look forward to establishing a relationship with the Borough of Wallington and the chance to provide quality services that will benefit your municipality.

Please do not hesitate to contact me should you require additional information.

Sincerely,

Lloyd A. Rosenberg, AIA
President & CEO

QUALIFICATION STATEMENT

DMR Architects, P.C.

777 Terrace Avenue, Suite 607, Hasbrouck Heights, NJ 07604

201-288-2600 P 201-288-2662 F

Key Contact: Lloyd A. Rosenberg, AIA, President & CEO, lloyd@dmrarchitects.com

FIRM OVERVIEW

DMR Architects, P.C., is committed to redeveloping and revitalizing communities. For 28 years, DMR has built its reputation as a premier full-service architectural, planning and urban design firm dedicated to progressive, innovative and sustainable, high-quality design. DMR specializes in a diverse range of project types and services, including architecture, urban planning, landscape architecture, sustainable design, interiors and construction administration for all market sectors.

Founded in 1991 under the leadership of Lloyd A. Rosenberg, DMR has grown from a three-person operation into a 40-member team of distinguished professionals who have completed projects around the world. With more than 55 years of experience as an architect, planner and business manager, Lloyd continues to lead the firm along with the support of his five partners.

UNDERSTANDING OF YOUR NEEDS & SUBJECT MATTER

As DMR has served the public sector for more than 28 years, we are familiar with the processes of municipal and county work, and have a thorough understanding of the needs of our clients to upgrade and maintain facilities, while remaining fiscally conservative. DMR has provided professional services within the County of Bergen and the surrounding area for our entire history. DMR has provided just about any service a public entity client may require, including many library projects, as well as similar education and community spaces.

Regarding the Borough's structure, we are experienced in working with all forms of government, and are confident we can meet the requirements of this type of work. We have completed many successful projects in other municipalities of similar formats. In addition, a member of our staff, Colleen Mahr, Director of Business Development, is also a Mayor and the Immediate Past President of the New Jersey League of Municipalities, further complementing not only our understanding of municipal government, but also the overall municipal services we provide. We believe we have the local knowledge necessary to provide quality services under this contract.

QUALIFICATIONS AND AVAILABILITY OF STAFF, SUPPORT STAFF & EQUIPMENT

As a premier architectural and planning firm in the New York metropolitan area, DMR has assembled an experienced team of seasoned professionals. The firm includes licensed professionals in architecture, landscape architecture, interior design and professional planning, in addition to Leadership in Energy and Environmental Design (LEED) accredited professionals. More than half of our staff members have one or more of these certifications. License numbers for our proposed professionals are included on the resumes in Section 2.

In addition to access to the latest technologies and equipment, these professionals are well supported and backed by a staff of junior architects and designers, CADD technicians and administrative personnel, as well as the deeper DMR team, which includes professionals with backgrounds in economic development and community outreach, municipal government, real estate, project finance, engineering, and land use, as well as in-house general counsel. The knowledge and capacity of our staff ensures that we have the resources and personnel available to provide quality and timely services. We will be able to accommodate any required meetings of the Borough.

QUALIFICATION STATEMENT

OVERVIEW OF EXPERIENCE

Throughout the years, DMR has been retained by many municipalities, counties and the State of New Jersey, as well as numerous state agencies and departments. DMR has provided just about any service a public entity client may require, including many library projects, as well as similar education and community spaces. Projects performed on behalf of these public entities have ranged from small projects, such as a new roof, to very large and complex projects, such as 340,000 square foot renovation of a former office/research building into County offices in Hudson County. Through these contracts, DMR has designed and overseen the renovation, rehabilitation or construction of just about every type of municipal building including: libraries, administrative offices, fire houses, DPW facilities, police stations, community and recreational centers, parks, schools and Housing Authority owned buildings. In working with these public entities, DMR has gained extensive experience in providing submittals and applications to the DCA, DOT, DEP, etc. In addition, these projects have required familiarity with current N.J. Statutes governing bidding and construction projects for municipal facilities.

DMR continues to provide a full range of architectural, planning and landscape architectural services from feasibility and planning through construction administration. While the firm has won numerous design awards and remains active in architectural organizations to stay up-to-date on the latest knowledge within the industry, DMR's greatest strength is a proven track record of hundreds of successful projects completed throughout our history. We strive to continue this well-earned reputation into the future by dedicating ourselves to designing spaces that truly reflect the relationship between a building's use and its occupants and the form and function of their environments.

RELEVANT EXPERIENCE

Please refer to the project sheets in Section 3 for details on DMR's public work experience.

WORKLOAD OF THE FIRM & DELIVERY OF SERVICES

While DMR remains busy with active projects across numerous market sectors, we have the capacity necessary to provide quality services to the Borough of Wallington. Our current and projected workload will allow us to begin work immediately on this project.

With a staff of 40, DMR is a strong team of seasoned and eager professionals. DMR prides itself on having a firm big enough to complete many projects on schedule, yet small enough that each project has partner-level attention.

Experienced and talented designers are dedicated to each project we undertake, providing a seamless team to address our client's architectural needs. DMR has developed a comprehensive, streamlined approach to controlling the project schedule and construction budget. Our project manager is the single point of contact for the client and is responsible for keeping the project on schedule. Our experienced architects and engineers have developed and maintained ongoing relationships with contractors, code officials and approval agencies in New Jersey that allow us to anticipate milestone dates and review periods required by approval agencies. With an extensive staff in-house, DMR has the manpower and flexibility to absorb schedule changes, if and when they should happen.

VALUE-ADDED SERVICES

Feasibility Studies & Transactional Due Diligence

DMR has the unique ability and experience to perform feasibility studies and transactional related due diligence studies for potential projects. Generally, an architectural feasibility study consists of programming, concept planning and preparation of estimated construction budgets. In some instances, the architectural feasibility study could be rendered useless by property

QUALIFICATION STATEMENT

constraints, such as easements, environmental regulations or environmental contamination. Thus, as some of DMR's personnel have engineering backgrounds, legal backgrounds and real estate development experience, DMR has the unique capability of combining the traditional architectural feasibility study with a transactional due diligence study to ensure that what is being proposed can be accomplished. This approach saves time, money and potentially embarrassing situations for public officials, whereby a feasibility study is commissioned and the results publicly presented only later to inform the public that the project has to be altered. DMR has performed this level of studies for the County of Bergen, wherein the County was assessing the development of a new County police headquarters and DPW facility, and for the City of Hackensack, wherein the City was assessing the development of a new city hall, fire station and parking garage.

Public-Private Partnerships

DMR completed the interior renovations of the first floor of the Woodbridge Township City Hall in a Public-Private Partnership, wherein the Township acted as the general contractor under the oversight of DMR via an enhanced level of Construction Administration. This unique and creative approach allowed the project to be phased so as to minimize the impact of the City Hall functions, including the twice-a-day court, without premium pricing for a phased construction schedule. In addition, as a result of the Township acting as its own general contractor, the Administration is saved approximately \$500,000 in construction costs.

Shared Services

DMR completed \$55 million worth of work for the Township of Lyndhurst and the Lyndhurst Board of Education in designing several shared service buildings that are used by both the Board of Education and the Township community, including the Community Pool and Board of Education Office and Youth Center.

Professional Planning, Downtown Revitalization and Community Design Services

As DMR's capabilities and staff have expanded over the years, the firm has developed a thriving professional/redevelopment planning and landscape architecture division. Francis Reiner, PP, LLA, a senior urban designer and partner leads the planning division of the firm, and draws upon experience gathered as both a design professional and developer who has completed projects across the country.

Francis has grown DMR's planning portfolio to include projects in some of New Jersey's most well-known municipalities, including Hoboken, Hackensack, Paramus, Bayonne and East Orange, among many others. Among numerous achievements and multi-faceted endeavors undertaken as part of these contracts, DMR's most noteworthy experiences includes: the coordination of numerous public surveys, community workshops, charrettes and public meetings; more than 25 redevelopment and vision plans, including architectural and streetscape design standards; parking implementation, access management, and circulation design, including PILOP (Payment in Lieu of Parking) ordinances; re-zoning; and professional planning efforts completed on behalf of both the public and private sectors.

In addition to this experience, DMR has consulted on a variety of planning and redevelopment projects throughout our history. In some cases, while not retained by the municipality, DMR has also worked alongside municipalities in the capacity of a planning consultant on large redevelopment projects.

Lloyd Rosenberg is the driving force behind the phenomenal growth and success of DMR Architects. As President & CEO, Lloyd leads the 40+ person team at DMR, which among many recognitions and achievements has recently celebrated five consecutive listings as the #5 New Jersey architectural firm; two consecutive listings on NJBiz's Best Places to Work in New Jersey; and a national ranking on Real Estate Forum's list of the 2016 Fastest Growing Companies, which recognized DMR's 44% increase in staff size and 85% increase in billing from 2015 to 2016.

When Lloyd founded the firm in 1991, it was a three-person operation focused solely on designing exceptional schools and educational facilities. Over the years, he steadily added expert talent, enabling DMR to expand its capabilities, which now also includes architectural design for the corporate, commercial, higher education, residential, healthcare and public sectors, as well as advanced sustainable design and a thriving redevelopment and urban planning department.

For 28 years, Lloyd has overseen DMR's thousands of design and construction projects, which represent hundreds of millions of dollars in construction work. Among these projects are many that have had a great impact on the landscape of New Jersey, including the State's first nature museum, the first school for the blind and the first LEED certified public school; Bergen County's first brewery; the rail station that first brought train service to the Meadowlands; and the new Frank J. Gargiulo Campus, the \$140 million vocational/technical high school in Hudson County, will be one of the most technologically-advanced schools in the country. The thousands of other projects completed under Lloyd's direction demonstrate DMR's wide range of skills and services, and include sophisticated healthcare facilities, elementary schools, luxury lofts, downtown master plans, police stations, parks, modern offices, academic facilities, sports complexes, renovations to an elementary school forced to close following Superstorm Sandy and construction oversight of the much-anticipated American Dream project.

With more than 55 years of experience, Lloyd is a leading architect in his own right, professionally registered across the country, and registered in Interior Design and Professional Planning in New Jersey. Individually, his impressive portfolio of award-winning designs include many noteworthy projects, as well as extensive international work, such as the 500 acre University in Kaduna, Nigeria valued at more than \$500 million.

Lloyd received a Bachelor of Architecture from the University of Oklahoma and completed Graduate Studies at Columbia University. He remains active in numerous architectural and professional organizations, and currently serves on the Board of Trustees for the Educational Leadership Foundation of New Jersey and on the advisory board for the Rutgers Center for Real Estate.

Gregg Stopa joined DMR in 1993, and currently serves as Senior Vice President. He manages DMR's production department, leads the firm's Quality Assurance/Quality Control efforts, and still individually manages projects, particularly in the public and education sectors. In 2017, he became a partner of the firm.

With more than 30 years of experience, Gregg ensures outstanding client service and the proper and efficient production of construction documents. This process includes reviewing working drawings and specifications; working with and reviewing construction and budget constraints; coordinating with DMR's production staff and outside consultants; and ensuring the design intent for a wide variety of projects adheres to local building codes.

Gregg is a graduate of Syracuse University School with a Bachelor of Architecture degree. He is a registered architect in New Jersey and New York.

Pradeep Kapoor joined DMR in 2001 and has been a LEED AP since 2002. His education, knowledge and multi-cultural experiences make Pradeep a highly qualified member of the DMR design team.

Representing DMR, Pradeep works on projects in all market sectors. He is committed to project success from the onset, and excels at the analysis of client needs, and works closely with clients and stakeholders to produce functional and efficient designs. His project management and project architect expertise is in the public and healthcare sectors, where he has directed and designed a multitude of multimillion dollar projects from complex police and emergency command facilities, to sophisticated medical facilities for a wide-range of speciality needs.

Pradeep has a vast knowledge, experience and passion for sustainable design initiatives, and leads the sustainable design efforts for all projects throughout the firm. He has played a lead role on the sustainable design of numerous facilities, including each of DMR's LEED certified facilities. He is proud to have formerly served as the Chair of the United States Green Building Council Northern New Jersey branch.

Certification for School Board
Administrators

Henry Ossi joined DMR in 2000, and has more than 30 years of experience in the construction industry. He serves as DMR's Director of Construction Administration and is an Associate of the firm.

Henry is responsible for supervising all construction activities, cost estimates and construction management assignments. As a licensed code official and estimator, Henry provides an invaluable resource to DMR clients and staff, ensuring that design details comply with state and local standards.

Henry is involved from the onset of a project until completion, offering construction cost estimates at every phase of design and adhering to schedule milestones. His responsibilities include project scheduling, cost control, direct field observation, quality control and assisting with contractor negotiations and administration.

With a Bachelor of Science in Accounting from Fairleigh Dickinson University, Henry has extensive experience in financial budgeting, in addition to construction management and administration. He is experienced in budgetary control and has directly overseen construction projects of all scopes, offering a unique understanding of soft and hard costs common to construction projects.

Henry's vast experience enables him to anticipate challenges and provide the necessary direction to maintain construction schedules. He has completed hundreds of capital improvement, renovation, addition and new construction projects in both the public and private sector.

Prior to joining DMR, Henry was a successful contractor and served as an Interim Business Administrator. The combination of his background in facilities construction and fiscal responsibility provides for his inherent understanding of the construction field.

LIBRARY BOARD ARCHITECT

SECTION 3

Relevant Experience

LIBRARY MAIN ENTRANCE

Somerset County Improvement Authority commissioned DMR to develop an existing 45-acre Convatec Pharma site for a new Municipal Complex for the Township of Montgomery. The new facility will house the police department, municipal offices and town library.

DMR developed the overall site master plan, as well as the programming, floor plans and design for the 16,000 SF library, 14,000 SF municipal offices, 14,000 SF police space, and 8,000 SF of shares spaces and utility areas.

HIGH SCHOOL LIBRARY

NORTH HUNTERDON-VOORHEES REGIONAL HIGH SCHOOL DISTRICT
ANNANDALE & GLEN GARDNER, NEW JERSEY

DMR was retained by the North Hunterdon-Voorhees Regional School District to make extensive improvements to the districts two high schools: North Hunterdon (NHHS) and Voorhees (VHS) High Schools, built in the 1950's and 1970's respectively.

As part of this contract, DMR renovated the libraries at both schools to transform the spaces into modern media centers, that incorporated technology upgrades, provided flexible collaborative spaces, and provided a better learning environment for the students of the regional district.

Pictured above is photos of the North Hunterdon High School library.

BERGEN COUNTY PUBLIC SAFETY OPERATIONS CENTER
MAHWAH, NEW JERSEY

DMR designed this \$12 million, 30,000 square foot, 24/7/365 specialized building to assist the County of Bergen and its communities in offering exceptional emergency management services.

This state-of-the-art building houses a 911 command center, communication center, emergency operational center, Office of Emergency Management, radio shop and key personnel offices.

In addition, it contains telecommunications access flooring; data, voice and cable infrastructure; audiovisual and security technologies; and special MEP and lighting designs in order to function as an efficient 911 communication center.

The overall design of the building boasts a state-of-the-art look with glass and steel, softened a bit with the brick exterior to fit in with the surrounding wooded area.

The building was designed using LEED sustainable principles, including 20 kilowatts of solar paneling on the roof.

JERSEY CITY JUSTICE COMPLEX

JERSEY CITY, NEW JERSEY

DMR designed this new, \$26 million, three-story, 71,000 square foot building as part of a Design/Build project.

The facility houses 13 municipal divisions and contains six courtrooms over two floors, as well as criminal holding cells, judge's chambers, administrative areas and two libraries. This building also features a secured entrance for the police department.

Designed to initiate the revitalization of the surrounding downtown area in this urban district, this facility provides a strong sense of civic pride and identity. It is stately and functional, yet visionary in keeping with the revitalization of this metropolis.

The entrance from the public plaza is monumental. A large brick arch, symbolic of traditional civic architecture, frames a two-story atrium which is visible to the street and the plaza, reinforcing the building's public image for use and access. The plaza steps are landscaped with rectangular planters for a soft transition. The exterior is designed with multiple colors and textures, complementing the smaller buildings and human scale of the pedestrian neighborhood. The exterior of the building is clad in five primary masonry units. Key to the design is the usage of masonry to form a curved façade, depicting warmth and openness.

BERGEN COUNTY ADMINISTRATION BUILDING HACKENSACK, NEW JERSEY

DMR programmed and designed the new, five-story, 256,000 square foot Bergen County Administration Building to accommodate county offices. The \$62 million building was built adjacent to the existing county courthouse.

Also part of the project, DMR designed a \$15 million, five-level parking facility to service the new building and existing courthouse. The new parking garage accommodates 1,200 vehicles.

The administration building flanks Hudson, Kansas and River Streets in Hackensack, N.J., and creates a courtyard which opens toward the courthouse. The two-toned precast concrete panel design complements the administration building, which is similar in exterior materials and colors.

Bergen County is the most populous county in New Jersey, and the government is one of the largest employers in the county.

DMR worked with The Hillier Group on the project.

HUDSON COUNTY PLAZA
JERSEY CITY, NEW JERSEY

DMR completed a feasibility study, followed by the conversion of a 340,000 square foot existing building into a county facility for the Hudson County Improvement Authority. The construction cost of the gut-renovation project totaled \$46 million.

The building, which had existed on the 16-acre site since 1928, was once the national headquarters for Block Drug, which developed, manufactured and marketed pharmaceutical and household products.

The building was renovated to serve various county departments including the sheriff, 911 center, Rutgers Cooperative, Department of Family Services, county clerk, county registrar, veterans affairs, Superintendent of Elections, Board of Elections, Board of Taxation, Division of Road and Public Property and the Division of Community Development. Shared space for all of the departments includes a conference area. The building also included a new, county-operated chest clinic.

This major relocation was part of the county's plan for increased consolidation and efficiency in providing services to the Hudson County community. The county had previously leased spaces for its departments throughout the county.

The building was designed to support the neighborhood, as exterior improvements included a small public park, widened sidewalks, new landscaping and new bus stops.

MUNICIPAL COURT & PARKING AUTHORITY NORTH BERGEN, NEW JERSEY

DMR provided professional services for the renovation/relocation of the Municipal Court and Parking Authority for the Township of North Bergen. As part of the program, DMR designed renovations to 8,000 square feet and a 5,000 square foot addition to a former TD Bank. The construction cost of the project was approximately \$4 million.

The project was extremely important to the township because the existing facilities were outdated, undersized and unsafe for employees and visitors. The renovation of the new court now provides the township with a dedicated court outside of Town Hall, where the court previously shared space with the police department. The building offers triple the space as their former facility, while accommodating a high-volume operation and providing more parking, thus resolving two major issues the urban community faced.

The front of the building houses the North Bergen Parking Authority, which leases 40% of the building from the township.

DMR worked closely with township leaders to put together a program and re-design the former bank space to meet all state legislative requirements, which include strict safety and security standards for courts.

GARFIELD POLICE STATION
GARFIELD, NEW JERSEY

Construction is underway at the new Garfield Police Headquarters, a new construction project in Garfield, NJ.

DMR designed the 20,000 square foot facility to replace an outdated and inadequate facility that was built in the 1960s.

The design of the new building, which will be almost triple the size of their previous facility, incorporated security mandates outlined by the New Jersey Department of Corrections, while balancing aesthetic concerns that allow the facility to maintain a warm community presence. Layout and circulation were of paramount concern, as the previous facility lacked a sally port and booking and cells were located on the top floor, meaning arrestees were transported through the building, sometimes past the public, and through a series of stairs. The new facility will provide the City with a modern and updated space, equipped with the latest technologies and in compliance with all applicable codes.

WAYNE POLICE STATION WAYNE, NEW JERSEY

DMR is providing professional services for a new Township Police Headquarters, which is a portion of the municipal complex.

DMR originally presented four options for renovation or new construction to the Township of Wayne to consider as options for upgrades to the existing, aging facility. DMR prepared concept building block plans illustrating the size of the building and its relationship to other buildings on the site, as well as preliminary construction budget for each option listed.

The Wayne Police Department selected to construct a two-story, 12,600 square foot addition to the existing police station, while renovating approximately 12,700 square feet of the existing building. A one story in-fill of part of the courtyard in the front and renovation of an old print shop to use as temporary space during construction, which will be available for use after construction, is also part of the project.

This specialized building will be 24/7/365 operation and will have a sally port, holding cells, processing room, interview rooms, waiting area, line up area, police offices, lockers, showers and key personnel offices as the main functions of the building. Other issues that need to be addressed include a leaky roof, lack of elevators, evidence lockers, as well as lockers for female officers, and ample space for officers to speak confidentially to members of the public, especially with sensitive issues, such as domestic violence cases.

A new police station has been a goal of the Township for more than 10 years, as the conditions of the currently facility are dire, unsafe and inefficient. For example, suspects taken into headquarters are currently escorted into a door on the side of the station and then taken down a common hallway also utilized by other officers, building employees, and the public en route to a booking room.

JERSEY CITY POLICE STATION
JERSEY CITY, NEW JERSEY

DMR was contracted by the City of Jersey City to design plans to refit an outdated and vacant building at Marion Gardens, located at 400 U.S. Highway #1, into the new, permanent headquarters for the Jersey City Police Department.

DMR's design proposed a transformation to the 20,600 square foot, three story, abandoned former public housing building into a nucleus of positive activity for what is considered by many to be an under-served area of the city.

In designing the facility, DMR had to account for bringing the electrical systems up to code, as well as upgrading the building facade and exterior lighting, while addressing programming needs that required separate space for the police officers, the Public Safety Director and the Police Chief.

HACKENSACK EMERGENCY OPERATIONS CENTER

HACKENSACK, NEW JERSEY

DMR provided architectural and engineering services to the City of Hackensack for the relocation and renovation of the Hackensack Emergency Operations Center and Communications Center.

DMR first completed a feasibility study to explore the viability of the location and space of the center at 205 State Street, then continued with the design and construction administration of the renovated space. The project better serves the Hackensack community respond to emergency events in a more organized and effective manner.

The space at 205 State Street was previously used as storage for various city departments. The Emergency Operations Center includes specialized spaces such as an Emergency Operations Ready Room and 911 Communications Center. The Communications Center is a 24 hour a day, 7 day a week operation which handles 911 calls and fire, police and ambulance dispatch for the City of Hackensack and surrounding municipalities.

In addition, the space includes an office for the Office of Emergency Management director, conference and break out rooms and other auxiliary spaces. The renovation includes new and upgraded telecommunications, access flooring, data, voice and cable infrastructure, audiovisual, security technologies, MEP and lighting design.

RIVER BARGE PARK
CARLSTADT, NEW JERSEY

River Barge Park is a park and marina located on approximately 5 acres in the New Jersey Meadowlands on the shore of the Hackensack River.

The marina contains 35-40 boat slips for medium to small size boats, a ramp to launch boats and a dock for launching crew shells and canoes. It is the launching site for the New Jersey Meadowlands Commission (NJMC)'s eco-tours on the Hackensack River.

DMR provided architectural services for the building program at River Barge Park, which includes the Robert Ceberio Environmental Education Pavilion, an open-air, outdoor classroom; the Winter Storage Boat House, which houses the NJMC's boat fleet; and the Paddle Center, which houses the NJMC's canoes and provides space for indoor programs. These facilities provide educational and leisure opportunities to the public.

The site also includes a 120 foot public launch ramp, 27 slip marina, 130 foot rowing dock, designated kayak/canoe launch, pile bulkhead and waterfront promenade with wonderful views.

TRAILSIDE NATURE AND SCIENCE CENTER
MOUNTAINSIDE, NEW JERSEY

DMR designed a renovation and addition to the Trailside Nature and Science Center, Union County's environmental education center and New Jersey's first nature museum.

The facility is located within the Watchung Reservation, a 2,000 acre site of woodlands, fields, streams, hiking trails and lakes.

The Trailside Nature and Science Center provides an interactive learning environment that includes 4,500 square feet of state-of-the art exhibits, including a 34-foot American beech tree exhibit in the atrium.

The building also features classrooms that overlook the reservation, a multipurpose room, a library, children's discovery room and a 250-seat auditorium.

DMR designed an addition to the museum to accommodate the required program, while incorporating the original 1970s building detail and facade. This project combined several buildings into one efficient complex for an expanding parks service for all visitors.

RIDGEFIELD COMMUNITY CENTER
RIDGEFIELD, NEW JERSEY

Working for the Borough of Ridgefield, DMR designed a new community center to replace an outdated facility. The proposed, approximately \$15 million building was designed to include accommodate space for a gymnasium, multipurpose room, senior and special events, meeting rooms, storage and municipal and Board of Education offices.

BERGEN COUNTY REGIONAL SPORTS COMPLEX

PALISADES PARK, NEW JERSEY

DMR designed a Regional Sports Complex to serve the Bergen County community and support local sporting events and recreational activities.

As part of the complex, DMR designed a new, 3,000 square foot Maintenance Building. The program included a supervisor's office, break room, restrooms, three bay garage and equipment storage rooms.

DMR also designed a new Field House, a centerpiece for the park. The building includes two team rooms, public restroom facilities and a concession area for food sales during events.

The design of the maintenance building and field house complement each other with a similar design and use of materials.

Major goals for the buildings at this site were that they be durable, energy efficient and vandal-resistant. DMR utilized an aesthetically pleasing ground face block with vandal resistant coatings on all exterior walls, window opening are either glass block or aluminum with lexan glazing, and all doors are metal to resist heavy abuse. The buildings also use highly efficient exterior envelope (including ceiling, windows, walls and doors), use of skylights for natural lighting of the work bays and large overhangs to reduce the amount of solar heat gain.

LYNDHURST COMMUNITY POOL
LYNDHURST, NEW JERSEY

DMR has worked for the Township of Lyndhurst on various Shared Services projects totaling more than \$55 million, including an addition to the high school to house a community pool.

This 12,000 square foot addition to the existing high school houses a community pool for use by the Board of Education and Lyndhurst community. The pool has six, 25-yard lanes and bleachers for 180 spectators.

One of the benefits of this collaborative effort between the Township and the Board of Education is that the district would repay the Township \$500,000 annually, allowing summer programs and after school activities to take place.

BOROUGH OF SOUTH TOMS RIVER
MUNICIPAL BUILDING, POLICE DEPARTMENT & MUNICIPAL COURT
SOUTH TOMS RIVER, NEW JERSEY

DMR provided design services for the renovation of a former daycare center into the new municipal headquarters and police station for the Borough of South Toms River.

Previously, the Municipal Offices, Police Station and Municipal Court occupied the basement of a 7,000 square foot facility, that did not adequately meet municipal, police or community needs.

DMR first completed a plan and cost estimate for the Borough, then continued under contract with the owner of the building to provide construction documents.

The new facility is 10,000 square feet and satisfies multiple needs and uses, particularly those of the police, who required a separate entry, two holding cells, a processing room and interview room. The building also houses municipal offices and its council chambers/municipal court, and provides a community room and space for the Borough's Office of Emergency Management.

MIDDLESEX

C O U N T Y ♦ N J

Under contract with the County of Middlesex, DMR provided, or is providing, professional services for several county projects, including:

NEW STEPHEN J. CAPESTRO THEATRE COMPLEX

EDISON, NJ

DMR is currently under contract to design the new Capestro Theatre Complex at Roosevelt Park, a new construction project that will replace the current home of the County's very successful Plays-in-the-Park, a summer program which provides Broadway-quality musical theatre in an outdoor amphitheatre. The design will provide a 30,000 SF building, which will replace the current structure, which is aging and outdated. The project also includes a combination of both covered and open-air outdoor seating for the audience.

PROSECUTOR'S OFFICE RENOVATION

NORTH BRUNSWICK, NJ

DMR completed interior renovations of the Archive and Record Storage Building to accommodate space for the Prosecutor's Office. With much of its tax and property deeds being kept and now issued online, one-third of building's nearly 8,000 square feet had to be reconfigured into satellite office space for the County Prosecutor and warehouse space for its large item storage. DMR also accommodated for a new parking area, a new driveway off the main road, and a loading area for the warehouse space. DMR is now proceeding with extended construction administration services, including a part-site site presence, to see the project through construction administration.

BRIDGES & HIGHWAYS OFFICE RENOVATION

NORTH BRUNSWICK, NJ

DMR completed the County Highways and Bridges building, a gut renovation, to create office space for the Department's staff, and that of the Middlesex County Area Transit. The project also included a new roof, HVAC system and new windows. The project encompassed approximately 6,200 square feet.

MEDICAL EXAMINER'S OFFICE & MORGUE RENOVATION

NORTH BRUNSWICK, NJ

DMR completed the interior renovation of the County Medical Examiner's Office in North Brunswick. The project included the expansion of its cold storage area, as well as new offices for doctors, medical investigators and clinical technicians. The project also included various schematic plan options, as well as the coordination and bidding of a temporary trailer facility. The project reconfigured existing space and used an under-utilized, adjacent garage to accommodate the new program without an expansion. The total project included approximately 8,800 square feet, with approximately 1,000 square feet of that space being dedicated to cold storage, which was previously accommodated in less than 400 square feet.

BERGEN COUNTY DPW FACILITY
HACKENSACK, NEW JERSEY

DMR was retained by the County of Bergen to conduct a feasibility study and perform due diligence services for a new DPW facility in Hackensack, as the current configuration for the Police, DPW, and Central Municipal Court were operating inefficiently.

As part of the process, DMR conducted interviews with each of the departments and analyzed the findings to create conceptual solutions of possibilities for two different parcels of land, located across the street from each other.

DMR prepared the possible site plan for the +/- 5.3 acre eastern tract of the property for a proposed DPW Building. The facility consisted of areas for office, maintenance / storage, repair shop, operation vehicles, salt shed, surface parking, vehicle storage and traffic signal dept.

VAUXHALL MEETING CENTER
UNION, NEW JERSEY

DMR was retained to design the Vauxhall Meeting Center, a single story, 1,500 square foot new building, for the Township of Union. The project site is the home to the old Vauxhall Library, which was demolished as part of the project. The new facility is a wood structure with a brick exterior, designed to blend with the residential community surrounding the building.

The project brings welcome life to a historic site in the community, and offers multi-purpose space, as well as a new home for the Vauxhall Historical Society.

COUNTY OF MONMOUTH COURTHOUSE RENOVATION
FREEHOLD, NEW JERSEY

The County of Monmouth retained DMR to complete renovations, alterations and an addition to the Monmouth County Courthouse in order to modernize and refurbish the building, while also bringing it up to ADA code. The project scope includes 113 restrooms, as well as the removal of exterior stairs, ramps, platforms and canopy structure in order to accommodate for a 3,400 SF addition which will provide a new security vestibule.

TOWNSHIP OF LYNDHURST
SHARED SERVICES PROJECTS
LYNDHURST, NEW JERSEY

DMR has worked for the Township of Lyndhurst on various shared services projects totaling more than \$55 million, including:

BOARD OF EDUCATION OFFICES & YOUTH CENTER

DMR designed a 10,000 square foot shared services building for the township and Lyndhurst Board of Education.

The building is located on the same 9.4 acre site as Lyndhurst High School and athletic fields. The exterior was designed to complement surrounding residential homes.

The facility houses the youth center on the first floor, and board of education offices on the second floor, each with separate and distinct entrances.

COMMUNITY POOL

This project was a 12,000 square foot addition to the existing high school to house a community pool for use by the board of education and Lyndhurst community. The pool has six, 25-yard lanes and bleachers for 180 spectators.

One of the benefits of this collaborative effort between the township and the board of education is that the district would repay the township \$500,000 annually, allowing summer programs and after school activities to take place.

RIDGEFIELD MUNICIPAL COMPLEX RIDGEFIELD, NEW JERSEY

The Borough of Ridgefield first retained DMR Architects to complete a feasibility study to determine on which of two identified pieces of land could the Borough construct a new Borough Hall and Police Department. The Borough's current facility is undersized, aging, and deteriorating at a pace that often closes the facility, forces meetings to relocate and is difficult to maintain.

Following DMR's feasibility study, the Borough selected a site near the Borough Community Center and Ridgefield Nature Reserve.

The 27,000 square foot facility will accommodate the Borough's municipal court, council chambers, building department and borough offices. Nearly 10,000 square feet of the facility will be dedicated to the Police Department.

Taxpayer Identification# 223-119-428/000

Dear Business Representative:

Congratulations! You are now registered with the New Jersey Division of Revenue.

Use the Taxpayer Identification Number listed above on all correspondence with the Divisions of Revenue and Taxation, as well as with the Department of Labor (if the business is subject to unemployment withholdings). Your tax returns and payments will be filed under this number, and you will be able to access information about your account by referencing it.

Additionally, please note that State law requires all contractors and subcontractors with Public agencies to provide proof of their registration with the Division of Revenue. The law also amended Section 92 of the Casino Control Act, which deals with the casino service industry.

We have attached a Proof of Registration Certificate for your use. To comply with the law, if you are currently under contract or entering into a contract with a State agency, you must provide a copy of the certificate to the contracting agency.

If you have any questions or require more information, feel free to call our Registration Hotline at (609)292-9292.

I wish you continued success in your business endeavors.

Sincerely,

James J. Fruscione
Director
New Jersey Division of Revenue
