Beachcomber Hot Tubs

1. Check the width clearance from your house to your fence, and check that your hot tub will fit through your gate. Make note of overhead clearance from eaves, gutters or trees.
2. Make sure doghouses, children's toys and bikes, firewood and other objects are out of the way. Check your gas meter location to make sure the way is clear.
3. Your delivery crew needs to know about stairs and turns for dolly access. Make some notes for them before they arrive.

NOTES TO THE QUALIFIED INSTALLER

Your Beachcomber Hot Tub is a powerful appliance. We recommend a qualified electrician to install your hot tub safely and correctly. They should follow the electrical code for your area. It is always necessary to install a ground fault interrupter (GFCI). This breaker is designed to shut down your hot tub in the event of an emergency.

USE COPPER CONDUCTORS ONLY

A connector marked "ground" is provided within the control box. To reduce the risk of electrical shock, connect this connector to the grounding terminal of the electrical service panel with continuous copper wire, equivalent in size to the conductors supplying this equipment. "Bonding lugs" are also provided on the equipment enclosure to connect a minimum No. 6 AWG solid copper conductor between the hot tub and any metal surfaces, that are

closer than 5 feet to the hot tub. To reduce the risk of electrical shock, connect the bonding lugs in accordance with your area's electrical code.

CONNECTING YOUR HOT TUB TO THE POWER SUPPLY PANEL

Locate the electrical access on the left and right side of the hot tub in the black kick plate. Route the wires through the side that is most convenient and plug the side not used with the 1" PVC plug provided.

Beachcomber Hot Tubs

Beachcomber builds two types of construction styles. No matter which model you have chosen, your Beachcomber Hot Tub is designed to give you many years of relaxation and

enjoyment. We refer to both styles of construction in this booklet, and we wanted to outline these two important features of Beachcomber Hot Tubs before you read the rest of this booklet.

Available step for Portable Hot Tubs

PORTABLE

The first style is called Portable. This model is built with the power source inside the cabinet. The Portable is a durable, quiet, space-saving hot tub, and has been a top performer since its launch

in 1996. New engineering techniques have allowed Beachcomber designers to fit all components in a compact format in a hollow, plastic enclosure behind the Portable door.
