Le MARQUIS FIREPLACE

As an easy-to-add heat source—or a replacement for a heat-wasting fireplace. Make the Le Marquis Fireplace part of your lifestyle.

You can load big 24 inch logs into the solid cast iron firebox, then relax in front of a fire that you can see through the handsome, airtight tempered glass doors.

Close down the smoothly operating draft and primary air level and take advantage of the airtight, heat-retaining construction to create a slow burning fire that can last

overnight. Its hollow shell enclosure assures efficient circulation of convection and radiation heat. Any approved class A chimney in your home can be used to connect the Le Marquis Fireplace. Up to 17,000 cubic feet of home space can be heated with this clean, economical, year-round wood burning system.

AN OPTIONAL COAL CONVERSION KIT IS AVAILABLE

Other features include:

A grill top to promote more efficient heat circulation. A built-in rear heat shield for added protection. The leather-grained lacquer finished hood requires only a wipe with a damp cloth to keep its handsome lustre. And there's a removable ashpan for quick clean disposal of ashes.

"This product has been successfully tested to UL Standard by Arnold Greene Testing Laboratories, Inc."
