The American Titan D.E. Filter

Titan filters are designed and manufactured using "state of the art" material and manufacturing techniques. Contractors and installers depend on the American Titan filter for reliable, long lasting filtration.

STAINLESS STEEL TANK The American Titan Filter Tank is heavy gauge, type 304, corrosion resistant stainless steel. The exterior surface is machine polished to a mirror bright finish. The tank is supplied with bulkhead fittings and spin-on union connections. These special unions allow for an easy and quick hook up for new installations or when this filter is retrofit to existing plumbing. Filter sizes 24 sq. ft. through 60 sq. ft. come complete with fittings for either 1 1/2" or 2" connections and 72 sq. ft. filters are fitted for 2" plumbing.

INTERNAL GRID ASSEMBLY These commercially rated filters utilize a unique spiral grid assembly with top manifold. This bottom to top circulation system assures better coating of diatomaceous earth and more efficient backwashing. The eight vertical semi-elliptical grids are fabricated of high impact, high temperature styrene. The septum supports are tailor fitted with tough monofilament polypropylene.

1. Stainless steel tank
2. Bulkhead fittings
3. Pressure gauge & air relief valve
4. Internal air bleed
5. Top manifold
6. Curved vertical grid
7. Stainless steel clamp
8. Stainless steel base
