CERTIFICATION IN LIEU OF OATH

I. OWNER SECTION (to be completed if the applicant is the owner in fee)

I hereby certify that I am the owner in fee of the property listed on Page 1.

Mark the following applicable boxes:

- A. ☐ I further certify that a new home (private residence) will be constructed on this property for my own use and occupancy. This dwelling is to be occupied by myself and is not to be used for any purpose other than single family residential use. I attest that all construction, plumbing, or electrical work will be done, in whole or in part, by me or by subcontractors under my supervision, in accordance with all applicable laws; and, I further acknowledge that said new home is not covered under the New Home Warranty and Builders Registration Act (N.J.S.A. 46:3B-1 et seq.) and that such fact shall be disclosed to any person purchasing this property within ten years of the date of issuance of a certificate of occupancy.

I UNDERSTAND THAT IN MARKING BOX A, I ACKNOWLEDGE THAT I AM ASSUMING RESPONSIBILITY FOR THE WORK DONE ON SAID PROPERTY, THE CONDITION OF THE PROPERTY PRIOR TO, DURING, AND AFTER ANY WORK PERFORMED, AND FOR THE PERFORMANCE OF THE SUBCONTRACTORS I HIRE, EMPLOY, OR OTHERWISE CONTRACT OR WITH WHOM I MAKE AGREEMENTS TO PERFORM WORK. I AM VOLUNTARILY AND KNOWINGLY ASSUMING THIS RESPONSIBILITY.

- B. ☐ I further certify the following as required by the New Jersey Uniform Construction Code, N.J.A.C. 5:23-2.15(f)1.ix:

I personally prepared the plans submitted for: 1) the new home referred to in A.; or, 2) an addition, alteration, renovation, or repair to an existing single family residence owned and occupied by myself and located on the property listed on Page 1; or, 3) a new structure that will be physically separate from, but that will be deemed part of, an existing single family residence that is owned and occupied by myself and located on the property listed on Page 1.

- C. ☐ I further certify that I will perform or supervise the following work:

C.1. ☐ Building C.2. ☐ Fire Protection

I further certify that I will perform the following work:

C.3. ☐ Electrical C.4. ☐ Plumbing

- D. ☐ I agree to advise all contractors on this project that they are required to be registered with the New Jersey Division of Taxation and to comply with all New Jersey tax laws.

I further certify the following as required by the Uniform Construction Code, N.J.A.C. 5:23-2.15(a)5: All required State, county, and local prior approvals have been given, including such certification as the construction official may require.

I understand that if any of the above statements are willfully false, I am subject to punishment.

Signature _____ Date _____

II. AGENT SECTION (to be completed if the applicant is not the owner in fee)

I hereby certify the following as required by the Uniform Construction Code, N.J.A.C. 5:23-2.15(d): the proposed work is authorized by the owner in fee; and I have been authorized by the owner in fee to make this application as his agent.

I further certify the following as required by the Uniform Construction Code, N.J.A.C. 5:23-2.15(a)5: All required State, county, and local prior approvals have been given, including such certification as the construction official may require.

I agree to advise all contractors on this project that they are required to be registered with the New Jersey Division of Taxation and to comply with all New Jersey tax laws.

I understand that if any of the above statements are willfully false, I am subject to punishment.

Certificate Comments:

☐ **Certificate of Occupancy**

This serves notice that said building or structure has been constructed in accordance with the New Jersey Uniform Construction Code and is approved for occupancy.

☒ **Certificate of Approval**

This serves notice that the work completed has been constructed or installed in accordance with the New Jersey Uniform Construction Code and is approved. If the permit was issued for minor work, this certificate was based upon what was visible at the time of inspection.

☐ **Certificate of Continued Occupancy**

This serves notice that based on a general inspection of the visible parts of the building there are no imminent hazards and the building is approved for continued occupancy.

☐ **Temporary Certificate of Compliance**

The following conditions must be met no later than or the owner will be subject to fine or order to vacate:

This certificate has an expiration date of:

Conditions to be met:

☐ **Certificate of Clearance - Lead Abatement 5:17**

This serves notice that based on written certification, lead abatement was performed as per NJAC5:17 to the following extent.

- ☐ Total removal of lead-based paint hazards in scope of work
☐ Partial or limited time period (years); see file

☐ **Certificate of Clearance - Asbestos Abatement**

This serves notice that based on written certification, asbestos abatement was performed to the following extent.

- ☐ Total removal of asbestos hazards in scope of work
☐ Partial or limited time period (years); see file

☐ **Certificate of Compliance**

This serves notice that said potentially hazardous equipment has been installed and/or maintained in accordance with the New Jersey Uniform Construction Code and is approved for use until

☐ **Temporary Certificate of Occupancy**

The following conditions must be met no later than: or the owner will be subject to fine or order to vacate:

This certificate has an expiration date of:

REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that the work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval granted.

☒ Required inspections for all subcodes for one- and two-family dwellings are as follows:

1. The bottom of footing trenches before placement of footings, except that in cases of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
2. Foundations and all walls up to grade level prior to back filling.
3. All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and/or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.
4. Installation of all finished materials, sealings of exterior joints, plumbing piping, trim and fixtures; electrical wiring, devices and fixtures; mechanical systems equipment.

Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

☐ Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:

☒ A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".

☐ A complete copy of released plans must be kept on the job site.

If you do not understand any of this information, please ask.

CCS1 Cooler Energy Control System - Spec Sheet

Description

The CCS1 is a microprocessor based digital controller that is designed and programmed to operate a walk-in cooler in an energy efficient manner. The controller features a two-line display and a keypad, which allows operating parameters to be viewed and changed. The system can control up to 3 coolers/zones, anti-condensate heaters, and outside air economizer.

The control box has a run/bypass switch located on the outside of the enclosure. When this switch is in the bypass position all relays are de-energized. The relays go to their NC positions and the original control circuit is reestablished. The cooler is now operating on the original thermostat.

CCS1 Controller

Features

- Shutdown Button – timed shutdown while loading cooler.
- Night Setback of coolers with non-perishable product.
- Alarms – high/low temperature, system bypassed, probe failure.
- Defrosts based on load, and terminated on temperature.
- Anti-Condensate heater control based on dew point.
- Data Logging – up to 3 months of temperature data, and 10 years of runtime data.
- Remote Monitoring/Control with Remote Site Manager System.

Specifications

Power supply	16 VAC 20VA	Temperature sensors	5kΩ thermistor, Z curve
Alarm light supply	12 VDC 150mA	Digital Inputs	Dry contact
Control Relay Rating	250VAC 7.5A	Communication port	RS232 RJ11 6p4c
DH Relay Rating	240VAC 20A	Control range:	
		System with Air Defrost	31°F - 65°F
		System with Electric/Hot gas Defrost	-20°F - 65°F
Agency approvals	UL Listed 34BA Refrigeration Controller		

Options

_E	Outside air economizer(s) 1-3
_CC	Number of coolers/zones to control. 1-3
_FDH	Freezer Door anti-condensate control.
_CDH	Cooler Door anti-condensate control.
_NS	Night Shutoff Control. Single channel, 3day on/off control.
_FM	Additional Temperature alarms other than the controlled coolers.

Typical system connections

72"	6160-120-LP/RP	9
72"	6160-120-CP	18

Note: LP/RP and CP numbers denote left, right and center-mounted applications. Product stocked is 4100°K. CCT's of 3500°K and 5000°K are available for special order in 100 or more door quantities.

Features

- 1300 lux to the center of the shelf
- 4-, 5- & 6-foot lengths in stock; other lengths special order
- Higher lumen output
- Reduced energy design
- On board power supply
- Low THD <5%, power factor .979
- ULTRA low profile
- Mounting hardware included
- UL / NSF approved

Quanta CrossFire™ SMD LED Lighting Systems for Retrofit Commercial Applications

NRM presents the new Quanta CrossFire™ SMD light bar manufactured by Q-Technology. The SMD offers a very low profile while providing higher light output than earlier generations of CrossFire. The ULTRA LOW profile is ideal for retrofitting existing frames in the marketplace.

Most frames sold to the commercial refrigeration industry in the last 20 years have had to use a thicker mullion to house the ballast. Q-Technology has taken this into account when designing this product to assure even light distribution across the front of the shelf.

The patent pending on-board power supply provides the flexibility of mounting the light bar anywhere on the back of the frame to optimize your light output while only using 1.5 watts of energy per foot of light.

Fast installation helps reduce up front costs, assuring a fast payback.

LEDs reduce lighting wattage by up to 85% compared to fluorescent fixtures. They also generate substantially less heat than fluorescents — your compressor will run less to cool the case and you'll save even more. Optional Occupancy Sensor controls offer additional savings with no warm-up time for full brightness. With a life expectancy of nearly three times that of fluorescent lamps, maintenance costs are practically eliminated for years to come.

NRM-EXCLUSIVE quick disconnect connectors on the end allow simple field replacement without tools.

Annual Energy Usage for Case Lighting in 5-Door Reach-In Freezer at 5,500 hours of Illumination

Quanta CrossFire 160 Series LEDs optimize your light output while only using 1.5 watts of energy per foot. They are certified and approved by The Design Lights Consortium for use in all utility-sponsored rebate programs.

REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval given.

☐ Required inspections for all subcodes for one- and two-family dwellings are as follows:

1. The bottom of footing trenches before placement of footings, except that in the case of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
2. Foundations and all walls up to grade level prior to back filling.
3. Utility services, including septic.
4. All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and/or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.

☐ Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

☐ Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:

☐ A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".

☐ A complete copy of released plans must be kept on the job site.
