Fire Safe AD-108™ penetrates deeply into the wood's composition. By lodging within the very cells of the wood, Fire Safe AD-108™ can retard flame for five years. And for interior use, Fire Safe AD-108™ has the same protective action. With the exception of vinyl or painted surfaces Fire Safe AD-108™ provides the same fire and smoke retarding action throughout the interior of your business or home.

Fire Safe — AD-108™

Standard Laboratory Testing Results

Fire Safe AD-108™ fire retardant has to date had the following tests performed by a certified national testing laboratory in San Antonio, Texas with the following results (others are in process).

TEST	MATERIAL TESTED	RESULTS
ASTM E-84 FLAME SPREAD	VACUUM YELLOW PINE PLYWOOD	CLASS A FLAME SPREAD 5

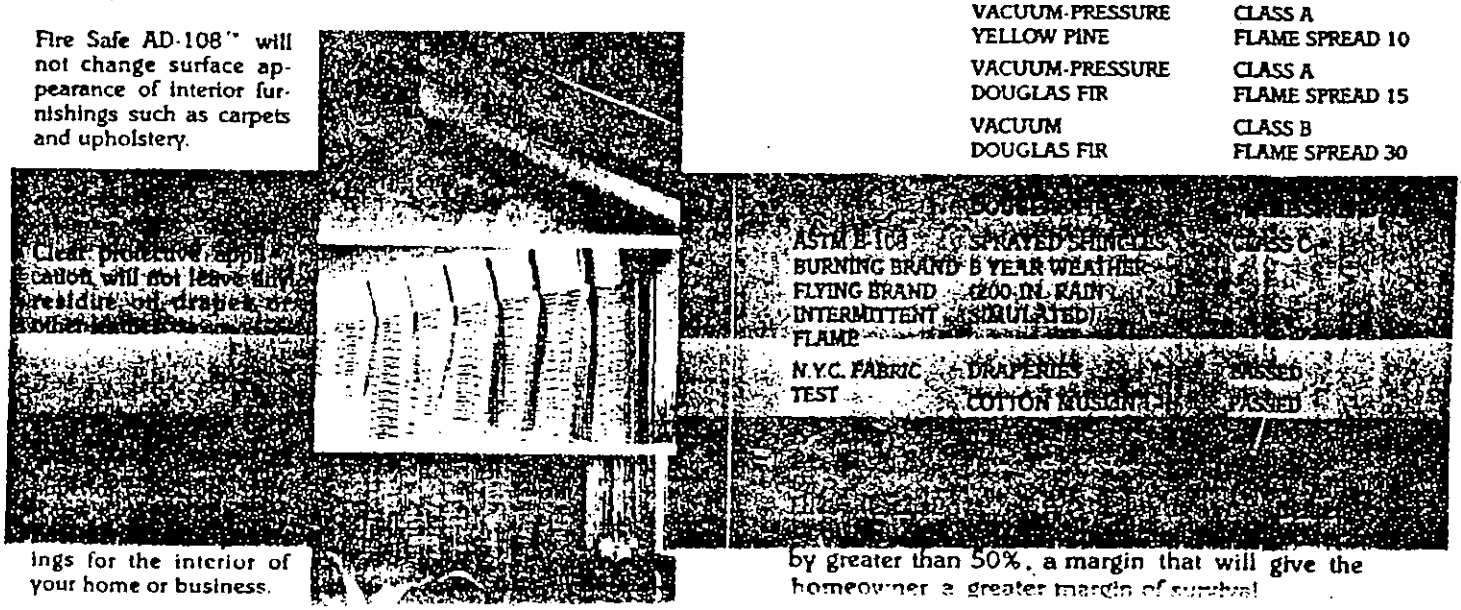
Fire Safe AD-108™ will not change surface appearance of interior furnishings such as carpets and upholstery.



ings for the interior of your home or business.

by greater than 50%, a margin that will give the homeowner a greater margin of surplus

HOW TO APPLY:

The surface to be treated should be clean and dry. Apply Fire Safe AD-108™ without diluting it. Spray the liquid on a broad area and repeat the procedure as the material sinks into the surface. Continue spraying until a very wet appearance remains for over two minutes. This permits the material to soak into the cells of the wood or surface being treated.

For maximum protection, both interior and exterior treatment is required. This will acutely reduce the wind tunnel effect of a wild fire in the attic area which generally results in complete destruction.

Clean up with water and bleach. Fire Safe AD-108™ will not damage shrubs, grass or other surfaces on which solution might spill.

EQUIPMENT:

Use of a high pressure airless sprayer is required.

COVERAGE:

One gallon covers approximately 100 square feet depending on the absorption quality of the material.

FIRE SAFE AD-108®

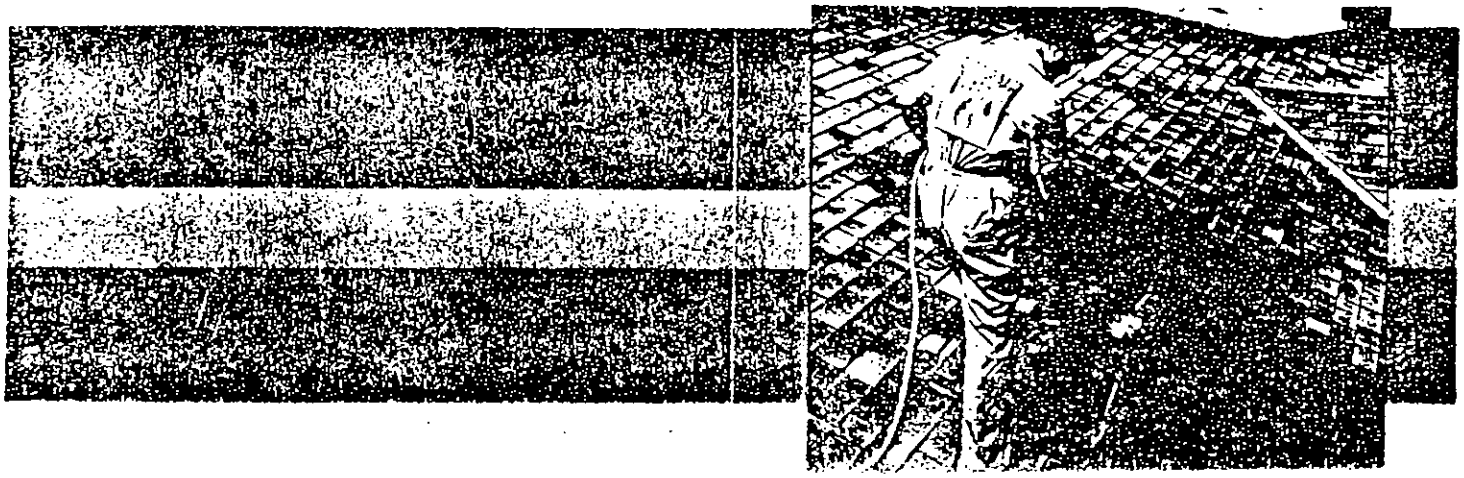
A protective application of FIRE SAFE AD-108® fire retardant...

... will prevent flamespread when applied to wood surfaces such as shake shingle roofs. Fire Safe AD-108® is a water soluble chemical whose invisible protection acts both as a fire retardant and a preservative.

Features:

- A pre-condensate that is soluble in water.
- An aqueous solution that is insoluble in water when dry.
- No linear shrinkage.
- 900 degree "F" heat causes material to decompose, char and shrink.
- No moisture absorption.
- Inhibits fungi growth.
- Non-corrosive.
- Non-toxic.
- Resistant to insects, rodents, certain types of molds.
- Mildly antibacterial.

The lightweight aqueous solution sprays easily onto all surfaces.



FireSafe AD-108®

A water-based chemical saturant/sealant that acts as a fire retardant and preservative.

Now you can get all the benefits of fire safety and sustained wood beauty with one product. Fire Safe AD-108® – a clear, non-toxic chemical that is water soluble for easy, safe application and becomes insoluble after drying.

Because of its non-toxic and non-discoloring properties, Fire Safe AD-108® can be used to protect everything from wood shingles, deckings, subfloors and studs to papers, textiles, wooden interiors, drapes, carpets and wall fabrics.

In addition, Fire Safe AD-108® can be used as a saturant for porous woods such as cedar or redwood, and as a sealant for non-porous surfaces.

- ***An aqueous solution that is insoluble when dry***
- ***Odorless***
- ***Colorless***
- ***No linear shrinkage***
- ***Moisture absorption preventative***
- ***Fungus inhibitor***
- ***Reduces smoke generation by as much as 50%***
- ***Non-toxic***
- ***Resistant to insects, rodents and certain types of molds***
- ***Mildly antibacterial***
- ***Contains no asbestos***
- ***Will not harm plants or animals***

FIRE SAFE AD-108

Fire Safe AD-108® protects from fire and smoke.

Fire Safe AD-108® automatically reacts to fire or heat by combining with the combustible gasses and tars and converting them to non-combustible carbon char, nitrogen and carbon dioxide.

Material treated with Fire Safe AD-108® will also produce significantly less smoke. In many cases, smoke generation has been reduced by as much as 50%. And that's important considering that smoke inhalation causes more deaths than fire. Fire Safe AD-108® also retards the development of a fire, allowing additional time for aid to be summoned.

It acts as a mild preservative.

Fire Safe AD-108® has wood preservative advantages as well as fire retardancy qualities. As a result, it provides some immunity from insects, rodents and certain types of bacteria.

And when used on older surfaces, Fire Safe AD-108® can restore and help retard shingle curling. Plus, it contains a fungus inhibitor which can give new life to weathered or leached shingles.

Fire Safe AD-108® is safe for the environment.

Since Fire Safe AD-108® is not an oil or solvent-based chemical, it is non-toxic as a liquid and remains that way – even after application of heat. It doesn't harm plants, shrubs, grass, trees or animals which it may accidentally come in contact with during application.

In addition, it can be used to fire-retard Christmas trees in the home, and to preserve their greenness for a much longer period of time than normal.

A non-staining interior safeguard.

Fire Safe AD-108® provides excellent fire and smoke protection throughout the interiors of homes and businesses.

It can be applied to furnishings such as carpets and upholstery. Plus it offers non-discoloring protection for drapes, textiles, fabric wall coverings and wood paneling.

However it is recommended that all materials should be tested for colorfastness and shrinkage before application.

Application is quick and easy.

Very little material preparation is required before using Fire Safe AD-108®. Surfaces should simply be dried and cleaned. And they should not be sprayed until at least 24-hours after a rain and four hours after a dew. Once applied, Fire Safe AD-108® requires a 24-hour curing time before any contact with water.

The solution should be applied in its undiluted state at the rate of one gallon per 100 square feet to unfinished wood surfaces such as siding, shingles, framing materials and decking. A high pressure, airless sprayer (1500 p.s.i.) or medium pressure liquid pump (300 to 500 p.s.i. at the tip) should be used.

Greater wood penetration can be obtained by using a vacuum/pressure or vacuum process.

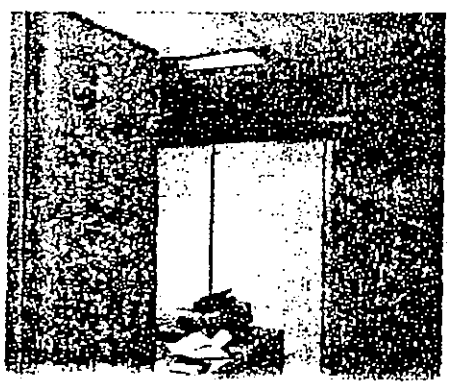
On finished wood surfaces or textiles, the coverage is 250 to 400 square feet, depending on the type of material treated. For these applications, a low pressure mist spray should be used.

In the case of wood shingles, they are normally saturated when the sprayed solution fills the pores and runs off.

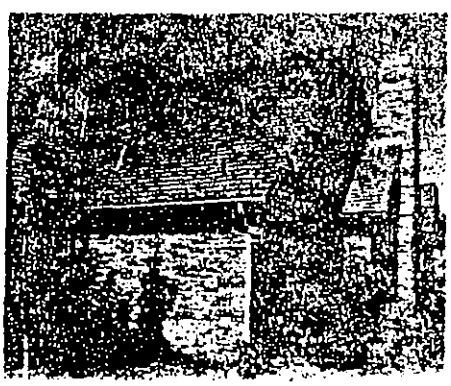
Fire Safe AD-108® may be applied to prestained wood with no detrimental effects. New materials treated with Fire Safe AD-108® may be painted or glued after 24 hours.

Exterior wood surfaces can be easily sprayed to achieve maximum fire retardation.

Fire Safe AD-108 acts as a non-staining, safe fire retardant for fabric wall coverings.



Wood shingles benefit from both the fire retardancy and mild preservative qualities of Fire Safe AD-108.



The non-toxic, non-discoloring properties of Fire Safe AD-108 make it a natural for protecting internal wood surfaces. (Pelican's International)

A full 5-year guarantee.

Fire Safe AD-108® carries a guarantee as tested as a Class C Exterior Fire Retardant and Class B Interior Fire Retardant.

Fire Safe AD-108® passes all the tests.

Major testing organizations have performed extensive laboratory tests and subsequently approved Fire Safe AD-108® for both commercial and residential use. In addition, it has been field tested and approved by State Fire Marshals and Building Officials in major metropolitan areas throughout the country.

Use of a high pressure airless sprayer is required.

COVERAGE:

One gallon covers approximately 100 square feet depending on the absorption quality of the material.

FIRE SAFE AD-108®

A protective application of **FIRE SAFE AD-108®** fire retardant...

... will prevent flamespread when applied to wood surfaces such as shake shingle roofs. Fire Safe AD-108™ is a water soluble chemical whose invisible protection acts both as a fire retardant and a preservative.

Features:

- A pre-condensate that is soluble in water.
- An aqueous solution that is insoluble in water when dry.
- No linear shrinkage.
- 900 degree "F" heat causes material to decompose, char and shrink.
- No moisture absorption.
- Inhibits fungi growth.
- Non-corrosive.
- Non-toxic.
- Resistant to insects, rodents, certain types of molds.
- Mildly antibacterial.

The lightweight aqueous solution sprays easily onto all surfaces.
