REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that the work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval granted.

- ☒ Required inspections for all subcodes for one- and two-family dwellings are as follows:

1. The bottom of footing trenches before placement of footings, except that in cases of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
2. Foundations and all walls up to grade level prior to back filling.
3. All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and /or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.
4. Installation of all finished materials, sealings of exterior joints, plumbing piping, trim and fixtures; electrical wiring, devices and fixtures; mechanical systems equipment.

Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

- ☐ Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:

- ☒ A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".

- ☐ A complete copy of released plans must be kept on the job site.

If you do not understand any of this information, please ask.

Ken Shafer, Brick Township Engineer
Municipal Building
401 Chambersbridge Road
Brick, New Jersey 08723

RE: Status Report
Hess Station # 30279
1672 Route 88
Brick Township (Laurelton), Ocean County, New Jersey
TMS Case#: N13-8900
PI#: 008784

Mr. Shafer,

As you are aware, Hess Station #30279, located at 1672 Route 88, Brick Township (Laurelton) has been re-developed. As part of these activities, the UST piping was upgraded as authorized by the New Jersey Department of Environmental Protection (NJDEP) Notice of Intent (NOI) under TMS # N13-8900. During these site activities four (4) formerly unknown USTs were discovered. These included:

- One (1) regulated 8,000-gallon unleaded gasoline UST
- One (1) regulated 4,000-gallon unknown UST
- One (1) un-regulated 600-gallon fuel oil UST
- One (1) un-regulated 550-gallon fuel oil UST

In accordance with regulations, the two (2) regulated tanks were registered with the NJDEP, cleaned, removed, and sampled. The USTs were constructed of single-walled steel and measured 21.4' by 8' and 24' by 5.4'. The USTs were inspected upon removal and appeared to be in good condition. No holes, cracks or stressed areas were observed.

The two (2) un-regulated tanks were also cleaned, removed, and sampled. These tanks are not required to be registered with the NJDEP. These USTs were constructed of double-walled fiberglass reinforced plastic and measured 7' by 5' and 6' by 4'. The 600-gallon fuel oil UST was inspected upon removal and appeared to be in good condition. No holes, cracks or stressed areas were observed. Some impacted soils were identified in the area of the 550-gallon fuel oil UST. These impacted soils were subsequently removed from the site and the excavation was backfilled with certified clean material. The NJDEP was notified and NJDEP Case # 13-06-25-1546-53 was assigned.

A total of thirty (30) soil samples were collected from the excavations in accordance with the *NJDEP Field Sampling Procedures Manual*, 2005. The samples were analyzed for Extractable Petroleum Hydrocarbons (EPH) Category 1 and Volatile Organic Compounds plus fifteen tentatively identified compounds (VO +15) as required by NJDEP. The analytical results revealed all concentrations below laboratory method detection limits (Non-Detect) or the most stringent Soil Remediation Standards, except for methylene chloride, which is a recognized laboratory contaminant. UST disposal documentation is included in **Attachment A**.

In addition, the pesticide contaminated soil from previous site owner and operator located in the northern corner of the property was excavated and transported offsite for proper disposal. As required by the NJDEP, the area of excavation was then capped with certified clean material and a combination of the building slab and vegetated areas. Clean fill documentation is included as **Attachment B**.

All soil removed was transported to and properly disposed of by Clean Earth of New Castle, DE under facility approval number 133020045. A total of 1518.85 tons of soil were excavated and removed from the site for proper disposal. All soils manifests have been included within **Attachment C**.

The conditions of the groundwater underlying the site will continue to be monitored via the site well network, which consists of three (3) monitoring wells.

EnviroTrac is currently preparing the Site Investigation Report / Response Action Outcome (RAO) for the UST piping and UST removal activities. A copy of the report will be provided to the Municipal Clerk and Health Department upon submittal. In addition, EnviroTrac Ltd. (EnviroTrac) is currently preparing a Remedial Action Report with a Soil Remedial Action Permit to summarize the pesticide remedial actions. Ultimately, a deed notice per NJDEP Remedial Action approval letter dated February 25, 2011 and an Unrestricted RAO will be submitted for this Area of Concern.

If you have any questions or require additional information, please do not hesitate to contact me at 908-757-1900

Sincerely,
EnviroTrac, Ltd.
