REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that the work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval granted.

- [x] Required inspections for all subcodes for one- and two-family dwellings are as follows:
  1. The bottom of footing trenches before placement of footings, except that in cases of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
  2. Foundations and all walls up to grade level prior to back filling.
  3. All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and /or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.
  4. Installation of all finished materials, sealings of exterior joints, plumbing piping, trim and fixtures; electrical wiring, devices and fixtures; mechanical systems equipment.

  Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

- [ ] Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:

- [x] A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".

- [x] A complete copy of released plans must be kept on the job site.

If you do not understand any of this information, please ask.

Re: Project: New Vestibule & Window
School: Midstreams ES
School District: Brick Township
County: Ocean
DOE Project #: 0530-060-10-1066

Dear Mr. Newman:

The New Jersey Department of Education (NJDOE) has forwarded the above-referenced school district's request for permission to allow your agency to perform plan review in accordance with the requirements of the New Jersey Uniform Construction Code (NJUCC). The New Jersey Department of Community Affairs hereby grants the requested permission.

Please be aware that it is your agency's responsibility to ensure the NJDOE has issued final educational adequacy approval or has determined no such approval is required. Furthermore, your agency must obtain the plans that have been approved by the NJDOE from the school district or its design professional.

In addition to plan review for compliance with all of the subcodes of the NJUCC, as they may be applicable, it is also your responsibility to ensure compliance with N.J.A.C. 5:23-3.11A(c) and the NJDOE's public school facility requirements enumerated in Bulletin #00-3, as appropriate.

If you have any questions, please feel free to contact this office at (609) 984-7609.

Sincerely,

John N. Terry

To: davidg@drgaia.com
Subject: Midstreams School

Good Morning David,

I am in receipt of 3 applications. Out of the three, I only have state approvals/releases for two of them. I am missing the state approval/release for Midstreams Elementary School vestibule upgrade, DRG#1036, State plan #530-060-10-1066.

Please provide the approvals/release so we may continue plan review.

Thank you
Have a great Day!

david

Dear Mr. Newman,

Please find the enclosed items in reference to the above mentioned projects:

1. (2) Complete set of plans for each school, signed and sealed by the architect.
2. (2) copy of the specifications shared for all (3) schools, signed and sealed by the architect for each school.
3. Project review permit jacket for each project.

With this application we would like to begin the review process to gain final release for this project.

Please note that the project is being partially funded by a SDA Grant. The checklist requires a technical code review. Upon your review and approval we will require a letter from your office stating the following:

"The plans and specifications for the above named project have been reviewed for code compliance and are hereby released for contractor procurement."

"Contractor shall appropriately apply for all permits once the project that has been awarded by the Brick Township Board of Education"

Please feel free to call should you have any questions or require any additional information. I can be reached at 732-560-7900 or by e-mail at davidg@drgaia.com .

Sincerely,

David Galati

Re: Emma Havens School Vestibule

Sir,

As we discussed on the phone, there was an existing smoke detector prior to the Vestibule being installed. The smoke detector was removed for construction and at the conclusion of the work; we installed a new smoke detector back in the new drop ceiling. It has been tested and works.

THANK YOU

SCHOTT PYRAN® Platinum F
Fire- and Safety-Rated Glass-Ceramic

Description
PYRAN® Platinum F is a fire-protection rated and impact safety-rated glazing material made from a transparent glass-ceramic with a thickness of 3/16" (5 mm). It has a surface applied safety film and is intended for use in safety-rated locations such as door lites, transoms or sidelites, and windows with fire-rating requirements up to 90 minutes (up to 180 minutes in doors).

Features
- Fire-rated up to 90 minutes (up to 180 minutes in doors) with required hose stream test
- Specially-floated glass-ceramic with surface applied safety film
- Transparent and wireless
- Withstands thermal shock
- Approved for use with any standard fire-rated frame with the same rating
- Conforms to positive pressure test standards
- Environmentally-friendly glass-ceramic; produced without hazardous heavy metals arsenic and antimony
- Can be used to construct insulated glazing units
- Can be lightly sandblasted or delivered with surface-applied opacity film
- Available locally throughout North America

General Characteristics
- Thickness: 3/16" (5mm)
- Weight: 2.5 lbs/ft²
- Clear; No amber tint
- Surface: Float glass quality
- Maximum sheet sizes: Approximately 43" x 77"
- Impact rating: ANSI Z97.1 (Class A) and CPSC 16CFR1201 (Cat. I and II)

Gundersen Glass
18 HollyWood Dr.
Brick NJ,08723

Rating Conditions	Location	Max. Exposed Area (ft²)	Min. Edge Engagement (in)	Min. Glazing Clearance (in)	Min. Edge Cover (in)	Min. Bite (in)	Building Code Reference

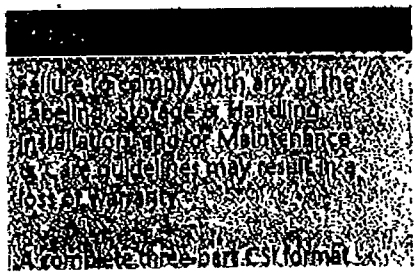
SCHOTT PYRAN® Platinum F Fire- and Safety-Rated Glass-Ceramic

Labeling
After cutting, each lite of PYRAN® Platinum F fire- and safety-rated glass-ceramic shall be permanently labeled according to local building code requirements with product and manufacturer's name, UL certification mark, fire rating, etc.

Storage & Handling
PYRAN® Platinum F fire- and safety-rated glass-ceramic should be handled with care during transportation, storage, inspection, and installation. It should be stored in dry conditions only and needs to be stacked upright or at a slight angle. In addition, the panels must be separated by an appropriate material, such as acid-free tissue paper, and the bottom edge must be supported along its entire length.

Installation
PYRAN® Platinum F shall only be installed into fire-rated frame and win-



Installation

PYRAN® Platinum F shall only be installed into fire-rated frame and window assemblies carrying the same rating. Each panel should be inspected carefully before installation, and any pieces with visible edge or surface damage should be sorted out. All glazing components and the stop height must be chosen according to the PYRAN® Platinum F UL classification. The panel must be placed on calcium silicate or hardwood setting blocks and glazed using PYRAN® Platinum F classified glazing tape, such as closed cell PVC, Fiberfrax tape or Pemko FG3000S90. The installation of the framed unit must comply with the frame supplier's instructions.

PYRAN® Platinum F is a specially developed glass-ceramic that fulfills the fire and safety protection rating requirements. The production process may create certain optical imperfections, such as bubbles or knots. Since these do not generally impair the transparency or the technical performance of the glass-ceramic, they do not represent cause for rejection or replacement.

Maintenance and Care

To maintain the aesthetics, it is important to keep the panel clean. A soft, clean, non-abrasive cloth and a mild soap, detergent, or non-abrasive window cleaning solution is suitable for cleaning. After cleaning rinse immediately with clean water and remove any excess water from the panel surface. Also, do not allow any metal or hard parts of the cleaning equipment to come in contact with the panel surface.

A complete line-item CSI format specification and product warranty information are both available at www.us.schott.com/pyran or by calling (502) 657-4417.
