REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that the work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval granted.

☑ Required inspections for all subcodes for one- and two-family dwellings are as follows:

1. The bottom of footing trenches before placement of footings, except that in cases of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
2. Foundations and all walls up to grade level prior to back filling.
3. All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and /or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.
4. Installation of all finished materials, sealings of exterior joints, plumbing piping, trim and fixtures; electrical wiring, devices and fixtures; mechanical systems equipment.

DCA $2.00
CHECK $62.00

Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

☐ Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:

☑ A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".

☐ A complete copy of released plans must be kept on the job site.

Brick Township Construction Office

Attn: Mark Hibbard

As per our phone conversation on or about January 15th 2013 in reference to permit #13-0156 customers name Brantley, address 1675 Tilford Blvd., Brick Twp. NJ. Lot # 33 Block 83.8.

We arrived on the job site September 19th 2012. We were digging to replace a main water line going from the curb to the house. This was an emergency main water line replacement. We applied for a permit that day. As we were doing the job we were approached by a Brick Twp Road Department Inspector who stopped our work.
He informed us that we needed to apply for a road opening permit, even though we were not within 5' from the curb. We were approximately 7 to 8' away from the curb line. I personally called the Inspector and spoke to him and he informed me that because of the fact we were so close to an easement we did need a road opening permit. I went to the Twp. and applied for road opening permit within 30 minutes of time. He did not stop the work from continuing, our technicians continued there work replacing the water line.

Apparently the Road Dept. Inspector initiated a phone call for an inspection from the construction dept. An inspector arrived shortly after, he watched the technicians as they finished job. Inspector inspected line at the street and also in the basement and gave the approval for back fill. Since that time I have received a phone call on January 7, 2013 telling us there was a permit for the installation of that water line was ready to be picked up. I brought a check into the Twp. On January 8, 2013 and picked up our permit and set inspection up for January 10, 2013. I then received a phone call on January 10, 2013 and was told job failed inspection because the inspector was not able to see the connections at the street. As per our phone conversation I explained at the time that this job was inspected.

I believe you will find when you follow up on your paperwork you will see your Inspector was there prior to the permit being issued. He did inspect the line at the curb and in the basement and it was approved and got the OK to backfill.

If you have any questions please feel free to contact my office.

Respectfully
