32" FIREPLACE SYSTEM WITH 24" AGED SPLIT LOGS FOR A BOLD, FULL FIREPLACE LOOK.

The VENT-FREE ADVANTAGE

Vent-free gas fireplaces continue to be the sensible choice when looking for supplemental heat. Since no outside venting is required, all the heat stays in your home and the high heating efficiency provides comfortable warmth for only pennies an hour. And since vent-free appliances do not require electricity to operate, they are an excellent heat source during power outages. Vent-free gas appliances are environmentally clean, safe, and operate within industry indoor air quality standards as well as being design certified by the American Gas Association.

The MONESSEN ADVANTAGE

Monessen offers the broadest line of vent-free gas fireplace systems with the most realistic ceramic fiber log designs in the industry. From compact bedroom systems to full-size high-tech catalytic systems with remote control, Monessen offers a broad range of decorative options and product selection. When combined with one of the many wood surround options, the Monessen vent-free gas fireplace system brings the dream of a fireplace into your home instantly.

PATENT PENDING CATALYTIC TECHNOLOGY

Monessen has taken the vent-free concept one step further. While traditional vent-free appliances are clean burning and by themselves meet all industry standards for vent-free emissions, catalytic technology achieves a new level of combustion performance which further reduces emissions. Monessen's innovative catalytic filtering system consists of a substrate coated with a precious metal catalyst which chemically reacts with the exhaust gases and converts the emissions to carbon dioxide and water vapor, further reducing carbon monoxide and other particles to well below industry indoor air quality standards.
