Re: **PNC Bank**
Bricktown, New Jersey
FPA No. 06K022GCI

Dear Mr. Renson:

The existing electrical service at the PNC Bank on Chambersbridge Road is 208Y/120V, 400A, 3 phase, 4 wire (144 KW). I spoke with a representative of the utility provider (JCP&L) and was informed that the actual peak demand over the previous 12 months was 23.6 KW. Per NEC 220.35 the existing service load is therefore 23.6 KW x 125%, or 29.5 KW for this installation. The additional load to be added to the service as a result of the renovations is 2 KW connected, and the new total load is 31.5 KW, and is therefore below the capacity of the existing service.

Very truly yours,
