CERTIFICATION IN LIEU OF OATH

I. OWNER SECTION (to be completed if the applicant is the owner in fee)

I hereby certify that I am the owner in fee of the property listed on Page 1. 

Mark the following applicable boxes:

A. () I further certify that a new home (private residence) will be constructed on this property for my own use and occupancy. This dwelling is to be occupied by myself and is not to be used for any purpose other than single family residential use. I attest that all construction, plumbing, or electrical work will be done, in whole or in part, by me or by subcontractors under my supervision, in accordance with all applicable laws; and I further acknowledge that said new home is not covered under the New Home Warranty and Builders Registration Act (N.J.S.A. 46:3B-1 et seq.) and that such fact shall be disclosed to any person purchasing this property within ten years of the date of issuance of a certificate of occupancy.

I UNDERSTAND THAT IN MARKING BOX A, I ACKNOWLEDGE THAT I AM ASSUMING RESPONSIBILITY FOR THE WORK DONE ON SAID PROPERTY, THE CONDITION OF THE PROPERTY PRIOR TO, DURING, AND AFTER ANY WORK PERFORMED, AND FOR THE PERFORMANCE OF THE SUBCONTRACTORS I HIRE, EMPLOY, OR OTHERWISE CONTRACT OR WITH WHOM I MAKE AGREEMENTS TO PERFORM WORK. I AM VOLUNTARILY AND KNOWINGLY ASSUMING THIS RESPONSIBILITY.

B. () I further certify the following as required by the New Jersey Uniform Construction Code, N.J.A.C. 5:23-2.15(e)1.vii:

I personally prepared the plans submitted for: 1) the new home referred to in A.; or, 2) an addition, alteration, renovation, or repair to an existing single family residence owned and occupied by myself and located on the property listed on Page 1; or, 3) a new structure that will be physically separate from, but that will be deemed part of, an existing single family residence that is owned and occupied by myself and located on the property listed on Page 1.

C. () I further certify that I will perform or supervise the following work:

C.1. () Building C.2. () Fire Protection

I further certify that I will perform the following work:

C.3. () Electrical C.4. () Plumbing

D. () I agree to advise all contractors on this project that they are required to be registered with the New Jersey Division of Taxation and to comply with all New Jersey tax laws.

I further certify the following as required by the Uniform Construction Code, N.J.A.C. 5:23-2.15(a)5: All required State, county, and local prior approvals have been given, including such certification as the construction official may require.

I understand that if any of the above statements are willfully false, I am subject to punishment.

Signature  Date 

II. AGENT SECTION

(to be completed if the applicant is not the owner in fee)

I hereby certify the following as required by the New Jersey Uniform Construction Code, N.J.A.C. 5:32-2.15(d): the proposed work is authorized by the owner in fee; and I have been authorized by the owner in fee to make this application as his agent.

I further certify the following as required by the Uniform Construction Code, N.J.A.C. 5:23-2.15(a)5: All required State, county, and local prior approvals have been given, including such certification as the construction official may require.

I agree to advise all contractors on this project that they are required to be registered with the New Jersey Division of Taxation and to comply with all New Jersey tax laws.

I understand that if any of the above statements are willfully false, I am subject to punishment.

TOWNSHIP OF BRICK

ZONING PERMIT

Date of Issue: June 14, 1995 1995 Z 0898

Block 648 Lot 1 & 10.01 Zone B-3, H.D.

Property Address: Chambers Bridge Road, Brick Plaza

Owner: Federal Realty Trust (Phone): 255-4944

Applicant: Donald Miller & Son Construction (Phone): 920-1800

Use: Brick Plaza Unit (Former A & P).

Proposed Construction (if any): Renovation and addition for "Nobody Beats the Wiz".

Includes Block 671; Lots 2,4,8,11 & 12.

Conditions: Site plan approved by Planning Board.

Case No. PB-2102-PSP-V/FSP-2/94.

Resolution No. R-43-94.

Map signed June 9, 1995.

Please note that Building Permits, as well as Zoning Permits, must be obtained prior to any construction.

This permit shall be null, void and of no effect if any of the facts contained in the application upon the basis of which this permit was granted are false or untrue in any material respect. This permit shall expire one (1) year after the date of issuance if the use or substantial construction has not been commenced.

Sean Kinnevy

Random fissured panels and tile Lightly fissured,
heavily perforated surface

- Regular and FIRECODE panels and tile for fire-rated assemblies
- Light reflectance: LR1 for all white panels
- Surface burning characteristics: Class A rated on all products; flame spread 25, smoke developed 10 (ASTM E84 test procedure)
- Thermal performance: Up to R-2.18
- Interior finish classification: Type III, Form 2, Class 25 (Federal Spec. SS-S-118B/ASTM E1264); Class A (NFPA 101)
- Maintenance: With optional plastic coating, can be cleaned easily with only a damp sponge. Coating has been Gardner-Scrubability-tested to 3,000 cycles
- Available in metric sizes

**Omni Fissured**

Color—White plus 24 colors¹

Test Data

Fire & Smoke Tests

FLOORING RADIANT PANEL TEST

FEDERAL FUNDING REQUIREMENTS

The Department of Health and Human Services has adopted the guidelines established in the NFPA Life Safety Code for interior floor finish flammability as pertaining to health care occupancies. The code specifies that flooring installed in corridors and exitways shall be Class I in accordance with the critical radiant flux ratings, interior floor finish. A Class I rating requires a minimum critical radiant flux of 0.45 watts per square centimeter in accordance with standard test method, NFPA 253 (or ASTM-E648), for critical radiant flux of floor covering systems using a radiant heat energy source. This procedure is routinely performed by independent testing laboratories such as United States Testing Company, Inc.

PermaGrain®/Timeless® Series "75"
GenuWood® II

Heat Flux Result

0.93 watts/cm²
0.96 watts/cm²

GENERAL COMMERCIAL REQUIREMENTS

For general commercial construction, the guideline is a minimum average radiant heat flux of 0.22 watts/cm².

PermaGrain/Timeless Series

0.34 watts/cm²

GENERAL INFORMATION

The Flooring Radiant Panel Test is also widely accepted by industry and government agencies such as Department of Transportation, General Services Administration, and the Veterans Administration. ASTM and NFPA test consensus standards have been completed.

This test was developed because of dissatisfaction with previous procedures. The Flooring Radiant Panel Test measures a vital ingredient of fire: radiant energy. It applies to corridors and exitways. The test result indicates whether and how far the corridor flooring will spread the flame front. Compared with the above results, most carpeting would be assigned a value near the mid-range (0.50 watts/cm²) or lower.

FLAME PROPAGATION CLASSIFICATION TEST

FEDERAL FUNDING REQUIREMENTS

Federal legislation mandates that flooring specified for Health Care Occupancies and other Federally funded construction must have a Flame Propagation Index of 4 or lower. The test procedure is Underwriters Laboratories Flame Propagation Test (UL992).

PermaGrain/Timeless Series II
GenuWood II

Flame Propagation Index

0.5 (UL Listed)
0.9

GENERAL COMMERCIAL REQUIREMENTS

The Classification Index requirement for flooring material used in general construction areas is a rating of 8 or lower.

GENERAL INFORMATION

The Underwriters Laboratories Flame Propagation Test, also referred to as the Chamber Test, was designed to classify flooring materials.

The test results for other flooring products are:

	Index
Synthetic carpet	0.7 to 30
Wool carpet	0.3 to 1.7
Acrylic sheet	1 to 2
Untreated red oak	1.0
Vinyl tile	0.5

STEINER TUNNEL TEST

FEDERAL FUNDING REQUIREMENTS

Federal legislation mandates that flooring specified in Health Care Occupancies and other Federally funded construction must meet a flame spread rating of not more than 75, based on the Steiner Tunnel Test, ASTM-E84 or a flame spread index of less than 4.0 when tested in accordance with Underwriters Laboratories Chamber Test, UL992.

Tunnel Test		Chamber Test	
	Flame Spread		Flame Spread Index
PermaGrain/Timeless Series "75"	65	PermaGrain*/Timeless Series II	0.5
GenuWood SFR	50	GenuWood* II	0.9

PermaGrain/Timeless Series "75"

When installed with RK-1 adhesive is UL Listed:

Flame Spread	65
--------------	----

GenuWood SFR

GenuWood SFR when installed with BB-120 primer is rated:

Flame Spread	50
--------------	----

GENERAL INFORMATION

The Steiner Tunnel Test procedure (ASTM-E84 or UL-723) uses a special fire test chamber which is designed to evaluate the burning characteristics of flooring and other construction materials. The department of Health and Human Services requested the development of such a test and it is now approved by the General Services Administration, as well as state and local requirements for fire hazard classification.

	Flame Spread	Smoke Developed
Inorganic cement board	0	0
Untreated red oak flooring	100	100
PermaGrain/Timeless Series II	110	n/a
GenuWood II	135	705
Permétage*	15	n/a

SMOKE DENSITY TEST

The Department of Health and Human Services has established that floor covering materials used in Health Care Occupancies must have a Specific Optical Density of 450 or less. The test procedure is the NBS Aminco Smoke Chamber, ASTM-E662 or NFPA-258 method.

	Specific Optical Density (Combined Value)
PermaGrain/Timeless Series II	69
GenuWood II	248

The influence of smoke is the most frequent cause of death in a fire situation. For this reason, the National Bureau of Standards developed the Smoke Chamber Test with Underwriters Laboratories. The results obtained are important criteria when selecting flooring materials.

OSHA PEL = 100 FOR MINERAL SPIRITS

N.A. - NOT APPLICABLE

SECTION III - PHYSICAL DATA

BOILING RANGE : 212 - 390 F
ODOR : MINERAL SPIRITS
APPEARANCE : COLORED DROPLETS
VOLATILE BY WEIGHT : 74.2%
VOLATILE BY VOLUME : 83.6%

VAPOR DENSITY : IS HEAVIER THAN AIR
EVAPORATION RATE : IS SLOWER THAN ETHER
SOLUBILITY : MISCIBLE W/WATER
PRODUCT DENSITY : 0.4 LBS./GAL. (U.S.)

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION:

FLASH POINT: 155 F LEL: 0.9%
(SETAFLASH CLOSED CUP) VEL: 7.0%

OSHA - COMBUSTIBLE LIQUID - CLASS IIIA
COMBUSTIBLE LIQUID

EXTINGUISHING MEDIA: CARBON DIOXIDE DRY CHEMICAL FOAM

UNUSUAL FIRE AND EXPLOSION HAZARDS: KEEP CONTAINERS TIGHTLY CLOSED. ISOLATE FROM HEAT, SPARKS, AND OPEN FLAME. DO NOT APPLY TO HOT SURFACES. CLOSED CONTAINERS MAY EXPLODE WHEN EXPOSED TO EXTREME HEAT.

SPECIAL FIREFIGHTING PROCEDURES: WATER MAY BE INEFFECTIVE. WATER MAY BE USED TO COOL CLOSED CONTAINERS. IRRITATING C TOXIC CASES MAY BE PRESENT. USE SELF-CONTAINED BREATHING APPARATUS.

SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVER EXPOSURE: NOT KNOWN TO PRODUCE CHRONIC OR CUMULATIVE EFFECTS WITHIN RECOMMENDED GUIDELINES. INHALATION: VAPOR IRRITATING TO EYES, NOSE AND THROAT. CAN CAUSE HEADACHE, DIZZINESS, NAUSEA, WEAKNESS, LOSS OF CONSCIOUSNESS. PROLONGED OVEREXPOSURE MAY CAUSE PERMANENT INJURY. SKIN: BRIEF CONTACT NOT EXPECTED TO BE HARMFUL. PROLONGED AND REPEATED CONTACT MAY CAUSE DRYING OF THE SKIN, AND ABSORPTION OF HARMFUL AMOUNTS. EYE CONTACT: BURNING AND IRRITATION. INGESTION: DO NOT TAKE INTERNALLY. MAY CAUSE NAUSEA, VOMITING, DIARRHEA AND OTHER TOXIC EFFECTS.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: INDIVIDUALS WITH CHRONIC RESPIRATORY PROBLEMS SHOULD NOT BE EXPOSED TO VAPOR OR SPRAY MIST.

PRIMARY ROUTES OF ENTRY: DERMAL INHALATION INGESTION

EMERGENCY AND FIRST AID PROCEDURES: INHALATION: PROVIDE FRESH AIR. GIVE ARTIFICIAL RESPIRATION OR OXYGEN IF NECESSARY. CALL A PHYSICIAN. SKIN: WASH THOROUGHLY WITH SOAP AND WATER. REMOVE CONTAMINATED CLOTHING AND SHOES. WASH CLOTHES THOROUGHLY BEFORE RE-USE.

SECTION VI - REACTIVITY DATA

STABILITY: THIS PRODUCT IS STABLE UNDER NORMAL STORAGE CONDITIONS.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR UNDER NORMAL CONDITIONS.

HAZARDOUS DECOMPOSITION PRODUCTS: COMBUSTION PRODUCES CARBON MONOXIDE AND CARBON DIOXIDE. UNIDENTIFIED ORGAN COMPOUNDS MAY BE FORMED.

CONDITIONS TO AVOID: STRONG ACIDS, STRONG ALKALIS, STRONG OXIDIZERS.

INCOMPATIBILITY: NONE

Bethesda, Maryland 20814**

**Reference: Report of Field Review of
Post-tensioning Assemblies
for Existing Trusses at:
Brick Plaza Shopping Center
Brick, New Jersey**

Dear Mr. Klacik:

Paulus, Sokolowski and Sartor, Inc. has visited the site on two separate occasions for the purpose of reviewing the installation of the truss post-tensioning assemblies.

The first visit was performed on Wednesday, September 20, 1995 to verify all the post-tensioning assembly components, for all of the trusses, have been installed in accordance with the requirements depicted on the construction documents. This was done prior to the actual post-tensioning procedures so that any deficiencies which may have been found could be corrected within the constraints of the project schedule. Our field observations did not reveal any deficiencies at that time.

Mr. Gary Klacik
Federal Realty Investment Trust
October 3, 1995
Page 2

Our second visit was on Friday, September 22, 1995. The purpose of our presence at the site on that occasion was to observe the performance of the post-tensioning procedures. We verified the jack forces specified on the construction documents were adhered to. The jacking proceeded for all of the trusses without any problems and all of the requirements of the construction documents were met.

We trust the post-tensioning truss upgrade provided you with a cost effective, unobtrusive and flexible solution to the code compliance issues associated with the existing timber trusses. It has been a pleasure providing our engineering services. If you have any questions, or if you require any additional services, please contact us.

Very truly yours,

PAULUS, SOKOLOWSKI and SARTOR, Inc.

DIV. OF INSPECTION

Dear Art;

The calculations for the plumbing fixtures at Nobody Beats the WIZ in Brick Plaza shall be as follows:

Total Occupancy: 889 Persons

Table 7.24.1.C National Standard Plumbing Code Requirements:
Bldg. Use Group Water Closets

	# of Persons of each sex	Male	Female
Mercantile	51-300	2	2
	ea. add'l 300 over 300	add 1	add 2

Presuming an equal number of persons of each sex are present, Note #4 can be applied which reduces the total census to 60% of total: $889 \times 60\% = 533$ total persons. Therefore, according to the table above, number of fixtures required is 3 water closets for Men and 4 water closets for Women. Total number of fixtures provided is 2 water closets and 2 urinals for Men and 5 water closets for Women.

In addition and according to the same table, lavatories required shall be 1/2 the number of required water closets. Therefore, 2 lavs required for Mens Room and 2 lavs required for Womens Room. In each case 2 lavs have been provided. Two drinking fountains have also been supplied and according to the table 1 drinking fountain is required for each 1000 persons occupancy.

Should there be any questions regarding these calculations, please do not hesitate to call.

Sincerely,

Beth Ann Tobias, RA

Attention: Gary Klacic

Dear Mr. Klacic:

In response to your request for a final inspection and issuance of a Certificate of Occupancy/Approval, be advised that there remains a final balance due and owing to Brick Township's Affordable Housing Trust Fund in the amount of \$5,122.00.

For your information I have enclosed a copy of the Certificate of Compliance. Prior approval will be granted upon receipt of the balance due.

If you have any questions, please feel free to contact me.

RE: Block 648/671, Lots, 1-9, 2-12
The Wiz/ Brick Plaza Shopping Center

Attention: Gary Klacik

The Township of Brick has enacted Ordinance 354-2C-93 in conjunction with our Fair Share Plan, which was certified by the New Jersey Council on Affordable Housing on February 3, 1993.

This Ordinance requires that applicants for commercial construction which affects an added value assessment of \$15,000.00 or more pay a fee in the amount of 1% of the total value added assessment. The Municipal Tax Assessor has estimated that the added equal assessed value for the work to be completed under the construction permit application for Blocks 648/671, Lots 1-9, 2-12, is \$1,024,400.00, which results in a total fee due in the amount of \$10,244.00. Therefore, it is required that one half of the required fee (\$5,122.00) be paid at this time, said check being made payable to the Township of Brick for deposit in the Affordable Housing Trust Fund and the balance to be collected prior to the issuance of the Certificate of Approval/Occupancy.

We suggest that you notify this office two weeks prior to your request for a Certificate of Approval, so that the Tax Assessor's office will have adequate time to prepare a final assessment.

Until we receive the above amount due, your application will remain in the Affordable Housing Office.

If you have any questions or wish to discuss this matter, please contact me.

Sincerely,

Carol A. Wolfe / (B)

Timber Truss Repair Review Report

Dear Mr. Carr:

PS&S visited the site on Wednesday, July 5, 1995 for the purpose of reviewing the repairs to the existing trusses at the "Nobody Beats the WIZ" project. The trusses under review support the roof over the spaces previously occupied by the bakery and the pizza restaurant.

The trusses have been repaired in accordance with the requirements indicated on the truss repair drawings with the following exception:

Several incorrect bolt spacings and end distances were detected at the bottom chord splice connections of Truss number 11. We have, however, reviewed these areas and they will suffice as constructed.

This concludes our review of the truss repairs. If you have any questions, or if you require any additional services, please contact us.

Very truly yours,

PAULUS, SOKOLOWSKI and SARTOR, Inc.

Re: The Wiz - Brick Plaza

With regards to your request dated October 18, 1995 to stock merchandise at the above referenced location prior to the issuance of a Certificate Of Occupancy.

I reviewed your inspection history, to verify that a sprinkler test was done and approved. Our record do indicate Joseph Evaristo, Fire Subcode made this inspection October 2, 1995. With this inspection approval I have no problem with granting permission to stock merchandise.

Very truly yours,

Arthur J. Cierzo
Construction Official

Timber Truss Repair Review Report**

Dear Mr. Carr:

PS&S visited the site on Wednesday, July 5, 1995 for the purpose of reviewing the repairs to the existing trusses at the "Nobody Beats the WIZ" project. The trusses under review support the roof over the spaces previously occupied by the bakery and the pizza restaurant.

The trusses have been repaired in accordance with the requirements indicated on the truss repair drawings with the following exception:

Several incorrect bolt spacings and end distances were detected at the bottom chord splice connections of Truss number 11. We have, however, reviewed these areas and they will suffice as constructed.

Mr. Richard Carr
Federal Realty Investment Trust
November 7, 1995

**Reference: Report of Field Review of
Post-tensioning Assemblies
for Existing Trusses at:
Brick Plaza Shopping Center
Brick, New Jersey**

Dear Mr. Klacik:

Paulus, Sokolowski and Sartor, Inc. has visited the site on two separate occasions for the purpose of reviewing the installation of the truss post-tensioning assemblies.

The first visit was performed on Wednesday, September 20, 1995 to verify all the post-tensioning assembly components, for all of the trusses, have been installed in accordance with the requirements depicted on the construction documents. This was done prior to the actual post-tensioning procedures so that any deficiencies which may have been found could be corrected within the constraints of the project schedule. Our field observations did not reveal any deficiencies at that time.

Mr. Gary Klacik
Federal Realty Investment Trust
October 3, 1995
Page 2

Our second visit was on Friday, September 22, 1995. The purpose of our presence at the site on that occasion was to observe the performance of the post-tensioning procedures. We verified the jack forces specified on the construction documents were adhered to. The jacking proceeded for all of the trusses without any problems and all of the requirements of the construction documents were met.

We trust the post-tensioning truss upgrade provided you with a cost effective, unobtrusive and flexible solution to the code compliance issues associated with the existing timber trusses. It has been a pleasure providing our engineering services. If you have any questions, or if you require any additional services, please contact us.

Very truly yours,

Zoning Permit Application

Dear Mr. Kremmel:

Your application for a Zoning Permit for an interior alteration and small addition for the referenced property is denied because under Section 190-240 of the Township Code, a site plan must be submitted to and approved by the Planning Board for any commercial addition.

Since the proposed addition is about 625 square feet, you may apply for abridged site plan approval. Application forms can be obtained from Joan Kull, the Planning Board Secretary.

Please feel free to contact this office for any additional information or assistance.

Very truly yours,

Sean Kinnevy

18 October 1995

Mr. Art Cierzo
Construction Official
Building Department
401 Chambers Bridge Road
Brick, NJ 08723

Dear Art;

The calculations for the plumbing fixtures at Nobody Beats the WIZ in Brick Plaza shall be as follows:

Total Occupancy: 889 Persons

Table 7.24.1.C National Standard Plumbing Code Requirements:
Bldg. Use Group Water Closets

	# of Persons of each sex	Male	Female
Mercantile	51-300	2	2
	ea. add'l 300		
	over 300	add 1	add 2

Presuming an equal number of persons of each sex are present, Note #4 can be applied which reduces the total census to 60% of total: $889 \times 60\% = 533$ total persons. Therefore, according to the table above, number of fixtures required is 3 water closets for Men and 4 water closets for Women. Total number of fixtures provided is 2 water closets and 2 urinals for Men and 5 water closets for Women.

In addition and according to the same table, lavatories required shall be 1/2 the number of required water closets. Therefore, 2 lavs required for Mens Room and 2 lavs required for Womens Room. In each case 2 lavs have been provided. Two drinking fountains have also been supplied and according to the table 1 drinking fountain is required for each 1000 persons occupancy.

Should there be any questions regarding these calculations, please do not hesitate to call.

Sincerely,

Beth Ann Tobias, RA
Project Manager
