Rain ran off the hills and washed subsoil and red water all over a section of my patio near the garage, and into my arborvitaes bed that runs along the backyard temporary fencing. I spoke with the onsite foreman when I first noticed the runoff. He subsequently reported it to Mumford Holmes who reinforced the mesh screening on the chain-link fence to keep the subsoil from running off; however, it occurred again in early July, after they had reinforced the fence.</p> <p>In both instances Mumford has been responsive to my immediate problem, and they have hosed off or power washed the dirt from the patio. However, my arborvitae beds are still covered with a layer of red subsoil deposited by the runoff.</p> <p>Last week (August</p> | Regular Mail | Completed |             | Engineering         | Engineering       | croth         | Christopher Roth   | croth       | Christopher Roth | 2204  | 15.02 | ROGER MUMFORD HOMES LLC | 247                 | RED BANK   |

Not as bad but still dirt covered a portion of the patio. I power washed it off myself this time and did not advise Mumford homes.                                                                                                                                                                                                                                                                                                                                                          |              |           |             |                     |                   |               |                    |             |                  |       |     |                   |                     |            |
|                 |                  |                       |                        |                 |                      |      |           |          |              | Currently, the excavation hills have been backfilled and the site roughly graded but there is still not any topsoil or sod. However, as stated above, after heavy rains, I continue to get water which deposits a layer of dirt on one section of the patio. I am concerned, looking at the current grading, that a runoff problem will exist even after the site is sodded. The property is much higher than the previous house and the grading from both houses slopes steeply towards the SW corner of my property and my neighbor, where the runoff occurs. |              |           |             |                     |                   |               |                    |             |                  |       |     |                   |                     |            |

It appears to be a commercial advertisement for coffee attached to the side of the fence of the residential property. Although I admit, it is a great place to advertise if you want to get a lot of exposure, I would assume we don't want residential properties turning their fences into billboards. This appears to be at 944 Rahway Avenue. I do also hope that you will keep my name confidential in addressing this issue.</p> <p>Thank you.</p> | Regular Mail | Completed |             | Engineering         | LandusePro        | croth         | Christopher Roth   | zkaras      | Zuzana Karas     | 4601  | 27  | RAMPELMANN, JULIAN & ZAPATA, L R | 944                 | WESTFIELD  |

We live directly across from it and can tell you that they have done nothing but be an eye sore in our neighborhood. Currently it is not boarded properly. Almost half of the garage is exposed This is unacceptable. Any number of beings can or dwell at this property. There needs to be some accountability for the property owners. | Portal       | Reviewed         | 03/17/2022  | Engineering         | LandusePro        | croth         | Christopher Roth   | dsammet     | Don Sammet       | 2902  | 5   | NNG REAL PROPERTY I LLC            | 777                 | CLIFTON    |
