Narrative:

A signal nine response for an outside fire with exposure with an automatic aid response. On arrival nothing was showing and command was established. The occupant reported their grill caught fire while cooking and the siding began melting. All mutual aid units were canceled in route. FD personnel observed approximately four foot by six foot section of siding on the rear of the home had melted. The grill fire was extinguisher prior to FD arrival. FD personnel secured the gas to the grill and moved it away from the house. FD personnel used the thermal imaging camera to check for extension on the exterior and interior of the residence with none found. FD personnel removed the affected siding to check for fire extension and none was found. FD personnel completed final extinguishment and wet down the area. The scene was turned back over to the residence. No further FD action taken.
