Comments

FD responded to alarms activated in the building for a 2nd time. On arrival alarms were sounding. FD investigated and alarm panel read ground floor elevator lobby. The area was checked. There was a slight odor of a overheated belt coming from the elevator shaft. FD had the elevators shut down. The building was checked, elevator room, elevator lobby and the elevator shaft all were clear. The alarm system still would not reset. FD had management put the alarm system in test, and to have the alarm system company to respond ASAP.

Comments

E3 arrived on scene 353 Park ave to assist Weehawken PD extinguish an outdoor fire in a fire pit. Weehawken PD stated they told occupants to extinguish the outdoor fire pit which was on top of a hill in a dangerous condition but they did not comply. The fire was contained and covered but was surrounded by dry brush. ACO DeGennaro And FF Romo were accompanied by 4 officers to extinguish fire, one of the occupants picked up a stick and swung it at FF Romo as we approached. FF Romo did not get hit. The officers placed the occupant under arrest. Fire was extinguished with a water can. Officer in Charge was Captain Kelly and Sgt Same.

Comments

Sandra Zarabi rang the doorbell of E-5's quarters complaining that another tenant in her building left candles burning unattended fearing it created a dangerous condition. E-5 investigated and found multiple candles burning near curtains. E-5 CO found the window open, and extinguished candles without forcing entry.

Comments

Companies arrived on scene, E3 CO reported a fully involved van fire. PAPD and Port Authority FD were on scene using foam on vehicle fire. E3 stretched line to back up PAFD. E4 arrived and backed down to E3 to supply water. E4 gained water via hydrant on the helix. L1 gained entry into van and removed side sliding doors. Vehicle fire was completely extinguished by all companies without incident. Companies picked up, Port Authority towed vehicle and NH companies assisted in road clean up. Incident was terminated and all companies were returned.

Comments

Engine 5 ladder 3 and Battalion 2 responded on a report of a car fire. Engine 5 arrived first to find a MVA with no injuries and no fire. Engine 5 could handle the incident and notified fire dispatch to cancel battalion 2 and Ladder 3. Engine 5 applied speedy dry to a small leak. Engine 5 handed the incident to the Weehawken police.

Comments

Companies found a parked car that had been parked by the owner and the brakes were overheated due to a locked caliper. The odor of brakes, the blue colored rotor, and the recent brake work indicated that the front passenger side brake was locked and needed to be serviced. The driver was instructed to leave the car there until she could get it towed to her mechanic. The Weehawken Police were also on the scene.

Comments

Companies arrived at 1919 Park Ave to a single vehicle MVA with Port Authority Members already on the scene working on extricating 2 occupants. NHFD assisted with securing the scene and removing any hazards from the working area. A primary search was conducted around the perimeter of the accident to check for any occupants that might have been ejected from the vehicle. The search was negative. Weehawken PD was on the scene. 2 occupants were removed from the vehicle and transported by Weehawken and UC EMS. JC Medical Paramedics were also on the scene. Precautionary line was stretched to protect rescuers and occupants in the vehicle. There was no fire involving the vehicle. Port Authority and Weehawken PD were coordinating the vehicle to be towed.

Comments

Arrived on the scene and established command. Building was being evacuated. Was met by building superintendant and told that it was food on the stove on the first floor. Investigated the first floor apartment and confirmed food on the stove with no extension. Reduced assignment and reset alarm system. Found multiple fire code violations on premises and forwarded Notice of Complaint to Weehawken Fire Prevention. Terminated command.

Comments

We responded to alarms activated. Our investigation revealed a malfunctioning generator on the second floor of the residential building. When companies arrived the insulation around the generator's flue was on fire. Companies quickly turned off the generator which self extinguished the fire. Companies stretched a precautionary hoseline from the standpipe. The system was augmented by companies feeding the siamese connection. We conducted Thermal scans to ensure the fire hadn't extended from the point of origin. The scans didn't show any heat. The exposed vent pipe did have a temperature of 1100 degrees and due to same we inspected the entire run of the flue, to the roof line, to ensure the fire was contained to its origin. Although building maintenance was uncertain to the exact location of the flue within the walls we did get a schematic depicting its location and all Thermal scans around said area were clear with no heat accumulation. We checked and re-checked the generator room and the possible run of the flue to ensure the fire was out. Our inspections revealed no heat source. We concluded our operations by checking the building for carbon monoxide accumulation. All floors had 0 ppm. Maintenance called Gen-serve for the generator and they were responding. The fire alarm system would not reset so the system was silenced. The concierge Pete Abreu and the manager, Jessica Delima were both informed of the situation and I was informed they called their fire alarm company to respond. I informed both parties a fire watch had to be maintained until the system was fully operational. I concluded by informing them someone had to walk the building every 15 minutes and a log had to be

Comments

Companies investigated an electrical odor in the basement. An overloaded washing machine was the source of the odor. Water was shut to the machine and it was unplugged. President of the building association was notified of the issue. Area was all clear with thermal cameras. Alarms were reset.

Comments

This was a small rekindle of a rubbish fire the night before. Weehawken P.D. was on the scene and noticed a very slight smoke condition and called in the alarm. SQ-7 stretched one line and proceeded to soak down the area until all visible smoke was gone. Incident terminated.

Comments

We responded to downed electric wires with the street and brush on fire. Our investigation revealed the aforementioned correct. Upon arrival we called for PSE&G to respond. We stretched hoselines from each end of the road to extinguish the brush fires and control the burning areas around the electrically connected wires, protecting exposures. Companies utilized their Thermal Imaging Cameras to ensure all fire in the brush was out. Once we we informed the wires were de-energized we used copious amount of water to extinguish the asphalt road fire. We also wet down the surrounding brush to extinguish any low smoldering fire. We were informed by the Weehawken Police that vagrants lived in the brush near the fire. We inspected the area for same and all was clear. Suez water was also called to investigate what appeared to be a broken water line near the incident. Throughout the incident we networked with the following people and agencies: Director Welz, Gio Ahmed, Weehawken Police Dept., DPW, and PSE&G. Once all fire was extinguished and the roadway was no longer smoking we terminated the incident.

Comments

E3 arrived at 100 parkview terrace with PD already on scene to a reported transformer fire. PD stated that there was no fire and that residents did indeed have power in the block. E3 verified there was no transformer fire and checked each transformer with the Thermal Imaging Camera. Once all clear with the thermal scan and a confirmation from residents that they did indeed have power, E3 terminated the incident

Comments

Light pole located in front of the incidents adress provided dangerous conditions.The causes included oil spewing out of the electrical tranformer in the street,and minor sparks coming out of it.E-5 proceeded to secure the area and make sure no civilians walked thru the danger zone,and have PS&G come to the scene in order to asses the damage.PS&G stated that they would handle the incident upon arrival.E-5 terminated the inccident shortly after.

Comments

E4 arrived on the scene and met Wehawken PD. PD stated that they had experienced a 20 second power outage but that power had come back up. E4 used flashlights and TIC to scan transformers down Hackensack Plank Road. No fire, No heat, No Smoke, No Odor. E4 remained on the scene for approximately 10 minutes. Nothing showing, power remained constant in the area. E4 noticed transformers are all covered by heavy vegetation. Incident terminated.

Comments

E3 and E4 were dispatched for a " transformer fire " upon arrival the street lamps had no power. Weehawken PD had the street closed in both directions and PSE&G was on the scene assessing the situation. PSE&G advised the heavy vegetation came in contact with the power lines causing the the transformer to fail. E3 and E4 remained on scene until PSE&G disconnected the high voltage lines from the affected transformer. Weehawken PD and PSE&G remained on scene awaiting additional PSE&G crews. Incident was terminated.

Comments

We responded to a smoke condition in apartment 5. Our investigation revealed a malfunctioning battery charger within the apartment's hallway closest which was the culprit. We examined the surrounding area and no heat source was found with our Thermal Imaging Cameras. The charger was brought to the exterior. Command was terminated.
The tenant was Daniel Vinakovsky 201-815-8737.

Comments

Reported oven fire apartment 230. Companies investigated a cook top fire in apartment 230. WPD attempted to extinguish the fire before FD arrival. Companies completed extinguishment conducted primary searches of the apartment and checked for extension of fire in the kitchen. All areas were negative. PPV Ventilation was needed on the 2nd and 3rd floors. The Origin of the fire was the stove cook top. The cause of the fire was accidental. Damage to the oven and the section of wall directly above the cook top cause by overhaul. WPD member was treated by EMS at the scene. Apartment 230 tenant Shota Lomsadze 908-376-8621. Community Manager Melisa Aquiere 201-353-1500

Companies arrived on the scene and found a Fire at a second floor window of a two story frame attached on both the B & D Side. Companies stretched a 1 3/4 " Attack Line and Located confined and extinguished the fire. A Back up line of 1 3/4" was stretched and charged. Roof operations raised ground ladders to the roof and cut a 4x4' vent hole above fire and vented out the products of combustion. A second alarm was struck for manpower. Companies entered both exposures and checked for Fire extension. No Fire extension into exposures #7 & #11. Companies removed all occupants of Fire building and both exposures. A Primary search was conducted in the Fire building and both exposures with a second search all were negative. Utilities were shut in the Fire building #9 Ridgley and gas was shut off in #7 Ridgley for a gas leak PSEG responded and fixed the gas leak in 7 Ridgley. CO Meters were clear at termination. Thermal cameras were also clear at termination. Weehawken Arson Investigator Capt. White #95 & Officer Poole #120 responded to the scene. Capt. Roa #86 was scene officer. Weehawken and Union City EMS responded to the scene. Salvage and Overhaul was performed to the Fire building and exposures. The vent hole was

also covered at the scene. Owner of the Fire Building #9 is Ray Leon, The Contractor for #9 Ridgley was Hammer Construction 'Danial Sanchez' Owner of #7 Exposure is Gary Nicol. The only damage in #7 was a broken lock. Owner of #11 is James Reamer No damage in #11. Weehawken Building Department Shawn Masterson responded to the scene. In the Fire apartment it was just being finished up from a renovation from a previous Fire with no furnishings. Fire originated around a floor sanding machine in the closet. Released the scene to the Weehawken Arson Investigator and Weehawken Police remained on the scene on Fire Watch until the investigators can return in the morning.

Comments

Tenant on top floor apartment called in an oven fire. Upon arrival companies found no fire, with a haze and odor of burning. Tenant was using an aer sol flex sealer spray, which caused a flash fire. Tenant stated that he obtained some minor burns of his face. He and his wife were both transported to a local hospital by ambulance. Building was left clear with no extension from stove area. Gas was disconnected to stove.

Comments

We responded to smoke in the building. Our investigation revealed a malfunctioning boiler which was causing the smoke condition. We shut down the emergency switch to the boiler along with the gas and electric supplies to same. We inspected the surrounding area for fire extension, with our Thermal Imaging Cameras, and all was clear. We completed the incident by using positive pressure fans to ventilate the building. We monitored the building for CO accumulation and 0 ppm were found throughout. The manager, Mr. Baisa, was informed of the situation with the boiler and that the building had no heat. He stated he would call his plumber. Command was terminated.

Comments

Companies investigated an odor on the first floor of the building near the office areas. All Christmas decorations, electrical outlets, fluorescent lights, elevator shafts, HVAC System, electrical panel, electrical equipment, extension cords and all rooms on the first floor were inspected and cleared. Thermal Imagine cameras were utilized during the inspection to locate any hot areas as well. The fire alarm system never activated. After an extensive inspection of the building the source of the odor could not be located and no cause for alarm was found. The incident was terminated. The Weehawken Police were also on the scene.

Comments

Reported Kitchen fire 961 Blvd. East. Companies reported a heavy smoke condition on the 2nd floor. 1 3/4 attack hose line was stretched into the front door. The fire was contained to the oven. companies quickly knocked the fire down and checked for any extension of fire. A precautionary was taken to the 3rd floor for any possible extension of fire. A primary search was conducted on all floors and was negative. The origin of the fire was in the oven and the cause was accidental from the grease. Water damage to the 2nd floor and some minor water damage to the lower floor. Forcible entry damage to the 3rd floor apartment door. Forcible entry damage to the rear exterior gate in the yard. Owner Juan Melkisetian was on the scene 201 830-1250. Occupant Christinta Oden Apartment 2 917-580-2296 was allowed to return to her unit. WPD and Mayor Turner were on the scene. WEE fire official was notified. WPD Officer Rodriquez #117 was on the scene assisting the building occupant.

Comments

FD responded to a report of an odor of smoke in the building on the 2nd floor.
On arrival no alarms were sounding and all was clear. FD investigated and found the building to be clear and no alarms activated. The call was received by WPD.
WPD called the number back but there was no answer. Building was further checked and clear. FD terminated the incident.

Comments

The tenant in apartment 31 smelled a strange odor and thought maybe something was burning. The odor was fish cooking in the apartment below 21. Both apartments were checked and call clear.

Comments

Companies found an overheated boiler that needed to be shut down. Companies shut down the boiler and advised residents of the issue. The Super/Manager Jimmy Mchale was on the scene and was going to call an emergency repair and stated that he had space heaters to distribute to the residents if the issue was longer term. The Weehawken Police were also on the scene.

Comments

Odor of smoke in the area. Companies found a moderate smoke condition in the basement. The source was determined to be a smoldering piece of wood on the outside of the building near one of the basement windows. The area around the window was wet down with a water extinguisher and checked with a T.I.C. to determine any extension into the building. Apt 2 on the 1st floor was checked around the baseboards as a precaution. The basement was vented using a positive pressure fan. No alarms sounded and no basement smoke detectors activated despite the smoke condition. Weehawken Fire Official notified to have the system checked.

Comments

Occupants stated they heard a pop coming from the washing machine located on the 2nd floor of the residence. A light smoke condition and odor of burning rubber was noted. The rubber seal around the door of the machine showed heat damage and the interior of the wash drum was extremely hot. Power was disconnected and the machine pulled out of the laundry closet to ensure no heat/fire damage to the wall. No further fire dept action was necessary.

Comments

We responded to smoke in the building. Our investigation revealed unattended cooking in apartment 2. Companies shut off the stove, removed the offending pot and completed a Thermal Scan ensuring there was no fire extension. The Thermal Scan confirmed no heat transfer. We ventilated the apartment mechanically and the fire alarm system reset itself. We monitored the apartment for carbon monoxide accumulation and 0 ppm were found throughout the apartment. No forcible entry was needed. The owner, Ms. Blanco, arrived home and gave us the key for entry. The incident was completed and command was terminated.

Comments

Upon arrival SQ7 and LT3 members were directed to Apt 310. Access to the apartment was provided by the on-duty concierge. Members found a burned out trash can on the balcony of 310 and slight burn damage to the patio furniture. However, the fire had been extinguished prior to our arrival. Area was checked and found clear of any live fire or additional damage.

Comments

We responded to alarms activated with smoke in the kitchen. Our investigation revealed an accidental fire alarm activation created in the 6th floor kitchen when they were cleaning the stove. No fire nor heat source was found. The remainder of the building was inspected and all was clear. Although we reset the fire alarm the system still read trouble. I spoke to the on scene supervisor and the building engineer, Chris Gilligan [REDACTED] who stated he would be meeting the fire alarm company, Global Fire Protection, at the building first thing in the morning. The incident was completed and command was terminated.

Small fire in A/C unit in apt 4F. Fire contained to point of origin and extinguished with water can. Electric was isolated to unit. Overhaul was conducted to ensure there was no extension. Areas all negative with thermal cameras. Apartment and stairwells were ventilated utilizing positive pressure. CO levels were taken and all areas were zero prior to terminating the incident. Primary and secondary searches were conducted and negative. Haji Tirado was the occupant in apt 4 and he notified FD. Super Mr Luis was on the scene. Elevator control was maintained throughout the incident. South Elevator was malfunctioning and power was shut. North Elevator was placed back into service and fully operational. Super notified to have elevator repaired. Super who is also an electrician assumed responsibility to have the A/C unit in apt 4 replaced. Weehawken PD was on the scene. Alarms were reset prior to termination.

Comments

We responded to a smoke condition. Our investigation revealed unattended cooking in apartment 6. The remainder of the building was all clear. Apartment 6 had thermal scans completed around the vicinity of the cooking and all was clear. The apartment was horizontally ventilated via the alpha side windows. The tenant, Ms. Hennessy, stated she fell asleep while cooking. A neighbor in the building actually kicked in the door to apartment 6 when he smelled smoke emitting from same. The door was able to be secured. The incident was completed and command was terminated.

Comments

Bathroom outlet in Apt 2 arcing/shorted out due to water leak coming from above.
Backed up drains in Apt 6 were determined to be the cause of the water leak.
Power to the bathroom was shut down and outlet removed. Wires were capped and secured. No further action necessary.

Comments

Alarms were sounding on arrival. Tenants in upper floor apartments did not acknowledge presence of the Fire Dept. Had to ring the bells to gain entry. 2nd and 3rd floor apartments were clear. Entry was made into the 1st floor apartment via the front windows. A side door to the kitchen could not be opened from the inside due to the lock being double keyed (a danger to trapped occupants trying to flee a fire). Windows were opened and the apartment ventilated. Oven was found in self-cleaning mode. Turned to "Cool Down" mode and apartment re-secured.

Comments

Members were directed by occupants to the kitchen where flames were visible in the oven. An attempt was made to use the home's dry chemical fire extinguisher but it was not pressurized. Two water cans were used to extinguish the flames. A male occupant was standing in the kitchen while crews were operating and he was asked to leave the building for his safety. A primary search of the ground floor was conducted. A primary search of the second floor was conducted after the occupants stated they were missing two cats. The cats were located and secured on the 2nd floor. Members removed the stove from the building and advised the occupants it needed to be replaced due to the extensive damage it received. The male occupant then became agitated and started questioning why we had searched his house without his permission. Weehawken PD was on scene and intervened. Occupant continued to state that we entered a room in the house without his permission and important papers were kept there. When I asked what he was missing from the room he stated he didn't know. That he would need to take inventory and that would take a long time. I ordered all members to pick up and leave the premises. Weehawken PD stayed with the man after the incident was terminated.

Comments

Occupant of Apt B7 met us at the front door. She stated there was a fire danger on the scaffold of the building and wanted us to remove the plastic bag from the scaffold. Myself and Capt. Shevlin accompanied her to the apartment and looked out her front window. On the scaffold were multiple plastic bags which appeared to be either filled with or covering some type of construction materials. I explained a number of times that there was no fire danger and no need for any of the firefighters to risk injury climbing onto the scaffold at night to remove the bag. I assured her it was safe for her to go back to sleep. No further action required.
