SERVICE LOCATION
Science Building 118 Lamington Road North Branch, NJ, 08876

Job Number: 212132	Job Category: Repair/Service	CO-OPS - Fire Alarm, Fire Extinguisher, Kitchen Hood (Inspection and Service) MCCPC #13A / EdData Bid 9994-15A / EdData Bid 9995-15B / ESCNJ 17/18-33
Customer Request: Active alarm - wont reset		

Completion Notes:

10/28/2021
 Service Report #: 28402
 District Name: RVCC
 Location Name: Science Building
 Panel Status on Arrival: 1 Alarm 2 troubles
 Panel Status on Departure: 2 troubles
 Job Complete: No - Not Complete
 Location Address: 118 lamington road
 Tech 1: Rob
 Tech 2: Mike
 Reason for Call: Investigate alarm
 Work Performed:

Upon arrival system showed an active alarm in science building. Module for this waterflow has been replaced already - customer stated work going on out on street with fire hydrant causing waterflow alarm - not on fire alarm side. Device was clear of short but due to important meetings going on in building removed 1 leg off of the waterflow so alarm does not return to panel. When meetings are done throughout week will return to hook circuit back up.

Customer Request: NFPA 72 Repairs

Completion Notes:

07/03/2021
Service Report #: 27393
District Name: RVCC
Location Name: Workforce
Panel Status on Arrival: Normal
Panel Status on Departure: Normal
Job Complete: Yes - Complete
Location Address: 118 Lamington
Tech 1: Rob
Tech 2: Jesse
Reason for Call: NFPA-72 Repairs
Work Performed:

Upon arrival system was normal. Arrived on site to make repairs from NFPA-72 inspection. Replaced batteries in both FACP and AMP adjacent. Located devices not functioning in back offices of room 110. Ran wire to nearest detector that had voltage and that fed voltage to the rest of the line. Programmed devices into panel and tested all devices that did not function previously. Confirmed alarms reported to FACP. Located strobe in womens restroom on 2nd floor. Device was not completely screwed into backplate causing it to not function. Secured properly and tested speaker strobes - confirmed strobe is now functioning.

Equipment Used:
4 12v8ah batteries

Reason for Call:
New install
Work Performed:
Installed new transformer and powered panel. Ran cable and installed 1 H/S in dining room on first floor and 1 H/S in stairwell to second floor. Tripped a smoke to test bell loop. Bella did not fire and panel blew power transformer again and damaged panel. Installed new panel and new transformer and blew both again. Tested A/C outlets in library all have voltage but all have hot and ground reversed. Got panel powered from a different room and outlet but panel is having issues and could be damaged again.

Customer Request: Ground fault

Completion Notes:

Date - 10/24/22

Tech - Rob

Work performed - identified ground fault on data loop. Began tracing in field. Will return to continue troubleshooting.

Date - 10/25/22

Techs - Rob - Justin

Work performed - continued tracing ground fault. Located issue at pull station - sheet rocking company laid metal stud for new sheet rock on top of concrete and fire alarm cable crushing it causing the ground fault. Installed wire mold and wire mold box and ran new cable, clearing the ground fault. Replaced backup batteries as they were also going in and out of trouble.

Equipment used - 2 12v18ah batteries

NFPA 72 Certification: Inspect and test as per NFPA 72. Provide the required 4 page NFPA 72 report with a quote for any deficiencies found. Unless otherwise noted - all fire alarm inspections are performed during normal business hours. It is the responsibility of the customer to provide access to all locked/secured/occupied areas during the inspection. Any return trips to test devices that were not accessible will be billed based on the provided labor rates.

Testing will require the activation of audible/visual devices. It is the responsibility of the customer to provide adequate notice to occupants of the building prior to Fire and Security Technologies arrival for testing. If requested, Fire and Security Technologies can provide a proposal for testing of signals at a separate time when the building is not occupied.

It is the responsibility of the customer to put the central station on test prior to Fire and Security Technologies testing.

Unless other arrangements are made, Fire and Security Technologies will provide the 4 page inspection report as well as a quote for all deficiencies once

all buildings on the proposal have been inspected.

Tech 1:
Cody h

Tech 2:
Justin

Reason for Call:

Battery trouble . Remove existing pipe in prep of demo

Work Performed:

Went and searched the campus for panel ESC-125W (m21) and located it in the physical education building . Swapped out the bad battery for two new good ones . Started making a list in the process of panel numbers and locations . Met with contractors to locate a long pipe that had fire wire in it and it had to be removed so they could do their work . I hand over hand followed the pipe and it had 4 sets of wires going to duct detectors and junctions boxes in other rooms . I ran a wire from one junction box where two of the wires split to another junctions leaving extra wire in prep to hook up so I can cut the existing wires and tie into new ones so we can cut and remove pipe . . Also took down and relocated a pull station because it was in the way of the contractors who had to take down the wall . Re located about 15feet away on the center support beam in the room .

Equipment Used:

2—12v-7ah battery's
175feet —16/2 fire wire

Tech 3:
Justin

Reason for Call:

Continue to take down pipe wires and fix trouble on panel

Work Performed:

Ran 16/2 fire wire for two locations that needed to be ran so I could take down a long pipe with the existing wires. Ran to two locations two - 16/2 wire today did the last one to the last location in new panel room (m32-33) connected the wires then cut the old ones out. Took down the long pipe and disposed of it. Replaced dirty heat detector in old police station area in phy. Ed building. Panel normal.

Equipment Used:

1—idp— heat ROR-IV heat set.
150 feet —16/2 fire wire

SERVICE LOCATION
Raritan Valley Community College Receiving Dept- Rodney William North Branch, NJ, 08876

Job Number: 241278	Job Category: Repair/Service	CO-OPS Fire Extinguishers - MCCPC #13A / EdData #15A / ESCNJ 20/21-23 Fire Alarms - 57-CCCPS / Ed Data #14
Customer Request: John Trojan reporting outage during Fire Alarm test that was done on Monday 5/13. Multiple areas around campus audio visual not working.		

Completion Notes:

05/16/2024

Service Report #:

38601

District Name:

RVCC

Location Name:

Somerset/Hunterdon

Panel Status on Arrival:

SBUS Comm Faults for Multiple Somerset area RPS, ECS, and Annunciators (12 total), Missing Detector HH RR by Vending, M13 SBUS

Comm Fault

Panel Status on Departure:

Same

Job Complete:

No - Not Complete

Location Address:

Lamington Rd Branchburg NJ

Tech 1:

Nick M

Reason for Call:

Multiple areas speaker strobes not functioning properly

Work Performed:

Multiple RPS and Amps not communicating with fire alarm control panel in Security Office. Began to trace and check splices. All look ok. Will return to run new wire for all sbus modules. They are all in the closet by the main entrance of somerset.

Equipment Used:

None

05/17/2024

Service Report #:

District Name:

RVCC

Location Name:

Somerset/Hunterdon and WorkForce

Panel Status on Arrival:

Multiple Somerset area SBUS Modules in trouble, HH RR by Vending Heat missing, M13 SBUS trouble

Panel Status on Departure:

M13 SBUS Trouble, Pool Detector bypassed, HH RR by Vending heat missing

Job Complete:

No - Not Complete

Location Address:

Lamington Rd Branchburg NJ

Tech 1:

Nick M

Tech 2:

Rob & Ryan (11-230)

Reason for Call:

Multiple areas speaker strobes not functioning

Work Performed:

Ran new wire for RPS and Amps in Somerset closet by entrance. Connected wire and cleared all somerset area SBUS troubles. Speaker strobe test should work normally now. M13 sbus module is on RVCC-2 and appears to be a separate problem. Went around campus searching for device and couldn't find. Will also clear hunterdon hall rest room missing device trouble.

Equipment Used:

None

District Name:

RVCC

Location Name:

Somerset/Hunterdon/West and Workforce

Panel Status on Arrival:

M13 SBUS Comm, HH RR by Vending, Pool Heat bypassed

Panel Status on Departure:

M13 SBUS missing, Pool Heat bypassed

Job Complete:

No - Not Complete

Location Address:

Lamington Rd Branchburg NJ

Tech 1:

Nick M

Tech 2:

Ryan M

Reason for Call:

Multiple areas not functioning during speaker strobe test

Work Performed:

Located M13 annunciator in West Hall Tech Office. Power wires had been removed and pieces broken off annunciator board. Tried to power on device but it did not energize. Not sure whether college wants to replace annunciator or delete and cap. Rob was going to speak to John T about that. Located and replaced Heat detector in rest room by vending machines in hunterdon hall. Went over to Workforce and checked on cell dialer which appears to be dead. Currently a telguard dialer. There was also a trouble for a smoke detector in room 215. We located and replaced detector.

Equipment Used:

1 IDP Heat ROR W

1 IDP Photo W

Reason for Call:

Trouble on FACP

Work Performed:

Troubleshoot ground fault/s-bus communication faults. Removed all cables from main panel and security office and ground fault went away. Started putting cables back on main panel and when we got to the S bus power ground fault came back. Read power cables for a ground and did not read a hard ground. We will need to return to search the S bus ground fault.

Reason for Call:

Trace Ground Fault

Work Performed:

Arrived on site to trace a ground fault. Isolated to S-Bus circuit. Broke splice in main control panel and isolated ground on S-Bus cable feeding boosters and amplifiers in Physical Education building. Traced cable to 2nd floor lounge center. Cut cable to isolate whether the ground fault was in Physical Education area or back towards panel. After cutting cable ground fault cleared. Tension on cable very well could have caused ground. Hooked up all wires and no ground fault present. No ground fault trouble on panel or reading on voltage meter. All good.

Reason for Call:

Move devices in new construction area.

Work Performed:

Relocated pull station near exit door. Put up a splice box and extended data loop. Fish cable down wall. Installed retro box and reinstalled existing pull station, all good. Relocated speaker strobe ran a new cable from existing device. Phil Weaver asked for device to be retrofitted into wall. It is a speaker strobe and I could not find a retro box to where the speaker strobe could fit. Reused existing pipe and remounted box and device. All good. Worked with sprinkler company to clear tamper supervisory, all good.

Equipment Used:

20ft - 16/4 cable

10ft - 16/2 cable
