IMPORTANT MESSAGES

Upon arrival, the following signals showing on panel - NAC 2 Trbl, Bell 2 Trbl, & 3rd fl East Tamper. After extensive troubleshooting and being unable to clear the troubles, but also finding no physical issues, I took a closer look at the panel itself. I took a wire off a completely different zone, and it went into trouble. After reconnecting wire, the trouble continued to go in and out, just like the rest of the troubles. I power-cycled the panel, and system returned to “ready to arm” status. I waited approximately 30 mins to ensure no troubles returned. *There are a couple bypassed zones that were bypassed upon my arrival, and I’m told they are due to ongoing work being done in the building*. Also reconnected wires to annunciator in 911 dispatch trailer that customer removed due to frustration with panel going in and out of trouble constantly. Left system ready to arm with pre-existing bypasses.

To pay by phone with your credit card or bank account, free of charge, please complete the back of form.
