

Kathleen Horgan

Did you see the alert on website re: water?

K

I only got back from Long Island a short while ago. Picked up my sister-in-law who is spending the week with me. What an exhausting trip!!

I read your message to Linda. Extremely nice. Thank you. Will check out website. Have you gotten any feedback from your posting?

Hope today went well for you. Sorry to have sent so many messages to you about the brown water.

Ah that's not a fun drive. Hopefully you have a glass of vino to relax and decompress

No need to apologise, that's my job.

Linda emailed back shortly after and thanked us and said her water cleared up

No official feedback. In it, asked the public to email us or message us through website if they have water quality issues so we can track the problem - no one did.

C We are getting a number of dirty water complaints. I believe the cause is a fire flow test that happened this morning at the Element 55 West Front Street. I wanted to make sure you were aware in case you get a call.

Ok
Should it be resolved now by a simple flushing of the lines?

C Yes

going to put a notice on the site about the flushing
any idea what area might be affected by this?
limits/boundaries

C No, Linda is on Leroy, Tom is Oakland, I was getting complaints from broad earlier and the test was on west front.

so we're sure this is definitely due to the test?

C I think it's a combination of the test and the process change from NJ American Water, had the main not been stirred up, it probably wouldn't be an issue.
Sorry for the noise, I'm at chili's with the family.

no problem

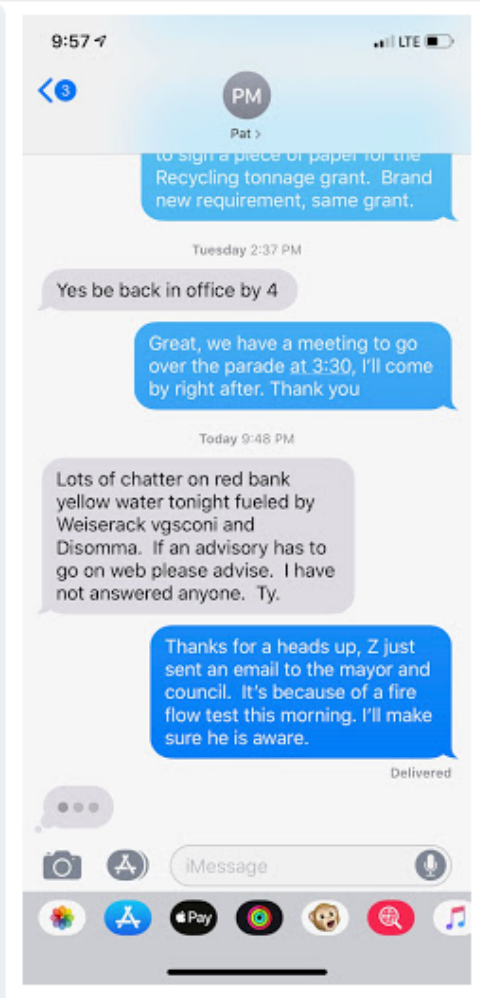

C Pat just texted me

about the mayor?
water*

C

another request just came in on Linden Place

C

Responded, I'm going to check with pat pinto tomorrow, she is on linden place, if she had problems
She would have called or texted
