Good morning! Last week, the bulk of my time was spent gathering oprr requests and reviewing documents. I also did grant searches and am re-submitting an environmental grant. Please let me know if I can help in any way, thanks!
Nancy

With the Holiday, I did not submit a report at the beginning of the week, so wanted to make sure you had one. Last week, I began work on the Atlantic City Electric grant, submitted the NEEF grant for the second round (environmental), compiled OPRA responses, and communicated with Matt Lyons re: the LEAP grant. Thanks, and please contact me with any questions.

Last week, I worked on the application for the Atlantic City electric grant, attended the EDC meeting, compiled documents for an outstanding OPRA request, discussed the Police Body Camera Grant with the Chief of Police, and searched for additional grants.

Thank you!

Good morning! Last week, I completed several rather voluminous opira requests, completed minutes for the EDC, conducted correspondence for the EDC, worked on the Atlantic City Electric grant, and searched for USDA grants. I also had communications with the zoning officer regarding an ongoing residential issue.

Thank you,
Nancy Kennedy, Esq.

I know Heather and Dave had talked about making a playground/walking trail at the little league fields. Malaga also gets a lot of press for needing new equipment. I will do whatever you want, just let me know. Thanks, Nancy

Good Afternoon,

Last year, Atlantic City Electric's Sustainable Communities Grant Program provided \$75,000 in grants to fund open space and environmental projects and resiliency projects across the company's South Jersey service area. We are excited to announce the application period has opened for our second year of the program! The grant request period runs from April 28 to June 30, 2021.

In partnership with Sustainable Jersey, an organization that researches best practices for what communities could and should do to contribute to a sustainable future, Atlantic City Electric provided grants to the following municipalities in 2020:

- **Cape May City (\$10,000)** - The grant will be used for conducting a study around Cape Island Creek to identify the causes of nuisance flooding and develop a citizen early warning system in order to reduce property loss.

- **Egg Harbor City (\$10,000)** - The grant will be used for repairs needed at Lake Dam including replacing missing fence along the secondary spillway, repairing a tilted pedestrian bridge railing at primary spillway, and repairing abutment walls including removing and replacing fractured concrete at ends of spillway.
- **Hamilton Township (\$10,000)** - The grant will be used for incorporating green infrastructure to address stormwater issues and enhance emergency management related to flooding events.
- **Medford Township (\$10,000)** - The grant will be used for creating an intelligent weather station for monitoring, modeling and visualization in order to enable timely preparation and implementation of emergency plans.
- **Clementon Borough (\$5,000)** - The grant will be used for reinventing Clementon's Open Space and Recreation Plan to ensure the preservation of natural spaces including the community's lakes and almost 200 acres of dedicated open space.
- **Downe Township (\$5,000)** - The grant will be used for making Raybins Beach, a currently untamed coastal wilderness ecosystem, accessible to residents and visitors.
- **Hammonton (\$5,000)** - The grant will be used for planning responsible development and preservation of open space by updating Hammonton's Open Space and Recreation Plan.
- **Middle Township (\$5,000)** - The grant will be used for updating Middle Township's Open Space and Recreational Plan, which will promote responsible public recreation, preserve and enhance historic and cultural resources, conserve land for wildlife, enhance water quality, protect open space lands and promote health and wellness in the community.
- **Salem City (\$5,000)** - The grant will be used for redeveloping Salem's West Playground, making the park a safe place where children can play and be active.
- **Waterford Township (\$5,000)** - The grant will be used to build a bike path between two of the Township's primary recreational facilities and two schools, lessening the dependence on motor vehicles and acting as a safe route for kids to take to schools.
- **Wenonah Borough (\$5,000)** - The grant will be used for repairing and renovating the Clay Hill trails of the Wenonah Conservation Area that supports residents, school students and visitors throughout the county for hiking and learning.

Interested organizations can learn more about the 2021 Sustainable Communities Grant Program and how to submit a grant request at atlanticcityelectric.com/SustainableCommunities.

Local Municipalities Encouraged to Apply for Atlantic City Electric Sustainable Communities Grants

Open space, environmental and resiliency projects to receive \$75,000 in grant funding

MAYS LANDING, N.J. (April 28, 2021) – Atlantic City Electric is offering grants of up to \$10,000 to local municipalities for projects focusing on open space preservation, improvements to parks and recreation resources, and environmental conservation. The company's Sustainable Communities Grant Program, which was launched last year and is facilitated by Sustainable Jersey, provides \$75,000 in grants annually to fund open space and environmental projects and resiliency projects across the company's South Jersey service area. The grant request period runs from April 28 to June 30, 2021.

The program will provide \$50,000 in grants of up to \$10,000 each for projects focusing on open space preservation, improvements to parks and recreation resources, and environmental conservation. Projects include the development of recreation trails, the purchase of open space, and the planting of trees and other vegetation. The program also will provide grants, totaling \$25,000, to support resiliency projects that demonstrate innovation in providing a safe and reliable resource for a community during a time of emergency.

In 2020, the Sustainable Communities Grant Program supported 11 local projects, including the installation of an intelligent weather station in Medford Township, helping to make Raybins Beach in Downe Township more accessible to residents and visitors, expanding open space and support for Hammonton's Open Space and Recreation Plan, a new bike path in Waterford Township and redeveloping Salem's West Playground.

Municipalities in the Atlantic City Electric service area can apply for a Sustainable Communities grant each year. A committee with representatives from Atlantic City Electric and Sustainable Jersey reviews each application and selects the projects to receive funding.

For Atlantic City Electric, and its parent company Exelon, diversity, equity and inclusion is a core foundational value both in the workplace and in outreach to the people it serves. The company strongly encourages underrepresented communities to apply for the Sustainable Communities grant.

Interested organizations can learn more about the Sustainable Communities Grant Program and how to submit a grant request at atlanticcityelectric.com/SustainableCommunities.

Readers are encouraged to visit *The Source*, Atlantic City Electric's online news room. For more information about Atlantic City Electric, visit atlanticcityelectric.com. Follow the company on Facebook at facebook.com/atlanticcityelectric and on Twitter at twitter.com/acelecconnect. Our mobile app is available at atlanticcityelectric.com/mobileapp.

###

About Atlantic City Electric:

Atlantic City Electric is a unit of Exelon Corporation (Nasdaq: EXC), the nation's leading energy provider, with approximately 10 million customers. Atlantic City Electric provides safe and reliable energy service to approximately 560,000 customers in southern New Jersey.

About Sustainable Jersey:

Sustainable Jersey is a non-profit that provides tools, training and financial incentives to support communities as they pursue sustainability programs. Currently, 81 percent or 459 of New Jersey's 565 municipalities are participating in the municipal certification program and 353 school districts and 969 schools are participating in the Sustainable Jersey for Schools certification program.
